प्रस्तावना

पाश्चात्य देशांचा सुक्रवातीचा उतिहास पाहता, स्त्रिया या फक्त चूल आणि मूल था करिं बिक व्यवस्थेत अडकलेल्या होत्या . त्यांना भावीनिक जीवनात स्थान नव्यते. - यांना संपत्तीचा वाटा मलता आिठा शिक्षााची संघी नलती स्त्रियांचे सामाजिक स्थान, समाजनीवनातील त्यांचा सरमाग आि योगदान, त्यांचे विविध प्रश्न व समस्या द्वादीवद्दलचे विचारमंथन अठराव्या बातकात हो अलागले. या विचारमंथनातून स्त्रीवाद विचारद्यारेचा उगम ब्लाला आणि स्त्रीशिक्षण, स्त्रियांचे रामकीय हकक, रामान संधी अशा अनेक प्रश्नांकडे समामार्थ स्त्री व पुरुष दोधे मिळून एकत्र थेऊन समाज त्यार आला. अर्थातन दोघांचेही महत्त्व समानच अभायला हवे पा पुरुष्यमाताक अवश्योमध्ये क्रीला मिळ्गारे स्थान, तिया दर्जा, तिला प्राप्त होगारे स्वातंत्र, अधिकार यामध्ये असमानता उनाढळून येते. यकंदरितन्य कीला निव्वळ ती क्री आहे

क्रिका कभी लेखां ही प्रवृत्ती समस्या निर्माण करणारी आहे. या भमञ्येचा तिच्या सर्वाभीण विकासाच्या हुप्टीने अध्यास होठो गरनेचे आहे व थातूनच आपठा पारतो की सिथांशी निगडीत सर्व प्रश्न हाताळताना स्तीवादी संकल्पना अस्तित्वात आली आहे.

20 व्या बातकात समाजशास्त्रीय द्वष्टीकोनातून समाजनीवनाच्या अध्ययनासाठी ज्या नवीन परंपरा निर्माण झाल्या आहेत. त्यामध्ये ऋगिदी अध्ययन परंपरा खूपच जानली. किंवा आपनाता असे म्हणता थेर्डल की स्त्रीवादी विचार प्रनालीने

सर्वाचे लक्ष वेघले.

3

श्रीवादाची पायाभूत मांडि

1949 हे वर्ष रुगिवादी विचारसरुगिन्या जडगराडगीनील राक महत्त्वपूर्ण वर्ष मानले जाते. याच वर्षी 'भिमान-दि-बोव्हा' या फ्रेंच विदूषीचा दि सेंकड सेक्स हा मॉलिक गृंश प्रकाशित केल होता आिं सर्वां पुरुष्प्रधान सत्तेची मांडणी करणाऱ्या व्यवस्थलाच हादश खसला. या ग्रंथामुळ स्त्रीवादी विचारसरुगीला वैचारिक पाठ-- वद मिळाले . युद्द्योत्तर स्तीवादी समिक्षेच्या शिल्पकार असे शिमान - दि- बोव्हां थांचे वर्जन केले जाते. निर्मान - दि - बोव्हा यांनी शियांवाद्वल असे म्हटले आहे की, 'one is born a Homen, one becomes one' म्हा नेय बार्ड म्हा कोठी जन्माला चेत नारी, तर नंतर ती बार्ड बनली जाते. हिता बाई नर्मते लर् समाजव्यवस्थाच तिस्थावर हे क्रीपन किंवा खाईपठा लादते . समाज व्यवश्थाम् तिला एका भूमिकेत जगायला शिकवते. हार्म, राजकारण, शिक्षण, समाजकारण या समाजान्या मह्त्वाच्या वास्तवतेम खोटी तिची भूमिका दुव्यम दर्जाची रुखिली आहे. पुरुष्भत्नाक समाजव्यवस्थेत पुरुष हा केंद्रविद्व असतो तर क्तीला पिरधावस्थे स्थान दिले जाते. स्त्रीवादी निव्धांताची रेतिहासिक मांउठी कुछीपासून झाली किंवा क्रीवादी चळवळीची सुळे खितिहासाल किती खोलवर क्रजली आहेत हे तपासतामा आपगास असे पारायला मिळते की. राका इण्टिने विचार करता स्त्रीवादी हण्टिकोन समाजामरो सत्त आढ्वते

पास्थिमात्य देशातील माटितीचा आद्यार घेता या संदर्भातील स्ती--वादी लेखनाची परंपरा खुमारे उ०० वष्प्रिवीं खुक झालीव ती सामाजिक निषेद्यापुरतीय मर्यादित होती. हे त्या काळातील लिखाण आजन्या स्रीवादी विचार मांडणाऱ्या लोकांना प्रेशादाची ठरेल असे होते. तसेय कीवादी चळवळी ही साद्यारवात: 17 व्या जानकात स्रक

आल्या.

स्त्रीवादाची व्याख्या

स्रीवाद क्टाने लिंगामेद ब्रागारून स्री-पुरूष समानतेको वाट्याल करारा विचारप्रवाहं सामान्यतः जरी स्रीवाद ही पुरूषविरोही चळवळ समानली जाते. त्यामुळे ही स्रियांचे रोतिहा--सिक दुथ्यमल उनेडात आणून हे बोषण संपष्ण्याम्या प्रयत्न करते. ही सामाजिक, राजकीय जाणीव आहे.

स्त्रीवादाचा अर्थ

सीवादाचा अर्थात Feminism हा अर्थ लॅटिन सापेतील Femina या अख्यापासून तथार बंगाला. फेमिनाचा अर्थ स्त्री (Noman) असा असून रालिस रॉसी यांनी फेमिनिसम हा शब्द प्रथम 1895 साली "The Athenaeum" या नियतकालिकेत

प्राचीन समाजातील स्त्रियोचा दर्जा दुख्यम, कनिष्ठ

प्रतीचा होता. रुठी व पुरुष याची बारिशक व मानसिक भिन्नता हा जरी जीवशास्त्रीय स्वरूपाची असली तरी सामाजिक स्तरावर तिला या लिंगमेदावर आद्यारित वागगूक मिळूलागली. स्त्री

पुरूष असमानता हा मूळ सुद्दा धरून तिला सर्वेच क्षेत्रात कमी.
-पा प्राप्त बनाला दुश्यम स्थान प्राप्त ब्साले. परंतु हे दुश्यम
स्थान हे अन्यायी विषमतेवर आधारित असल्याने याविरुद्ध
स्त्रीत्वाचे दुश्यम स्थान माकारुन माजूस म्हणून समानात स्थान

मिळविवयासाठी तिचा प्रथल सुरु झाला. या व्यवस्थेमहर्थ तिला तिचे स्वतः चे स्थान निर्माण करव्याची गरम भासू

लागली व यातूनय सीवादाया जन्म झालेला दिसतो.

श्रीवादी सिद्धांकन

रुविवादी सिद्धांकन हे स्रीवादामधील महत्त्वाच्या मांडिंगी सेंद्रशांतिक स्वस्प आहे. लिंग्रामाव आधारित केली जागारी विवसता समजून हो अन त्याचे विश्लेष्ठा करने हे त्याचे अद्देषट असते. स्तीवाद हा ज्याप्रमाने एकच एक नसती तर स्रीवादान्ये विविध प्रवाह असतात; व्यान्यप्रमार्ग विभिन्न स्रीवादानयून वेशवेशळ स्तीवादी सिद्धांकन निर्माण स्वालेल स्रोहित. प्रमुख्यप्रवाही स्तीवाद हा परीद्यावर असणान्या सामाजिक समूहांका सामावन होणारा अथवा त्यातील स्त्रियांचे अनुस्व समाविष्ट क्रणारा असेन्य असे नारी. इदा. मारतानी प्रमुखप्रवाही स्रीवादाने दलित सियांच्या प्रकांची अनेक काळापर्यत दखल होतली नलती. पाश्चात्य जगातील प्रमुखप्रवाही स्त्रीवादामध्ये काळ्या समूहासारख्या परीद्यावर अस्वान्या सियांच्या अनुस्रवांच्या प्रारंभीच्या काळात समावेश करव्यात आला. नवता. वेल हुक्स या अमेरिकेतील स्नीवादी लेखिका त्यांच्या फेमिनिस्ट थिअरी: फ्रांस मार्जिन टू सेंटर था पुल्तकामधून वरील संदर्भात मांडा कश्तात. स्तीवादी सिद्धांकन हे परिधावरील असगान्या व्यक्ती क्याप्रकारे निर्माण कर काकतात याची वाक्यता नमूद कश्तात.

स्त्रीवादाचे सिद्धांत

पुरुष अंश्कृत मानिकतेतून, अनिष्ठ, अंद्यत्रद्धाळू चालीरिती, संकेत या सर्व व्यंद्यनातून स्त्रियांची मुक्तना हा स्त्रीवादाचा सूळ हेतू आहे. अर्थात हा हेतू साध्य करनाना त्या. त्या सामाजिक आर्थिक - श्नकीय प्रिस्थितीनुरूप निर्माण इंगालेले दिसतात . प्रामुख्याने स्त्रीवादी विचारांचा अभ्यास कश्ताना क्रीवादी सिद्धात अध्यासने अश्नेचे ठशते.

) स्त्रीवादाचा उदारमतवादी सिद्धांत

मुळात उदाश्मतवादी शिद्धांत व्यक्तीला केंद्रभ्यानी मानतो. व्यक्ती हितामध्ये समानहित साद्यले जाते व साहिनक्य समानहितातून समानविकास आपोआप घडतो. मात्र सार्वजनिक जीवन जगताना राज्यसंस्थेने आपली सता मर्थादित हेवून व्यक्ती -वर किमान निर्वध धालावेत व व्यक्तीच्या खाजा जीवनात पूर्व स्वातंत्र्य द्यावे ही भामिका उद्यक्तत्वाद मांडताना दिस् तो उदावसत्वादी अजीवादाचा मुख्य हेतू हा आहे की विज्ञ्यांना व्यक्तिय व कायदेशीर समता प्राप्त करून देने प्रकृत समाजन अजी-पुक्ष व समानता प्रवण्णापित स्वाती की स्त्री तिन्या क्षेत्रातं किंवहना तिला हत्या त्या क्षेत्रात व्यक्तिया प्रवार स्वतः सी हामता / कुवत स्मिद्र करेल,

माकर्सवादी / समाजवादी स्त्रीवादी सिद्धांत

2)

व्यीवाही विद्यांताचा अक्ष्यास करताना माक्नीवाही / समाजवादी स्त्रीवादी अक्षाम अत्यंत महत्वाचा उरत्रो. भांडवलकाति व्यमाम व्यववस्थित कमकुवन ठावीन तमिशोषूग केले जाते. व म्हणून्य भांडवलकारी व्यवस्थित माक्सिवादी विचाव विवोध केवतामा दिवातान, त्राधानिकच कमकुवत

कोषिक व दास्य वर्ग म्हणून क्रीकडे पाहिले जात असल्याने व मार्क्सवादी सिद्धात हा कोधिक दास्य प्रथा यांना विशेष करत अभन्याने स्रीवादी विचार मार्क्सवादाकडे आकर्षित झालेले दिसतात.

मारतीय स्त्रीवादी सिद्धांत

3)

साधार्वातः सारतीय स्त्रीवादी चळवळीमख्ये स्ती--मुक्ती साठी, स्त्री - पुरुष समानते साठी प्रशालम स्त्री - पुरुष नाते, स्त्री : स्वातंत्र्यासाठी, स्त्री शिक्षणासाठी सुक्ता साळवी, ताशवाई शिद्रे, पं. शमावाई, स्मावाई शन्डे, कमला देशपांडे, जनाक्का शिंदे अशा कितीत्री सीवादी महिला आपन्या विचारातून लेखागीतून, कार्यातून स्त्रीवादी चळवळीचे कार्य करीत होत्या. अलिक्डील काळात अनेक स्त्रीवादी विचारवंत भारताच्या, महाशण्ट्राच्या क्षेत्रात आपल्या विचाशतून, कार्यातून भूमिका मांडलाना दिसतात. 1993 साली 73 वी व यथ वी घटनाडुक स्तीन सियांना स्यानिक स्वश्रास्य संस्थामध्ये रामकीय सहसागास्या हण्टीने मंजूर कश्नन कार्यश्त केले.

भे आधुनिकोत्तर् स्रीवादी सिद्धांत

क्रियांना दुष्यमत्व देण्यामागे जी पुरूषी मानाभिकता आहे त्यांचा बीमोड करा हे स्त्रीवादां मूळ उदिएट आहे. स्त्रीवादांतर्गत् अनेक गोण्टींचा समावेश टोतो. पुरूषांद्वत्विीय, आज सियांनीटी स्वताची म्हणून मोळख्य निर्माण केलेली आहे. रव-विकास, स्वतंत्रता यांची जरूरी आहे. स्वत्वाची ओळखा, स्वायलता, स्वयेनिविय, सिक्य सहभाग या गीपटी सीला व्यक्ती म्हणून परिपक्व बनवितात त्या मिळवून देव्याचा प्रथल

स्तीवादी चळवळीने केला आहे. विसाव्या वातकाच्या उत्तराद्यात क्रीवादी - सुधारुगावादी महिला अधिक आक्रमक आल्या.

राक समाजसेवक

पंडिता समावाई यांचे स्त्रीउप्याशचे कार्य:-

पंडिला स्मावाई यांनी स्त्री उद्धाशसाठी आपले संपूर्व आयुष्य पणाला लावले होते. त्यांचा जन्म 22 एप्रिल 1858 रोजी चिल्पावन क्राम्हण कुटुंबाल कर्नाटक येथे झाला होता. २मावाई योनी संपूर्ण भारतभर दौरे क्लन भारतातील स्त्रियांच्या दयनीय अवस्थेची जवळून पारकी केली आिं त्या अवस्थेची त्यांनी जाहीरपां टीका करून सियांनादेखील शिक्षाना अधिकार मिळाला पाहिने. वालविवाह वंद पाडले पारिजेत . विद्यवा विवाह धडवून आठाले पारिजेत असे विचार आपल्या भाषणातून खांनी मांडले होते.

स्त्रियांच्या उद्याशभाठी श्मावाई यांनी इ. स. 1882 महये पुने थेथे "आर्च महिला समिती" ची स्थापना केली. या समितींच्या शाखा मुंबई आिठ इतर भागात देखील स्थापन करागत आल्या. स्मावाईनी भारतात आल्यानंतर मुंबर्ड येथे ॥ मार्च 1889 रोजी आहदा सदन "नावाची संस्था स्थापन केली.

या संस्थेत निरामित विद्यवा व अनाध क्रिया थांच्या राहण्या -जेवव्याची मोफत व्यवस्था क्रक्यात आलेली होती. त्याचप्रमावी या सियांना शिक्षा देव्याची व्यवस्थाही सारदा सदनने केली होती.

स्थिएन मुलीं साठी त्यांनी "मुक्ती मिश्न" नावाची संस्था स्थापन केली. समाजातील निश्नित सिथां स्गठी त्यांनी कृपास्त्व नावाची संस्था स्थापन केली. त्याचवरोवर प्रौढ व वद्य महिलांच्या संगोपनासाठी वर्गातीसदन नावाचा आश्रम त्यांनी स्थापन केला होता. समाजातील वालिका, वृद्ध, निराश्रित जवळपास सर्व वयोगटाच्या सर्व समस्यां--च्या पीडित स्त्रियांच्या उद्धारासाठी रसावार्ड यांनी अविरत प्रथल केले होते.

सीवादाची वैशिष्ट्ये

स्रीवादी विचारांचा अभ्यास

स्त्रीवाद ही मूळातय 'स्त्री' या ध्यक्तीला केंद्रीत

धकन आहे. पुरुष जसा व्यक्ती आहे तकी सी ही सुद्धा एक

व्यक्ती आहे. मात्र पुरुष्मत्ताक वृत्तीतून स्त्रीला कमी लेखाव्या

- नी तिला मनुष्यहीन म्हणून वागणूक देण्याची भी प्रया प्रवी-

-पार चालत आली तिला जागतिक पातळीवर फार मोख्या

प्रमाणात विशेष्टा झालेला दिसतो, भारतात राजाराममोहन राष्ट्र म. फुले, सा. फुले, डॉ. बाबासाहेब आंबेडकर, छ. शाहू महाराज अशा अनेक समाजसुष्टारकांनी आपल्या विधारातून व कृतीतून

स्तीवादी भूमिकेस प्रांधान्य दिलेले दिसून थेते.

2) स्त्री अत्याचारास विरोध व स्त्री स्वातंत्र्याचा पुरस्कार

कार्यक्षेत्र तेवदेश आहे. तिला कोमताही निर्णय घेठ्याचा अधि -कार नाही. धार्मिक अनिष्ठ चाली रितींच्या वंद्यनात ती जीव

ज्ञाते. तिला शिक्षां माकारले गेले. प्राचीन काळापासून स्ती-स्वातंत्र्यान्य। फार सोख्या प्रमानात संकोच करन्यात आला आहे या संकोर्यातूनच तिन्यावर अनेक वंद्यने लाद्व्यात आली.

तिस्थावर अत्यानार धडला म्स्गूनच या सर्व वंद्यनातून मुक्त होठो क्ट्रामेच स्त्री - स्वातंत्र्य, स्वः विकास प्राप्त कर्रो ही

प्रमुख भूमिका क्रीवादाची असलेली दिसून येते. लिंग भेद किरहीत स्त्री-पुरुष समानतेवर आधारित समानव्यवस्था 3)

निसर्गतः स्त्रीव पुरुष या दोयांचेटी स्थान हे नितकेय समान पातळीवर महत्त्वाचे आहे. चीडक्याल लिंग भेदासुळे क्रियांन

10

सर्व पातळीवर पुरुषांप्रमाठो दर्जा, सम्मान आदर प्राप्त झाला नाही. अधिकार वे स्वातंत्र्य डावलव्यान आले व स्टबूनय स्तीवादी विचार-- सर्गीमरो स्त्री टी एक व्यक्ती साहे, व्यक्ती स्टब्रून तिला स्थान, सन्मान, आदर मिळायला स्वा.

राजकीय सक्लीकरा 4)

दिशतो.

जाशतिक पातळीवर स्रियांना राजकीय अधिकार प्राप्त करायासाठी बागडावे लागले. विविध भीवादी संघटनांनी राजकीय अधिकार प्राप्ती साठी चळवळी द्वारे आपले लढे उसे केले व आपले अधिकार प्राप्त केले. डॉ. बाबासाहेब आंबेडकरांनी यांनी घटना--त्मकदृष्ट्या संविद्यानात दिलेले स्त्री-पुरुष समानता - स्वातंत्र्याविद कायदे, ञ्थानिक स्वराज्य संस्थामध्ये स्त्रियांचा सहमाग वाढविन्याच्य हण्टीने 1993 साली आलेली गउषी हा गय वी घटना इकस्ती अशाप्रकारे भारतात्रही श्रियांचा सहभाग व सवलीकरगाच्या इप्टीने प्रथल झालेले दिसतात.

आधुनिकीकरेगाचा स्त्रीवादावरील परिजाम 5)

राकीणिको नव्यदपूर्वीचा स्त्रीवाद हा स्त्री म्हणून तिल न पाहता एक व्यक्ती स्टगून समाजाने प्रावे यासाठी होता. तिच्या अस्तित्वाचा, स्वातंत्र्याचा, समानतेचा, अधिकाशंचा असा स्त्रीवाद होता. 1991 नंतर नागतिकीकरा, उदारीकरा, खाजनीकर्वा याऱ्या प्रभाव संपूर्व समाजकरवा, अर्थकारवावर पडला. साहजिक्य क्रीवादावरही यान्या परिणाम झालेला दिस स्त्रियां यश्न , कोंदुं बिक हिंसाचाराचा प्रश्न , प्रभार्भाध्यमाती स्त्रीची मांडिं यादीन सियांवर होगारा परिणाम तसेच मानवी म्हणून प्राप्त आलेले स्त्रियांचे अधिकार व प्रत्यक्षात अस्गाई

वस्तू स्थिती अशा विविद्य पातळीवर सीवादी अभ्यास होतान

नीवादी विविध हिण्टिकोन व सतिभिन्नता

स्तीवादी विचाराचा जन्म मूळाल स्त्री ही एक व्यक्ती साहे, तिला म्य तिचा विकास करव्यासाठी स्वातंत्र्य, समानता, सर्व अधिकार प्राप्त असठो गरनेचे आहे या विचारसरठी तून विमां अलाले. अर्थात उद्देश समान असला तरी तो उद्देश साध्य करव्याच्या हुण्टीने विविध विचारप्रवाह अस्तित्वात आलेले दिसतात स्त्रीवादी विचारात उदारमतवादी विचार व्यक्तीस्वातंत्र्यास प्राण्य व स्त्री-पुरुष समानता मानगारी दिसते. उच्चवर्जीय स्त्री, मध्यम-वर्जीय स्त्री, धर्म, संस्कृती अशा खिद्य धर्कातील स्त्रिया या स्त्रीवादात होते. तसेच वर्णभेद, वंशभेद अशा मुख्यांवरही स्त्रीसंधरनात सत्रिकाता विस्तृन चेते.

12 Rajdhani DATE / / भीवादाची उद्दर्ष्ट अविवयक प्रक्लीयां अभ्यास सविस्तरपठी करतो. जीला मह्यवती ठेवून तिच्या विषयक भागाजिक जीवनाचा आहि। मानवी अनुभवाच्या विश्तत क्षेत्राचा अर्वश्वामान्यपर्वा अश्यांभ करें। सीवादी सिद्धांताचा स्विकित्राठा अध्यास करता चेईल. जीवादी त्रिद्धात आणि रामाज्यास्तीय लिद्धांत यांची तुलनात्मकता पारता थेईल. श्रीयांची समाजात होगारी पिळवगूक, बोवन याचा अभ्याल व्यविश्तरपठी कर्गे.

Rajdhani DATE / / सारंश 19 ल्या कातकाच्या कोवटी कोवटी व 20 व्याकातकात समाजिक्षाक्तीय अहरायनात ज्या नवीन विचार्यना चालना मिळाली त्यामध्ये स्त्रीवादी विद्यारसरुठी याला महत्वाचे स्था प्राप्त झालेले पारायला मिळते. क्रीवादी अद्यांताची क्रियांचे अमाजातील स्थान, त्यांची पिळवन्नक व त्यांच्यावर होनारे अत्यान्यार इ. हिप्टिकोनातून ने विचार मांडले गेले ते स्रीवादी सिद्धात कर्णून ओळ्खले जाताल. क्रीवाद म्हणने लिंशमीद अुगारून स्री- पुरुष समानिकडे वाटचाल कर्गाश विचार प्रवाह सामान्यतः मरी इतीवाद ही पुरुषविशेषी चळवळ समजली जाते. त्यासूळ ही सियांचे ऐतिहासिक दुथ्यमत्व उनेडात आणून हे कोष संपवत्यासा प्रथल करते. ही एक सामाजिक, रामकीय जाविव आहे. क्रीवाद ही स्वेकल्पना जरी पारधात्य आयुनिक -तेत उपयास आली अशी सामान्य समजूत असली तरी ही जाहीव त्यापूर्वीही वेशवेशक्या कालखंडात उनाहि हिकाह आढळून आलेली दिसते. स्टगून्य एकच् सीवाद नसून अनेक सीवाद दिसून आले आहेल व येतात.

समूह प्रकल्प (Group Project)

अर्थशास्त्र विभाग दरवर्षी बी.ए भाग III (सत्र ६ साठी) च्या विद्यार्थ्यांसाठी समूह प्रकल्प उपक्रम आयोजित करतो. प्रत्येक ग्रुपमध्ये एक प्रकल्प करणे बंधनकारक केले.

समूह प्रकल्पाची उद्दीष्टे:

- १. स्वंयअध्ययनाची सवय लावणे.
- २. स्वक्वतीनुसार अध्ययनाची संधी देणे.
- 3. विद्यार्थ्यांमध्ये उपक्रमशीलता व आत्मविश्वास निर्माण करणे.
- ४. विद्यार्थ्यांच्या ज्ञानात्मक पातळीत बदल घडवून आणणे.
- ५. स्वत:मध्ये उपजत असणाऱ्या निरीक्षण, निवेदन,संकलन ,सादरीकरण इ.क्षमताच विकास घडवणे.
- ६. तर्कसंगत विचार करून अन्मान मांडणे.
- ७. कल्पकता,सर्जनशीलता संग्रहवृती ,श्रमप्रतिष्टा ,स्वयंशिस्त ,चिकाटी, वक्तशीरपणा,नीटनेटकेपणा,संघभावना इ.ग्णाचा विकास घडवणे.
- ८. विद्यार्थ्यांचा बौद्धिक व सामाजिक विकास करणे.
- ९. विद्यार्थ्यांच्या अभिरुचीचा शोध घेणे.
- १०. विद्यार्थांचा शैक्षणिक दर्जा स्धारणे.

समूह प्रकल्प फलित (Outcome)

अर्थशास्त्र विभाग दरवर्षी बी.ए भाग III (सत्र ६ साठी) च्या विद्यार्थ्यांसाठी समूह प्रकल्प उपक्रम आयोजित करतो. प्रत्येक ग्रुपमध्ये एक प्रकल्प करणे बंधनकारक केले. विद्यार्थ्यांच्या समूह प्रकल्पाम्ळे खालील फलित दिसून आले.

समूह प्रकल्पाची फलित : (Outcome)

- १. विद्यार्थ्यांना संशोधन पद्धती म्हणजे काय याची माहिती झाली.
- २. विद्यार्थ्यांच्या मधील संशोधन वृतीला चालना मिळाली.
- विद्यार्थ्यांना प्राथमिक आणि दुय्यम तथ्य संकलन कसे करावे याबाबत माहिती मिळाली.
- ४. संशोधनातून विद्यार्थ्यांमध्ये उपक्रमशीलता व आत्मविश्वास निर्माण झाला.
- ५. कल्पकता,सर्जनशीलता संग्रहवृती ,श्रमप्रतिष्टा ,स्वयंशिस्त ,चिकाटी, वक्तशीरपणा,नीटनेटकेपणा,संघभावना इ.गुणाचा विकास होण्यास मदत झाली.

६. विद्यार्थ्यांना तर्कसंगत विचार मांडण्याची सवय लागली.

🌞 कोल्हापूर चेथील वस्तुसंग्रहालय 💥

१) प्रास्ताविक :-

वस्तुसंग्रहालय हे टिकाण लैकिक अर्थाने भाषणबाजीने नाही, तर प्रकटीकरणाचे टिकाण आहे. वस्तुसंग्रहालयामधील व्यक्ती प्रत्यक्ष बोलण्यापेक्षा प्रकटीकरण व कृती वर भर देत आहे. याचा एवढाच अर्थ की, वस्तुसंग्रहालय हे टिकाण पाहण्याचे, येथील वास्तूंचा आनंद उपभोगण्याचे व आपल्या ज्ञानामध्ये भर टाकण्याचे टिकाण आहे. वस्तु संग्रहालयामध्ये वस्तूची मांडणी, वेगवेगळ्या, कोनांमधून वस्तू कशा चांगल्या प्रकारे प्रदर्शित करता येतील. याकडेच संग्रहालयाच्या अधिकारी वर्गाचे लक्ष असते. या वस्तू मांडण्याच्या प्रक्रियेशी पुरातत्वशास्त्र, विविध कला, मानववंशशास्त्र, नवनवीन भौतिक शास्त्रे यांचा जवळचा संबंध असतो. भारतीयाची अशी व्यिधा मनःस्थिती होण्याचे कारण म्हणजे आपण असे विचारतो. की हे शिकल्याने नोकरी मिळणार आहे काय.? म्हणजे जगातील महत्वाच्या बाबीसंबंधी आपण पैशाच्या भाषेत बालतो. वस्तुसंग्रहायासंबंधी सर्वसामान्य समाजाची भावना अतिशय गैर, चुकीच्या समजावर आधारित आहे. वस्तुसंग्रहालये ही फक्त ट्रिपला गेलेला असता पाहण्याचे टिकाण आहे. िकंवा लहान मुलाच्या मनोरंजनाचे ते टिकाण आहेत.

वस्तुसंग्रहालय हे ठिकाण संशोधन, शिक्षण राष्ट्रीय उदात्तीकरण व सांस्कृतिक वारसा यांचा अभ्यास करणारे ठिकाण आहे याची आपण जाणीव ठेवली पाहिजे.

Shri Vijay Sinha Yadav College, Pethyadgaon

Department of Chemistry

Student Centric Activity: **Project**

2020-21

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- Think positive to stay focused.
- Stay resilient.
- Make time to read.
- Manage your time.

PROJECT REPORT ON

"Pesticides In Fruits & Vegetables"

DEPARTMENT OF CHEMISTRY

AS PARTIAL FULFILLMENT OF THE DEGREE OF BATCHLER OF SCIENCE IN CHEMISTRY

SUBMITTED BY

Mr. Vibhute Amit Satish

UNDER THE GUIDANCE OF

Prof. Pawar R.A.

DEPARTMENT OF CHEMISTRY

YEAR

2020 - 2021

ACKNOWLEDGEMENT

I take this golden opportunity to express my heart full

thanks and deep sense of gratitude to Prof. Pawar R. A.,

Department of Chemistry. Shri Vijaysinha Yadav Arts & Science

College, Peth Vadgaon. Who has been a constant source of

encouragement to complete this project work and giving his

excellent guidance and suggestion from time to time during

course of this work.

I am also thanks to Prof. Pawar R. A, Head,

Department of Chemistry of the inspiration, motivation and

ever willing help.

Lastly, I would like to thanks all my friends and well

wishers for their good will to complete the project work.

Mr. Vibhute Amit Satish

Place: Peth Vadgaon.

Date:

20

DECLARATION

I undersigned, hereby declare that projection "Pesticides In fruits & Vegetables" developed under the guidance of Prof. Pawar R. A. The conclusion based on the data, which is collected by me. I declare that this is my original work.

I have not copied any material, which is useful to my work, which are submitted to Shri. Vijaysinha Yadav Arts & Science College, Peth Vadgaon in this year.

Yours Faithfully,

MR. Vibhute Amit Satish

Place: Peth Vadgaon.

PESTICIDES IN FRUITS AND VEGETABLES

INTRODUCTION

Insects are one of human being's modernization brought about gradual but fundamental changes in man's mode of living From a predatory (preying animals for food) life, man become a cultivator of crop cultivation propagated a new era of civilization of human race but of the same time it has upset the natural balance which always existed in primitive the plant communities untouched by man. Man upset the equilibrium of nature in other ways also. The congregation of human being's into the small areas of villages, town & cities improved the possibilities of social & increased the risk of parasitic insects & disease caused by it to spread in urban communities. The concentration of waste material favored the developed of many insect species. Rodents & other pests such condition increased the risk of epidemic diseases. Gradually man realized the serious threat of these pests & with their knowledge & experience sorted developing methods for pest control. The tremendous effort of man to control these harmful pests gave rise to "pesticides" the "super chemicals" used to control pests around the home as well as agriculture. Today pesticides have become on essential in gradients of our life & it becomes necessary for every conscientious citizen to know something about this valuable chemicals. The term prelacies are an all incisive but nondescript word meaning "killer of pests". The various generic words ending in "iced" (from the Latin-cider, to kill") are classes of pesticides such as insecticides. Fungicides herbicides etc. patricides are legally closed as "Economic poisons" & are defined as "any sibilance used for controlling, preventing, destroying repelling or mitigating any pest".

The world's main source of food is plant diseases caused by viruses. Bacteria, fungi, algae, rickettsias etc. approximately one third of the worlds food crop is destroyed by these pests during growth,

Department of Chemistry

Student Centric Activity: Project

2020-21

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.
- Patience and thinking ability increases.

Shri Shahu Shikshan Prasarak Seva Mandal's

Shri Vijaysinha Yadav College, Peth Vadgaon Department of Zoology

Student Centric Methods - 2020-21

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2020-21, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology, Butterfly photo competition under Wildlife week celebration, online poster presentation competition, guest lecture and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

Sr. No.	Name of activity	Date	Outcome
1	Seminars of the students	23 to 27 February 2021	Explanation methods, Referencing skill, Stage daring in the students,

Chapter I Introduction

Spiders are abundant and ecologically important in almost every terrestrial and Semi-terrestrial (wetland) habitat on Earth, from cold tundra and alpine ecosystems to tropical rainforests and deserts. Some species live on the shores of the ocean and some dive into ponds and streams in search of prey-members of one Eurasian spider family (Argyronetidae) even live underwater in silken "diving bells" which they fill with air brought from the surface clinging to their hairy abdomens. Spiders are found high up on Mount Everest, and some of the most northerly animals are spiders, as well (although there are no spider species indigenous to Antarctica, some undoubtedly share quarters with another "exotic" Antarctic inhabitant humans).

Because they are usually so abundant, spiders are among the most important predators in many ecosystems. Numbers often exceed 100 per square meter, which equates to 1 million spiders per hectare (Coleman and Crossley 1996). Although spiders are relatively small (body length from 1 mm to several cm), their combined weight often exceeds that of the larger, but more rare, vertebrates such as birds.

All spiders are predators, and because the main item in most spider diets is insects, humans benefit enormously from spiders. Spiders are important in controlling insect pests in most agricultural crops. By controlling insect population sizes, they keep most potential insect populations too small to be economically damaging, most of the time. But because spiders cannot reproduce as quickly as their insect prey, they cannot control an insect population once it has grown to "outbreak" proportions. For this reason, the importance of spiders to agriculture has generally been underestimated. After their spider enemies have

ACKNOWLEDGEMENT

We consider ourselves very fortunate to have worked under the inspiring guidance of Mr. R. H. Atigre, Assistant Professor and Head, Department of Zoology, Shri Vijaysinha Yadav arts and Science College, Peth vadgaon who introduced us to this modern area of research. He allowed us the freedom and independence to pursue our own research ideas. Without his intellectual contribution this project would have been impossible to complete. He shared advice and editorial comments freely; and his broad perspective on the field of animal behavior has enriched our education. His suggestions greatly improved our research, and his patience and understanding helped us through a busy last semester. Words are in adequate to express our thanks towards him.

We are greatly thankful to Mr. Sachin R. Patil, Assistant Zoologist, Zoological Survey of India, Western Regional Centre, Akurdi, and Pune for his consistent help in identification of Spider species. Without his intellectual contribution this project would have been impossible to complete.

We are also thankful to Dr. S. V. Maske, for his timely suggestions in present work.

We are also thankful to our principal, Dr. V. R. Chavan, for providing all the facilities to carry out this work.

when threatened (as when they are accidentally pressed between a glove they've been living in and a hand). Spiders do not "attack" humans.

Morphology:

Spider anatomy: (1) four pairs of legs (2) cephalothorax (3) abdomen. Spiders, unlike insects, have only two body segments instead of three: a fused and thorax (called a cephalothorax) and an abdomen. The exceptions to this rule are the assassin spiders, whose cephalothorax seems to be almost divided into two independent units. Except for a few species of very primitive spiders (family Liphistiidae), the abdomen is not externally segmented. The abdomen and cephalothorax are connected with a thin waist called the pedicle or the *pregenital somite*, a trait that allows the spider to move the abdomen in all directions. This waist is actually the last segment (somite) of the cephalothorax and is lost in most other members of the Arachnida (in scorpions it is only detectable in the embryos).

They have venomous fangs on their chelicerae, generally have 8 eyes (though some have 6 and a small number of species have fewer), have spinnerets, and do not have tails.

Taxonomy:

In the world there are 40,998 spiders species from 109 families and 3747 genera (The World Spider Catalog, Version 10.0 by Norman I, Platnick, 2009) India represented only 1520 species 60 families and 377 genera of spiders

Garden spiders belong to the family ARANEIDAE, a group of 2,500 different species of spiders that weave orb. Or circular, webs. Like most orb weavers, a garden spider typically sits upside down in the middle of the orb web, placing its eight feet on the threads radiating out from the center of the web. The feet act as sensors, picking up vibrations when prey enters the web. Nearly all spiders produce silk. Most of them use this

silk to create webs. These webs are varied in shape and construction. One of the most recognizable are orb webs, which consist of crossing strands meeting in the middle and continuous thread spiraling outward. There are also many other styles, such as cobwebs, which have a flat sheet of silk with a small funnel retreat where the spider waits for prey. Most spiders use their web to catch insects. Some spiders do not build webs to feed may still build silken retreats, in which they take shelter.

CHAPTER II Material and Methods

The easiest way to capture and collect spiders is to scare them into a dry container and then transfer them into a container with alcohol. The container can be placed in a freezer for a few minutes. In the freezer the spider will enter torpor and die relatively quick and may experience fewer traumas. Carbon dioxide gas can also be used to anesthetize spiders before collecting. The following are a basic methods used while collecting spiders.

1. Visual search :-

Walk through the habitat and search visually for spiders, their webs or retreats (curled leaves, silken cases) walls of houses, building and basement, which are spider haunting grounds.

2. Sweeping :-

Using a heavy insect net sweep through the soft vegetation or tall grass with vigor.

After a few sweeps, dump the content of the net onto a flat sheet and capture the spiders.

This is one of the best method for capturing active hunters such as jumping (salticidae), lynx nursery-web, and sac or ghost spider (oxyopidae, Lycodiae, clubionidae). Small web-building species are also frequently captured.

3. Beating :-

This method is similar to sweeping. In this case spread the cloth sheet or keep an open umbrella under a bush or the low branches of tree. Grab the branches and give them a vigorous shaking, alternatively strike them with a stick or stiff. Spiders will be dislodged from their location and fall on to the sheet/open umbrella.

Beating and sweeping technique do not work well in wet conditions. If there is heavy dew or if it has rained recently the net and the spiders will stick to the wet cloth and are often damaged or killed during the sweeping. Avoid sweeping and beating in such conditions.

4. Pitfall trapping :-

This method is effective for capturing ground-living spiders. Any smooth sided container buried within the ground surface will work. Some prefer to have a funnel at the top of the container. Inside the pit, place a second cup so that the contents can be removed without disturbing the edge of the pit. This edge is the crucial key to success. If a spider detects a lip or a ridge, it is likely to walk around rather than tumble into the trap. To avoid the problem of rain, place a cover over the pit. The smaller the gap between trap and lid will, reduce accidental captures of small vertebrates. Sometimes pits are left "dry" but normally filled with auto antifreeze in the pits. This will kill and preserve the captives with minimal evaporation. In either case the problem encountered are dry pits-small spiders will be killed or eaten by centipedes and other organisms. In wet pits the fluid may attract wildlife, which could be poisoned. Antifreeze is available in two forms: ethylene glycol-based and propylene glycol-based. Propylene glycol is preferred because it is but that toxic.

5. Litter Sampling:

With help of gloves, collect a large amount of leaf litter and place them over a large funnel that is fitted with hardware-cloth or wire screen. The funnel should be placed in a rack with the opening over a cup with alcohol. Suspend a bright light over the top of the leaf litter. Ensure bulb is at lest 3 inches away from the top of the litter but never let it touch the leaves. As the pile of leaves dries out the small organisms will migrate down and eventually fall through the funnel into the alcohol-filled cup.

The two tools that render the best result in the shortest amount of time are kick nets and sweep nets.

Materials Required:

Varieties of methods have been employed for collecting spiders. The method used depends upon the objectives of the study and ease of sampling in a given habitat. Before we venture in field for collection we need to keep in mind following important aspects of natural history studies required for any taxonomist.

Basic Items Required For Collection of Spiders:

- Collecting bottles of various sizes: For carrying live specimens of spiders collected during field study;
- II. Field notebook, pencil, and pen: For maintaining field notes on ecology and biology of spiders.
- III. Preservative: 70% ethyl alcohol for preservation of specimens
- IV. Aspirators: For collection of small to medium sized spider without damaging.
- V. Forceps: For general searching of habitat, webs and sifting of litter for spiders;
- VI. Brushes of various sizes: For picking of small spiders without damaging;
- VII. GPS machine: For locating co-ordinates of study sites;
- VIII. Camera: For recording images of specimens in life and habitat associations;
- IX. Collecting Bag(s): For keeping collecting specimens;
- Sweeping Net(s): For sweeping of grass and small bushes for spiders;

- XI. Umbrella and White Cloth Sheet: For collecting spider by beating and shaking of trees;
- XII. Measuring tapes and scale: For recording quadrate size and for measurements related to web(s);
- XIII. Field Guide to Indian spiders: For preliminary identification and documentation of spiders.
- XIV. Calculator: For basic calculations pertaining to conversions;
- XV. Nylon Twine: For measuring and marking the quadrate for field-survey;
- XVI. Data Sheet: For recording the details regarding habitat, spider species, their numbers, species associations etc.
- XVII. Labels: For putting name, date, location, site description on the bottles and bags.

I) Labeling and Accessioning of Spiders Specimens

Labeling: Great care should be taken to accurately label all specimens as specimens without labels are of no scientific value and incorrect labels can lead to wrong interpretations and wrong identification at taxonomic levels. Bottles / jars used for processing of collected samples from field must also labels, so that collecting data is retained for future reference.

A specimen label should mention:

- i. Location / site information. With name of country, state, city, map coordinates
- ii. Date of collection
- iii. Name(s) of collector(s): Conveniently two names
- iv. Habitat data / host plant name

CERTIFICATE

This is to certify that the project report entitled "STUDY OF SOME SPIDERS FROM PETH VADGAON & ADJACENT AREA" submitted to the Shivaji University, Kolhapur, in partial fulfillment of the requirements for the award of the Degree of Bachelor of Science in Zoology, is a record of original research work done by Miss. Mali Anjali Ravi and Miss. Maner Samina Hai under our supervision and guidance and the project report has not formed the basis for the award of any Degree / Diploma / Associate ship / Fellowship or other similar title to any candidate of any University.

2

The current world list of spiders includes nearly 40,462 species in over 3694 genera in 109 families (Platnick, 2008; Version 9.0). Historically, arachnological studies in India dates back to 19th century with taxonomists such as Blackwell (1864, 1867), Stoliczka (1869), Thorell (1877), Simon (1897), Cambridge (1892, 1897), Simon (1897a), Pocock (1895, 1899a, b, 1901), Gravely (1922) and Sherriffs (1919, 1927, 1928, 1929,1951), Narayan (1915). The first spider speciemen sphasus lepidus, form India was described by Blackwell in 1864 [= Oxyopes lepidus (Blackwell, 1864)]. Some recent workers on spiders include Majumdar and Tikader (1991), Reddy and Patel (1992), Biswas and Biswas (1992), Biswas and Majumdar (1995), sadana and Goel (1995), Biswas and Biswas (1996), Biswas et al. (1996), Single and Sadana (2000), Biswas and Majumdar (2000), Patel and Vyas (2001), Patel (2003a), Patel (2003b), Biswas and Biswas(2003). General Series on fauna published by Gazetteer of India, Maharashtra State, records a total of 90 species of spiders belonging to 14 families (Tikader, 1974). Very few reports are available on in silico analysis of antigenic determinant properties of spider venoms responsible for allegenicity or hypersensitivity.

CHAPTER III OBSERVATIONS AND RESULTS

1. Plexippus paykulli

Classification : -

Kingdom : Animalia

Phylum : Arthropoda

Class : Arachnida

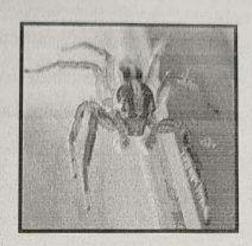

Order : Araneae

Family ; Salticidae

Subfamily : Plexippinae

Genus : Plexippus

Species : P. paykulli

Plexippus paykulli is a jumping spider in the family Salticidae. It is native to south east Asia but has spread to other parts of the world. In the United States it is called the pantropical jumping spider. It is usually associated with buildings and may be found near light sources catching insects attracted by the light.

Distribution

Plexippus paykulli is cosmopolitan in distribution. It has been reported from tropical regions of Africa and Asia. In the American continent it was introduced to Florida and also occurs in Texas, extending as far south as Paraguay.

been killed by the same insecticides, the few surviving insect pests are often able to reproduce and attain larger population sizes than before the insecticide was applied, a phenomenon known as "resurgence".

Spiders also eat many insects that bother humans, such as mosquitoes and cockroaches. Since a single spider may eat many mosquitoes in one day, over the course of its lifetime a spider may prevent hundreds of mosquito offspring. Similarly, a spider in your house "pay rent" by ridding the premises of many cockroaches or other insects. With fewer spiders, the world would be a much "buggier" place.

Additionally, spiders are an important food source for birds, lizards, wasps and other animals. Ground-dwelling spiders may be important in transferring energy directly from the below-ground detritus food web to the above-ground terrestrial food webs of familiar birds, reptiles, amphibians, and mammals (Johnston, 2000). Spiders are an important source of food for many birds, especially in the winter (Peterson et al. 1989; Hogstad, 1984 in skirl 1997). Spider silk is important to bird species for nest building; 24 of 42 families of passerine birds and nearly all species of hummingbird depend on silk from spiders and caterpillars for construction (Hansel 1993, in Skerl 1997).

Many people fear spiders, but actually the majority of spiders are too small to bite humans. Any spider smaller than about 8 mm, or one-quarter inch, in body length cannot break human skin with their tiny fangs, and most spider species are smaller than this. Of those spiders large enough to bite humans, only black widows (*Latrodectus species*) and the brown recluse spider (*Loxosceles reclusa*) have potentially dangerous bites, and these are much more abundant in regions farther south. Spiders only bite humans as a last resort

Hymenoptera, Lepidoptera, Odonata, Orthoptera and Aranea, In one study, these spiders hunted and consumed individuals of sixteen species of arthropods from fourteen families and six orders. They are reported as being a predator of mosquitoes in African houses, and of insect pests in India and Bangladesh. They are highly agile and can cover many times their own body length in a single jump. In a building where the only available prey were German cockroaches, *Blattella germanica*, the spiders not only survived but also bred on this monophagous diet. They are able to successfully kill prey twice their own size, Large arthropods are injected with venom but are usually overpowered by brute strength before the venom has immobilized them. There have been records of the prey flying, jumping or running away with the spider clinging to it until the victim was eventually overpowered. A study investigated the way in which these spiders stalked their prey. It was found that a mobile prey like a fly was stalked in a different manner to an immobile one such as a maggot. On a camouflaged background, the spider approached with greater stealth and jumped from a shorter distance to attack a mobile prey. This gave the spider a greater likelihood of a successful outcome without prior detection.

2. Pholeus phalangioides

Classification: -

Kingdom : Animalia

Phylum : Arthropoda

Class : Arachnida

Order : Araneae

Suborder : Araneomorphae

Family : Pholeidae

Genus : Pholeus

Species : P. phalangioides

Distribution

Originally a species restricted to warmer parts of the west Palearetic, through the help of humans this synanthrope now occurs throughout a large part of the world. It is unable to survive in cold weather, and consequently it is restricted to (heated) houses in some parts of its range.

Morphology

The cellar spider or daddy long-legs spider (Pholeus phalangioides), also known as the skull spider due to its cephalothorax looking like a human skull, is a spider of the family Pholeidae. Females have a body length of about 9 mm; males are slightly smaller. Its legs are about 5 or 6 times the length of its body (reaching up to 7 cm of leg span in females). Its habit of living on the ceilings of rooms, caves, garages or cellars gives rise to

one of its common names. They are considered beneficial in some parts of the world because they kill and cat other spiders, including species that are venomous to humans such as hobo and redback spiders.

This is the only spider species described by the Swiss entomologist Johann Kaspar Füssli who first recorded it for science in 1775. Confusion often arises over its common name, because "daddy long-legs" is also applied to two other unrelated arthropods; the harvestman and the crane fly.

Behaviors

Pholeus phalangioides is not considered aggressive, its first line of defense being to shake its web violently when disturbed as a mechanism against predators. It can easily catch and eat other spiders (even those much larger than itself, such as Tegenaria duellica); mosquitoes and other insects, and woodlice. When food is scarce, it will prey on its own kind. Rough handling will cause some of its legs to become detached.

Because they originally came from the subtropies, these spiders do not appear to be influenced by seasonal changes and breed at any time of the year. The female holds the 20 to 30 eggs in her pedipalps. Spiderlings are transparent with short legs and change their skin about 5 or 6 times as they mature.

Venom

An urban legend states that Pholoidac are the most venomous spiders in the world, but this claim has been proven untrue. Recent research has shown that pholoid venom has a relatively weak effect on insects.⁽⁴⁾ In the *MythBusters* episode "Daddy Long-Legs" it was shown that the spider's fangs (0.25 mm) could penetrate human skin (0.1 mm) but that only a very mild burning feeling was felt for a few seconds,⁽⁵⁾

3. Heteropoda Venatoria

Classification :-

Kingdom : Animalia

Phylum : Arthropoda

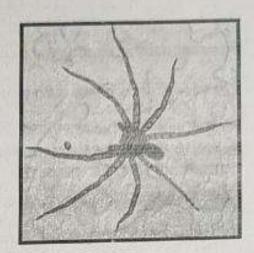

Class : Arachnida

Order : Araneae

Family : Sparassidae

Genus : Heteropoda

Species : H. venatoria

Distribution

Heteropoda venatoria is a species of spider in the family Sparassidae, the huntsman spiders. It is native to the tropical regions of the world, and it is present in some subtropical areas as an introduced species. Its common names include giant crab spider and cane spider

Morphology

The adult has a flat, brown body 2 to 2.5 cm long. This spider is 3 to 4 inches wide, including the legs. The female may be slightly larger than the male, particularly in the abdomen, but the male has longer legs and larger tips on its pedipalps. The clypeus, the area just behind the eyes, is cream or yellowish, and the carapace behind this has a wide band which is usually tan in the female and cream in the male. The body is not very hairy, but the legs have erectile setae, each of which is marked with a black dot

Biology

The female produces an egg sac up to about 2.5 centimeters wide and carries it with its pedipalps under its body. Egg sacs are variable in size, usually containing over 100 eggs, with larger ones holding over 400. The spiderlings undergo their first molt while still in the sac. In one small laboratory sample, the life span of the male averaged 465 days, and that of the female was 580 days.

The spider feeds on insects, capturing them directly instead of spinning webs. It injects them with venom. The venom of this spider contains the toxin HpTX2, a potassium channel blocker. In some tropical areas the spider is considered a useful resident of households because of its efficient consumption of pest insects. It commonly lives in houses and other structures such as barns and sheds, especially in areas that experience cold temperatures. It is sensitive to cold and can live outdoors only in warmer climates. Besides insects it has been known to prey on scorpions and bats.

As part of its courtship behavior, the male produces a sound by vibrating its long legs while keeping its feet firmly planted. This is faintly audible to humans as a "buzz" or "hum". The spider is not considered dangerous, but it does deliver enough venom to give a painful bite.

4. Neoscona Mukerjei

Classification :-

Kingdom

: Animalia

Phylum

: Arthropoda

Class

: Arachnida

Order

: Araneae

Family

: Araneidae

Genus

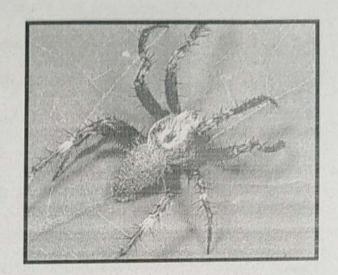

: Neoscona

Species

: N. mukerjei

Morphology

Epigastric furrow nearly straight. Boss conspicuously present on chelicerae in most, though rudimentary in some. Femora without trichobothria, or if present then femur IV provided with a double fringe of hairs on the prolateral surface; Epigyne often with scape:

- v. An accession number corresponding with number in an accession system / field book
- vi. Scientific name: Type specimens / holotype / Paratype etc.

Accessioning:

Accessioning is a permanent method of recording of specimen or sample data by assigning a unique number. It serves as an inventory and accessioning makes data retrieval and cross-referencing easier. The information is usually recorded in as accession book or computer programs.

II) Storage and Curation of Spider Specimens:

The specimens collected from a study site carry immense value for being recorded as part of biodiversity, for taxonomic and applied research, their potential role in food web etc. The long term care of spider specimens involves putting them in a glass vials with tight fitting stoppers. Specimen bottles should be kept in racks in a cabinet with proper support so that the bottles remain in upright position. Regular checking of preservative is required. Specimens are grouped or arranged according to identification and usually specimens belonging to same family, genus and species are kept together for easy reference. Unidentified specimens should be consulted to experts for accurate identification upto genus and species level.

Brief Review of Literature on Indian Spiders:

The first comprehensive list of Indian spiders with 1067 species belonging to 249 genera in 43 families was published by Tikader (1987). A recent on the checklist of Indian spiders based on *The World Spider Catalog* (Platnick, 2006: Version 8:0), reports 1447 species of spiders under 365 genera from 60 families from India (Siliwal et al., 2007).

6. Nephila pilipes

Classification :-

Kingdom :

: Animalia

Phylum

: Arthropoda

Class

: Arachnida

Order

: Araneae

Suborder

: Araneomorphae

Family

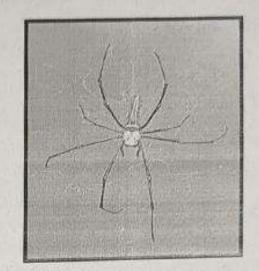

: Nephilidae

Genus

: Nephila

Species

: N. pilipes

The Northern Golden Orb Weaver or Giant Golden Orb Weaver (Nephila pilipes) is a species of golden orb-web spider. It can be found in Japan, China, Vietnam, Cambodia, Taiwan, Malaysia, Singapore, Myanmar, Indonesia, Thailand, Laos, Philippines, Sri Lanka, India, and Papua New Guinea. It is commonly found in primary and secondary forests and gardens. Females are large and grow to a body size of 30–50 mm (overall size up to 20 cm), with males growing to 5–6 mm. It is one of the biggest spiders in the world.

The Nephila pilipes' golden web is vertical with a fine irregular mesh and not symmetrical, with the hub usually nearer the top Rather than egg sacks being hung in the web, a pit is dug which is then covered with plant debris or soil.

The first, second and fourth pairs of legs of juvenile females have dense hairy brushes, but as the spider matures these brushes disappear.

7. Lycosa

Classification :-

Kingdom

: Animalia

Phylum

: Arthropoda

Class

: Arachnida

Order

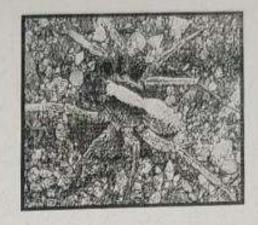

: Arancae

Suborder

: Arancomorphae

Family

: Lycosidae

Lycosa is a genus of wolf spiders. More than 200 species are found, represented throughout most of the world. Often (incorrectly) called the "true tarantula", Lycosa can be distinguished from common wolf spiders by their relatively large size. This genus includes the European Lycosa tarantula which was once associated with tarantism, a dubious affliction whose symptoms included shaking, cold sweats, and a high fever, asserted to be curable only by the traditional tarantella dance. There is no scientific substantiation of that myth. In fact, the venom of wolf spiders is much less harmful to humans than, e.g., that of the European widow spider of the Theridiidae family.

Chapter IV Results and discussion

We collected 21 specimens of Spiders from Peth Vadgaon which are identified with the help of Mr. Sachin R. Patil, Assistant Zoologist, Zoological Survey of India, Western Regional Centre, Akurdi, Pune. There are 12 different specimens identified out of which 06 are identified up to Species level, 03 are identified up to genus level and 03 are identified up to family level. Out of all these 03 specimens belong to family Aranaeidae, 02 specimens belong to families Pholeidae, Sparassidae and Miturgidae each while families Salticidae, Nephilidae and Lycosidae represents 01 specimen each. *Plexipus pykulli* and *Pholeus phalangiodes* are seems to be abundant in Peth Vadgaon as they are collected in large number.

5. Argiope pulchella

Classification :-

Kingdom : Animalia

Phylum : Arthropoda

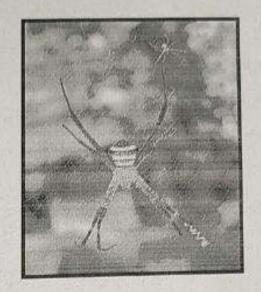

Class : : Arachnida

Order : Araneae

Family : Araneidae

Genus : Argiope

Species : A. pulchella

Argiope pulchella is a species of Orb Spider belonging to the family Araneidae. It ranges from India to China and can be found on Java. It builds a web with a zig-zag stabilimentum. This species has a pentagonal opisthosoma (abdomen).

Morphology

Spiders in this species are robust, with a high carapace, and are covered with short grayish bairs. They are about ten millimeters long, the female being slightly larger than the male. The sexes are easy to tell apart as the males have a black carapace and abdomen with a broad white central stripe, another broad white stripe on either side or a pair of white spots near the posterior end of the abdomen. The stripe continues between the anterior eyes so that the face appears to have three white stripes on a black background. The female is brownish grey, the carapace being darker especially around the eyes, with a broad tan stripe that extends onto the abdomen where it breaks into two chevrons. There are two white spots on either side of the posterior end of the abdomen. Immature spiders resemble the females.

Biology

Plexippus paykulli is generally found living in and around man-made structures, in particular inside buildings, although it has also been recorded from citrus groves and cotton fields. The female creates an egg sac about three centimeters in diameter in a concealed location under floorboards, in a crack or under the eaves. In this a lens-shaped silken case is made into which 35 to 60 eggs are deposited. The female guards these until the spiderlings emerge and disperse some three to four weeks later.

This spider does not spin a web but builds a silken retreat in an elevated position such as the edge of the ceiling from which it makes hunting forays. It has very acute eyesight and approaches its target prey stealthily, leaping on it when close enough to do so. Prey species that have been recorded as being part of the diet include Diptera. Hemiptera,

Objectives __

- 1] To study 20th century British Poets.
- 2] To study the features of 20th century modern English poetry.
- 3] To take review of an important issues and themes of 20th century modern poetry.
- 4] To find the similarities and differences of approaches.
- 5] To evaluate critically the poets of 20th century.

W. B. Yeats

William Butler Yeats— 13 June 1865 – 28 January 1939) was an Irish poet writing in English and one of the foremost figures of 20th-century literature. A pillar of the Irish literary establishment, he helped to found the Abbey Theatre, and in his later years served two terms as a Senator of the Irish Free State. He was a driving force behind the Irish Literary Revival along with Lady Gregory, Edward Martyn and others.

Yeats was born in Sandymount, Ireland and educated there and in London. He spent childhood holidays in County Sligo and studied poetry from an early age when he became fascinated by Irish legends and the occult. These topics feature in the first phase of his work, which lasted roughly until the turn of the 20th century. His earliest volume of verse was published in 1889, and its slow-paced and lyrical poems display debts to Edmund Spenser, Percy Bysshe Shelley, and the poets of the Pre-Raphaelite Brotherhood. From 1900, his poetry grew more physical and realistic. He largely renounced the transcendental beliefs of his youth, though he remained preoccupied with physical and spiritual masks, as well as with cyclical theories of life. In 1923, he was awarded the Nobel Prize in Literatur

Style

Yeats is considered one of the key twentieth century English language poets. He was a <u>Symbolist</u> poet, using allusive imagery and symbolic structures throughout his career. He chose words and assembled them so that, in addition to a particular meaning, they suggest abstract thoughts that may seem more significant and resonant. His use of symbols is usually something physical that is both itself and a suggestion of other, perhaps immaterial, timeless qualities.

Unlike other <u>modernists</u> who experimented with <u>free verse</u>, Yeats was a master of the traditional forms. The impact of modernism on his work can be seen in the increasing abandonment of the more conventionally poetic diction of his early work in favour of the more austere language and more direct approach to his themes that increasingly characterises the poetry and plays of his middle period, comprising the volumes *In the Seven Woods*, *Responsibilities* and *The Green Helmet*. His later poetry and plays are written in a more personal vein, and the works written in the last twenty years of his life include mention of his son and daughter, as well as meditations on the experience of growing old. In his poem, "The Circus Animals' Desertion", he describes the inspiration for these late works:

Now that my ladder's gone
I must lie down where all the ladders start
In the foul rag and bone shop of the heart.

During 1929, he stayed at <u>Thoor Ballylee</u> near <u>Gort in County Galway</u> (where Yeats had his summer home since 1919) for the last time. Much of the remainder of his life was lived outside Ireland, although he did lease <u>Riversdale</u> house in the Dublin suburb of <u>Rathfarnham</u> in 1932. He wrote prolifically through his final years, and published poetry, plays, and prose. In 1938, he attended the Abbey for the final time to see the premiere of his play <u>Purgatory</u>. His <u>Autobiographies of William Butler Yeats</u> was published that same year In 1913, Yeats wrote the preface for the English translation of <u>Rabindranath Tagore's</u> <u>Gitanjali (Song Offering)</u> for which Tagore received Nobel Prize in literature.

While Yeats's early poetry drew heavily on <u>Irish myth and folklore</u>, his later work was engaged with more contemporary issues, and his style underwent a dramatic transformation. His work can be divided into three general periods. The early poems are lushly pre-Raphaelite in tone, self-consciously ornate, and, at times, according to unsympathetic critics, stilted. Yeats began by writing epic poems such as *The Isle of Statues* and *The Wanderings of Oisin*. His other early

poems are lyrics on the themes of love or mystical and esoteric subjects. Yeats's middle period saw him abandon the pre-Raphaelite character of his early wor and attempt to turn himself into a <u>Landor</u>-style social ironist.

Critics who admire his middle work might characterize it as supple and muscular in its rhythms and sometimes harshly modernist, while others find these poems barren and weak in imaginative power. Yeats's later work found new imaginative inspiration in the mystical system he began to work out for himself under the influence of spiritualism. In many ways, this poetry is a return to the vision of his earlier work. The opposition between the worldly-minded man of the sword and the spiritually minded man of God, the theme of *The Wanderings of Oisin*, is reproduced in *A Dialogue Between Self and Soul*.

Some critics claim that Yeats spanned the transition from the nineteenth century into twentieth-century modernism in poetry much as <u>Pablo Picasso</u> did in painting while others question whether late Yeats has much in common with modernists of the <u>Ezra Pound</u> and <u>T. S. Eliot</u> variety.

Modernists read the well-known poem "The Second Coming" as a dirge for the decline of European civilisation, but it also expresses Yeats's apocalyptic mystical theories and is shaped by the 1890s. His most important collections of poetry started with The Green Helmet (1910) and Responsibilities (1914). In imagery, Yeats's poetry became sparer and more powerful as he grew older. The Tower (1928), The Winding Stair (1933), and New Poems (1938) contained some of the most potent images in twentieth-century poetry. Yeats's mystical inclinations, informed by Hinduism, theosophical beliefs and the occult, provided much of the basis of his late poetry, which some critics have judged as lacking in intellectual credibility. The metaphysics of Yeats's late works must be read in relation to his system of esoteric fundamentals in A Vision.

Nobel Prize

In December 1923, Yeats was awarded the Nobel Prize in Literature, "for his always inspired poetry, which in a highly artistic form gives expression to the spirit of a whole nation". He was aware of the symbolic value of an Irish winner so soon after Ireland had gained independence, and sought to highlight the fact at each available opportunity. His reply to many of the letters of congratulations sent to him contained the words: "I consider that this honour has come to me less as an individual than as a representative of Irish literature, it is part of Europe's welcome to the Free State."

Yeats used the occasion of his acceptance lecture at the <u>Royal Academy of Sweden</u> to present himself as a standard-bearer of Irish nationalism and Irish cultural independence. As he remarked, "The theatres of Dublin were empty buildings hired by the English travelling companies, and we wanted Irish plays and Irish players. When we thought of these plays we thought of everything that was romantic and poetical because the nationalism we had called up—the nationalism every generation had called up in moments of discouragement—was romantic and poetical."The prize led to a significant increase in the sales of his books, as his publishers <u>Macmillan</u> sought to capitalise on the publicity. For the first time he had money, and he was able to repay not only his own debts but those of his father.

प्रस्तावना :

भारत स्वतंत्र झाला तेव्हा आंतरराष्ट्रीय राजकारणात अमेरिका आणि सोव्हिएट रिशया यांच्या नेतृत्वाखाली लष्करी कराराने एकमेकांशी बध्द असलेल्या राष्ट्रांचे दोन प्रबळ गट निर्माण झाले होते. अमेरिकेच्या नेतृत्वाखालील भांडवलशाही राष्ट्रांचा गट आणि सोव्हिएट रिशयाच्या नेतृत्वाखालील साम्यवादी राष्ट्रांचा गट यांच्यात महायुध्द समाप्तीनंतर शीतयुध्द सुरू झाले होते. शीतयुध्दाची व्याप्ती झपाटयाने वाढत होती. त्यामुळे जागतिक शांततेला धोका निर्माण होण्याची सतत भीती वाटत होती. नुकत्याच स्वतंत्र झालेल्या भारताला स्वतःची प्रगती घडवून आणण्यासाठी शांतता आणि स्थैर्य यांची नितांत गरज होती. भारताला रिशया पुरस्कृत 'कॉमिन्फॉर्म' (ब्वउपदिवतउ) किंवा अमेरिकेचा 'आयसेनहावर सिध्दांत' यात स्वारस्य नव्हते. बडया राष्ट्रांनी दुबळया राष्ट्रांवर वर्चस्व गाजविण्याच्या भूमिकेचा भारताला तिटकारा आहे. अशा राष्ट्रांच्या अंतर्गत कारभारात बडया सत्तांचा हस्तक्षेप होऊ नये, या धोरणाचा भारताने पुरस्कार केला.

इथे मात्र आपण भारत—अमेरिका संबंधाचा अभ्यास करणार आहोत. भारत व अमेरिका यांच्यात भौगोलिकदृष्ट्या हजारो मैलांचे अंतर आहे. वंश, संस्कृती, समाजपद्धती, जीवनमूल्ये इत्यादींबाबतीत दोन्ही देशांत सामर्थ्य नाही. समाजवादाच्या प्रसाराला व विस्ताराला आळा घालण्याचे उद्दिष्ट डोळ्यांसमोर ठेऊन भांडवलशाही राष्ट्रगटाने आहे. साम्राज्यवाद आणि वसाहतवाद यांच्या वर्चस्वाखाली पिळवून निघालेले, रथैर्य व विकासाकरता धडपडणारे व तटस्थतेच्या घोरणाचा पुरस्कार करणारे भारत हे आशियातील सर्वात माठे लोकशाही राष्ट्र आहे.

Shri Vijay Sinha Yadav College, Pethvadgaon

Department of Chemistry

Student Centric Activity: Project

2019-20

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance of the project team's operations towards achieving all the agreed upon goals within the set scope, time, quality and budget standards.
- Think positive to stay focused.
- Stay resilient.
- Make time to read.
- Manage your time.

ACKNOWLEDGEMENT

I take this golden opportunity to express my heartful thanks and

deep sense of gratitude to Miss. T. D. Asagaonkar Department of

Chemistry. Shri Vijaysinha Yadav Arts & Science College, Peth Vadgaon.

Who has been a constant source of encouragement to complete this project

work and giving his excellent guidance and suggestion from time to time

during course of this work.

I am also thanks to Prof. Pawar R. A. of the inspiration and ever

willing help.

Lastly, I would like to thanks all my friends and well wishers for their

good will to complete the project work.

CHAPTER-I INTRODUCTION

Fermentation:

Fermentation is a metabolic process that produces Chemical Changes in organic substrates through the action of enzymes, In biochemistry, it is narrowly defined as the extraction of energy from carbohydrates in the absence of oxygen. In the content of food production, it may more broadly refer to any process in which the activity of microorganisms brings about a desirable change to a foodstuff or beverage the science of fermentation is known as Zymology.

In microorganisms, fermentation is the primary means of producing ATP by the degradation of organic nutrients an aerobically. Humans have used fermentation to produce foodstuffs & beverages since the Neolithic age for example fermentation is used for preservation in a process that produce lactic acid found in such sour foods as pickled cucumbers. Kimchi and yogurt as well as for producing alcoholic beverages such as wine and beer fermentation occurs within the gastrointestinal tracts of all animals, including humans.

Below are some definitions of fermentation. They range from informal, general usages to more scientific definitions.

- 1. Preservation methods for food via microorganisms (general use).
- Any process that produces alcoholic beverages or acidic dairy products (general use).
- 3. Any large-scale microbial process occurring with or without air (common definition used in industry).
- Any energy-releasing metabolic process that takes place only under anaerobic conditions (becoming more scientific).
- Any metabolic process that releases energy from a sugar or other organic
 molecule, does not require oxygen or an electron transport system, and uses an
 organic molecule as the final electron acceptor (most scientific).

Department of Chemistry

Student Centric Activity: Project

2019-20

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- · Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.

Patience and thinking ability increases.

Student Centric Methods - 2019-20

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2019-20, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology, wildlife photography competition under Wildlife week celebration, guest lecture and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

ACKNOWLEDGEMENT

We consider ourselves very fortunate to have worked under the inspiring guidance of Smt. Dr. Pawar A.S. Assistant Professor, Department of Zoology, Shri Vijaysinha Yadav arts and Science College, Peth vadgaon who introduced us to this modern area of research. He allowed us the freedom and independence to pursue our own research ideas. Without his intellectual contribution this project would have been impossible to complete. He shared advice and editorial comments freely; and his broad perspective on the field of animal behavior has enriched our education. His suggestions greatly improved our research, and his patience and understanding helped us through a busy last semester. Words are in adequate to express our thanks towards him.

We are also thankful to our principal **Dr. Chavan. V. R.** Madam and **Dr. Atigre**R. H., Head of the department for providing all the facilities to carry out this work.

I am also thankful to Dr. S.V. Maske, Mr. K. A. Madane, Mr. J. A. Daunde, Mrs. T. R. Thorvat, Mrs. A. A. Patil, Mrs. P. R. Pardeshi. & Mr. S. R. Sawant for their support and guidance in the completion of the project. I am also thankful to Shri Anil Ghabak Lab. Attendant Shri Ranjit Yadav and Shri Shrinivas Rongate, Lab. Assistant for their all time help during the completion of the project.

We owe deep sense of gratitude to our parents for their constant encouragement tenure of this study.

Our whole hearted thanks are also due to all those who have directly or indirectly contributed to the successful completion of this work.

Miss. Gawade Manisha Sanjay. Miss. Patil Poonam Sampat.

5	Bibliography	15

Chapter I - Introduction

Water is said as liquid of life and it is the essence of all living processes. Water is universal solvent as it dissolves more substances than any other liquid without undergoing any chemical change. Thus water; the unique component of nature has played an important role in the life from molecules to man, hence since the time unmemorable the great human civilization has originated evolved and flourished around water resources. Water covers about 70% of the earth's surface but only 2.7% of the total water is fresh water, of which 1% is ice free water in the rivers, lakes, and atmosphere and as biological water. It has been estimated that only 0.00192% of the total water on the earth is available for human consumption Trivedi (1998).

Numerous anthropogenic activities like disposal of sewage & industrial water, recreational activities, excesses fertilization of lands and use of pesticides have threatened environment health of both surface and ground water. In addition to this, due to the uneven distribution of fresh water on earth, due to development thrust of man and due to difference in the per capita availability of water, the water has become scarce natural resources and national wealth. Water pollution now a day is considered not only in terms of publics' health but also in terms of its conservation, aesthetics and preservation of natural beauty and resources. Water pollution has however threatened to reduce the quantity available in ponds, lakes, rivers and reservoirs due to disposal of sewage, industrial waste and due to other human activities (Trivedy and Chandrasekhar, 1999). Population explosion, industrialization, urbanization and development thrust of man have created these problems of water pollution. According to different surveys, 70 to 80 percent of the Indian water sources are polluted and different enteric diseases affect millions of the people every year. United Nations Organization report has

I

indicated that mortality of world population lack reliable sources of drinking water. Hence, now-a-day raw water from the water body is being analyzed for its utility like drinking, aquaculture, industrial and irrigation purpose.

India has rich fresh water resources in the form of rivers, lakes and rivulets. From all the resources in India, the total available fresh water is estimated to be 1900 billion cubic meters per year. About 80 % of this water is lost as surface run-off. The surface flow represents 97% of the available water. The water-spread area of reservoirs and tanks is about 3 million hectares; where as lakes and ponds of India measures more than 1.5 million hectares. In India there are about 1,17000 small and large natural and manmade fresh water bodies. (Ann. India, 1983). Every year there is an addition in the total water supply tanks, city water supply tanks, irrigation tanks, flood control reservoirs etc. Shrivastava et. al (1983) and Jain (1948) reported the approximate estimate of cultural water spread area as 2.3 million hectares in India.

00000

Drinking water quality standards describes the quality parameters set for drinking water. Despite the truism that every human on this planet needs drinking water to survive and that water may contain many harmful constituents, there are no universally recognized and accepted international standards for drinking water. Even where standards do exist, and are applied, the permitted concentration of individual constituents may vary by as much as ten times from one set of standards to another.

Following table shows the standard values of parameters for quality of drinking water.

Physico-chemical parameters	Standard value for drinking water (by WHO)
l'emperature	25° C
pH	6.5-8.5
Total Dissolved Solids (T.D.S.)	500(extended upto 2000)
Dissolved Oxygen (D.O.)	7-11 mg/lit
Total alkalinity (as CaCO3)	200 (extended up to 600)
Conductivity	0.05-0.5 X10 ⁻³ micromhos/cm
Total Hardness	300 (extended up to 600)
Biological Oxygen Demand (B.O.D.)	350 mg/lit

Chapter II - Material and Method

Materials: - We selected three water resources for testing the quality of drinking used in Peth Vadgaon.

Methodology: - Following parameters are tested by using the methodology given against them by APHA

- Temperature Temperature of the water was determined on site during sampling by inserting thermometer (0-100°c) in the water.
- ii. PH- PH was measured with the help of field ph-meter Hanno model champ.
- iii. Total Dissolved Solids- Presence of total dissolved solids in the sample water was estimated by evaporation dish at 103°c. The amount of total dissolved solid was calculated by determining residue. The calculation was carried out by using following formula –

Total Dissolved solids (mg/lit.) =
$$\frac{\text{Wt. of residue } X \text{ 1000}}{\text{ml. of Sample}}$$

- iv. Conductivity- Conductivity was measured by conductometre.
- v. Dissolved oxygen (D.O.) The dissolved oxygen was determined by Azide modification of Winkler's Idometric method (APHA 1989). The sample was collected in 300ml capacity glass stoppered bottles (B.O.D. bottles) without any bubbling. Then 2ml of each saturated manganous sulphate & alkaline iodide Azide solution were added. The precipitate was dissolved by adding 2ml of conc. H₂So₄ in sample water and the liberated iodine was titrated against standard Sodium Thiosulphate (0.025N) solution using starch as an indicator. The end point is dark blue to colorless. The calculation was carried out with the help of following formula.

D.O(mg/lit) =
$$\frac{0.1 \text{ X ml. Titrant X } 1000}{100}$$

vi. Alkalinity - It was measured by titrating the sample with 0.1 N H₂SO₄ using methyl orange as an indicator. The alkalinity was calculated by following formula-

Total alkanity (as
$$CaCO_3$$
) =
$$\frac{ml \text{ of acid required X normality X 1000}}{ml \text{ of sample}}$$

vii. Hardness - Hardness of water was determined by EDTA method as described in APHA (1989). The pH of the sample was increased to 10 with the help of ammonium buffer solution. Erichrome Black T indicator was added in this alkaline water sample, which forms a wine red complex of calcium and magnesium. The solution was titrated with std. EDTA solution. The EDTA breaks the complex and forms blue colored company. The end point was permanent blue color. The amount of EDTA solution required was noted. The hardness of water sample was calculated by using following formula.

Hardness (as CaCO₃mg/ltr) =
$$\frac{\text{ml of ETDA } \times 1000}{\text{ml of sample}}$$

viii. Biological Oxygen Demand (BOD) - B.O.D. of water sample was determined by the methods described in APHA (1989). Four sample bottles were prepared as, two bottles containing diluted sample and remaining two containing dilution water (Blank). On first day Dissolved Oxygen was determined from one sample bottle & one blank bottle by Winkler's Azide method (APHA, 1989). The remaining bottles were incubated at 20°C for five days. After incubation period, the dissolved oxygen of these water samples was determined. The BOD was calculated as follows.

B.O.D.
$$mg/lit = [(S_1 - S_5) - (B_1 - B_5)] X dilution factor$$

Where $S_1 = D.O.$ of sample on first day

S₅=D.O. of sample after 5 day's is incubation

B₁= D.O. of blank water on first day

B₅=D.O. of blank water after 5 day's incubation.

Chapter III - Observations and Results

In the present study "COMPARATIVE STUDY OF SOME PARAMETERS OF DRINKING WATER IN PETH-VADGAON" emphasis is given on quality of drinking water by considering some of the physico-chemical parameters. The underground water from bore well, River water from Warana River and Lake Water from Mahalaxmi Lake is used for drinking purpose in Peth Vadgaon. This water is tested with the materials and methodology as given in chapter II. Following observation were made.

Temperature

00000000000

Chapter IV - Discussion and Conclusion

Some physico chemical parameters of underground water, Running water and Lake Water are tested to check the quality of drinking water from Peth Vadgaon. The observations are compared with the standards for drinking water given by World Health Organization.

The temperature of the drinking water of all the three sources is found normal as per the standards by World Health Organization. The pH of the drinking water of all the three sources is also found normal which is 7.4, 7.6 and 7.8 for underground water, Running water and Lake Water respectively. This is as per the standards by World Health Organization. The TDS of the drinking water of all the three sources is also found normal which is 8 mg/L, 8 mg/L and 1 mg/L for underground water, Running water and Lake Water respectively. This is as per the standards by World Health Organization. The conductivity of the drinking water of all the three sources is also found normal which is 0.827 microhms/cm, 0.122 microhms/cm 0.370 microhms/cm for underground water, Running water and Lake Water respectively. This is as per the standards by World Health Organization. The dissolved oxygen of the drinking water of underground water and Running water is also found normal which is 8.3 mg/L and 8 mg/L respectively. But the dissolved oxygen of Lake Water is 1 mg/L which is quiet less than the standards. This is as per the standards by World Health Organization. The alkalinity of the drinking water of all the three sources is also found normal which is 128 PPM, 0 PPM and 44 PPM, for underground water, Running water and Lake Water respectively. This is as per the standards by World Health Organization. The total hardness of the drinking water of all the three sources is also found normal which is 0.192 mg/L, 0.172 mg/L and 0.228 mg/L for underground water, Running water and Lake Water respectively. This is as per the standards by World Health Organization.

DECLARATION

We undersigned, hereby declare that the project entitled 'Online Doctors' Appointment System' is original work prepared by us under the guidance of Prof. Mrs. Sujata Patil. The empirical findings in this report are based on the data collected by us. The matter presented in this report is not copied from any other source.

We understand that any such copying reliable to be punished in any way that the university authority they fit.

This work is humbly submitted to "Shivaji University Kolhapur" for the degree of "Bachelor of Science (Computer Science)" for us.

Thanking you.

CERTIFICATE

This is to certify that, Miss Aishwarya Suresh Suryawanshi have completed their project work on "Online Doctors Appointment System" for Shri. Vijaysinha Yadav Arts & Science College, Peth-Vadgaon. In pratical fulfillment of the degree course "Bachelor of Science (Computer Science)" during the year 2019-2020 affiliated to Shivaji University, Kolhapur.

The work has been carried out under my guidance. To best of Knowledge and breif, the matter present in this project has not been submitted earlier and is has original work. This project works shows their hard work and sincere effort.

ACKNOWLEDGEMENT

We have great pleasure in the submission of project entitled "Online Doctors Appointment System" for "Shri-Vijaysinha Yadav Arts & Science College, Vadgaon". In partial fulfillment of the award of bachelor of Computer Science submission to Shivaji University, Kolhapur. While submitting this project, we take this opportunity to thank those directly or indirectly related to project work without their active co-operation and guidance it would not completely in time. At the outset, we keep on records our deep sense of attitude towards our project guide outset Prof. Mrs. Sujata Patil, who gave guidance right from initial stage of project on offered us several suggestion for developing project in systematic and presentable manner.

We are also thankful to all staff members of Computer Science Department. In the end we express our grattitude our friends and parents who inspire us during this work.

Department of English Shri. Vijaysinha Yadav College Peth Vadgaon, Dist. Kolhapur.

Alexander pope was born in London on 21" may 1888. His payents were catholics. As a result, he did not get admission to any public school. Little Alexander learned to read and write by himself. A priest, however, gave him lessons in greek and latin. He was a voyacious reader and liked to read anything, especially poetry. His love of reading was also due to his physical deformity. Though a bay with a handsome face, he was a dwarf by stature and a little deformed. This physical stature was a result of a severe illness in his boyhoodpope never enjoyed good health. His life was one long disease. constant care and nursing was the need of his life. Headache was his lifelong headache.

This resulted in his being irritable and impatient. He could not tolerate being spoken to and shumped company. This may probably explain why he had few friends and many enemies. He was a generous and sincere person to his few friends but Nery severe with his enemies. His literary career is a career of quarrels and literary disputes with those with whom he disagreed or those whom he disapproved. That is only in his days he was famous for his quarrels with a number of persons that included people like Wycherley, Henry cromwell and Addison. Pape died on 30th May 1744.

Pope's age is called the Augustan Age. The writers of this period were inspired by the classical poets of the period, when king Augustus ruled the Roman Empire. Horace, ovid and other classical writers were their models. However, Pope dominated the literature of his day so much that the period got

the name the Age of Pope. The liteary career of Pope begins in the real sense with the "Essay on Criticism", which made him famous. In this and in later poems he virtually followed the advice of walsh, who advised him to seek correctness in versification, language and everything he did in the field of literature. The poetic career of Pope can be analyzed livided in (A) Pastoral Poems @ Didactic Poems @ satiric Poems and @ Other Poems. The poem we are supposed to study belongs to the last group. Mys. M. B. in the title has been identified as Mrs. Martha Blount, a close friend of not only Alexander Pope but of the Pope family. On our friend's birthday we send him a wish today on face-book, what's app or mobile phone. We say "Happy Birthday Deay - - "or" many, many happy Yeturns of the day Dear - ". Here Pope does the same. But that is not just a wish or a blessing. There is much more hidden under it. We will discover it and look at it in details as we go through the poem.

To Mrs. M.B Oh Her Birthday

- - by Alexander pape

Oh be thou blest with all that Heav'n can send, Long Health, long Youth, long pleasure, and a Friend: Not with those Toys the female world admire, Riches that vex, and vanities that tire. With added years if Life bring nothing new. But, like a sieve, let eviry blessing thro. Some joy still lost, as each vain year runs o'er, And all we gain, some sad Reflection more; Is that a Birth-Day? tis alas! too clear, Tis but the funeral of the former year. Let joy or Ease, let Affluence or content. And the gay conscience of a life well spent. Calm ev'ry thought. Inspirit ev'ry grace. Glow in thy heart, and smile upon thy face. Let day improve on day, and year on year, Without a pain, a Trouble, or a Fear: Till Death unfelt that tender frame destroy, In some soft Dream, or Extasy of joy,

Peaceful sleep out the sabbath of the Tomb,

And wake to Raptures in a life to come.

Stamay Stamay

Happy birthday. Dear Mrs. M.B. May god bless you with all the gifts. He can bestow on you, such as long health, long youth, long pleasure and a real friend. But let you be spared from the things that ladies normally love, such as riches, vanities.

If life brings nothing new to you with the added years and lets every blessing go away our of you as through a sieve such as joys and useless years run over, how can it be called a Birth-Day? on the contrary, it is the funeral of the former year.

So let joy, ease, yiches, satisfaction and conscience of life be used properly and let commess encourage every grace in your let there be glow in your heart and smile on your face. Let every day and every year prove better to the previous one. Let there be no pain, trouble or fear in your life till you breathe your last, and let death destroy bring your end, without giving you any frouble. It should be like a soft, joyful dream and a peaceful sleep that god enjoyed on the subbath day and in your next life you should enjoy all eastasies.

Report of Study Tours [2016 to 2021] 2018-15 -

Department of English conducted various student centric activities to enhance student performance in academic development. The Study Tours is one of those activities that promoted overall development of students of second and third year. The importance of educational excursions includes giving students the chance to build closer bonds with their classmates, experience new environments and enjoy a day away from the classroom. There are many benefits of study tours such as:

- 1. Talking with Locals
- 2. Cultural Observation
- 3. Connecting Different Issues
- 4. Instilling A Passion for Travel
- 5. Real-World Experience

The details of the activity are as following:

S.N.	Date	Place	Name of Faculty	Class	No. of Students
1	27/02/2019	Kaneheri Math, Kagal, Kolhapur	Dr.A.L. Powar	B.A. II	07

Following are the outcomes of this study tour:

- 1. Awareness of Indian Culture
- 2. Increased interest in Indian Historical Places.
- 3. Fostering cooperative environment.
- 4. Improved enthusiasm in nature.
- 5. Growth in aesthetic appreciation and research approach.

Department of Chemistry

Student Centric Activity: Project

2018-19

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- Think positive to stay focused.
- · Stay resilient.
- · Make time to read.
- Manage your time.

Introduction

Define cold drinks-

The main production of soft drink was stored in 1830's since then from these experimental beginning there was an evolution until in 1781 when the words first cola favored beverage was introduced these drinks were called soft drinks only separate them form hard alcoholic drinks.

The era of cold drinks began in 1952 but the industrialization in idea marked it's beginning with launching of limca and gold spot by pariey groups of companies since the beginning of cold drinks was highly profitable and luring may multination companies launched their band in india lke pepsi and coke

The majority of people viewed spirite, Miranda and limca to give feeling og lightness, while pepsi and thumps'up activate pulse and brain.

1.Coca-Cola-

The drinks is called Coca-cola because of the cocaine leaf and cola fruits that were used to add flavor Dr.Pembertan's parlner and bookkeeper Frank roobinson suggested the name Coca-cola because the thought using the latter C twice would better than if they used k in the word cola.

Coca-cola history has that beverage been green the original formula called for caramel to give coca-cola's it rich brown color and although the recipe has undergone some changes through the years none of them affected the ultimate colour of the product.

One can of coke (330ml) contains 100% of year daily sugar allowance and there's no den eying that will have a corrosive effect on your teeth over time.it is also a dilute meaning however cooling and thirst quenching it might seem.

- 1] Kidney failure-drinking coke daily.
- 2] Risk failure
- 3] Heart and blood problems.
- 4] Skin problems.
- 5] Obesity.
- 6] dental erosion.

Vitamin deficiency the phosphoric acid contained in coke along caffine which has a diaret.

Shri Vijay sinha Yadav College, Pethvadgaon

Department of Chemistry

Student Centric Activity: Project

2018-19

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.
- Patience and thinking ability increases.

Shri: Vijaysinha Yadav College Peth Vadgaon, Dist. Kolhapur.

Shri Shahu Shikshan Prasarak Seva Mandal's

Shri Vijaysinha Yadav College, Peth Vadgaon Department of Zoology

Student Centric Methods - 2018-19

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2018-19, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

Sr. No.	Name of activity	Date	Outcome
1	Seminars of the students	August to September 2018	Explanation methods, Referencing skill, Stage daring in the students,
2	Research Projects	December 2018 to March 2019	Research attitude, Reference searching, report writing skills
3	Study tours	December 2018 & January 2019	To correlate the theoretical knowledge with experiential learning
4	Zoology corner- Annual question series in Zoology	July 2018 to March 2019	Referencing skill, Answer writing skill, presentation on paper

Acknowledgement

We consider ourselves very fortunate to have worked under the inspiring guidance of Dr. Atigre R. H. Asst. Professor and Head, Department of Zoology, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon, who introduced us to this modern area of research. Words are inadequate to express our thanks towards him who inspired the passion for research.

We are also thankful to Prin. Dr. V. R. Chavan, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon, for providing all the facilities to carry out this work.

I am also thankful to Dr. S.V Maske, Shri Madane K. A., Smt. Pawar A. S. and Miss Thorvat T. R. for their support and guidance in the completion of the project. I am also thankful to Shri Yadav Ranjit, Lab Assistant, Shri Rongate Shrinivas, Lab. Assistant and Shri Ghabak Anil Lab. Attendant for their all time help during the completion of the project.

We owe a deep sense of gratitude to our parents for their constant encouragement during the tenure of this study.

My wholehearted thanks are also due to all those who have directly or indirectly contributed to the successful completion of this work.

Miss. Kekare Jyoti Maruti Miss. Yadav prajakta Ashok Mr. Patil Sandip Jaysing

Chapter 1 - Introduction

Nowadays many intensive field vegetable production systems are not sustainable due to causing severe environmental damage. Often large amount of vermicompost remains in the soil after harvest of the crop. This vermicompost comprises residual soil nitrogen and crop residues vermicompost. Both vermicompost sources affect ground water quality through nitrate leaching and air quality through nitrous oxide emission (S. Gular, 2005). Vermicompost fertilizer enables farmers to achieve the high yields that drive modern agriculture. The use of vermicompost fertilizer will continue to increase substantially as global population and food requirements grow.

Integrated use of chemical fertilizer and recycle organic waste may be an approach for sustainable production of crops. This may improve the efficiency of chemical fertilizers and thus reduce their use. Integrated use of organic and inorganic fertilizer can improve crop productivity and sustain soil health and fertility (V. Satyanarayana, 2009). Application of compost along with chemical fertilizers has been reported to give highest yield and maximum return. This treatment may also help to alleviate certain nutritional problems that result in poor health and individual productivity (H.N. Aaghar, 2006). The use of fish manure could be an important alternative for recycling this organic waste, reducing the direct risks of water pollution from the fish farming industry (F.J Salazar 2006). The results of study carried out by Naylor et.al. 1999 indicate that fish manure is similar in its chemical composition to other livestock manures, and should be suitable for use as an agricultural fertilizer. In addition, it is hoped that these data will also help regulatory agencies and farmers make sensible and pragmatic decisions concerning the appropriate and safe disposal of manure wastes collected from land based trout culture facilities. Agriculture carried by use of fish manure can be a way of reducing the environmental impact of nutrient rich streams and the amount of chemical fertilizer needed for (E. Castro, 2009). This

study was conducted to determine the response of various dozes of fish manure and ammonium nitrate fertilizers on plant growth, yield and nutrient content of lettuce. In today's era, heavy doses of chemical fertilizer and pesticides are being used by the farmers to get a better yield of various field crops. These chemical fertilizers and pesticides decreased soil fertility and cause health problem to the consumers. Due to adverse effect of chemical fertilizer, interest has been stimulated for the use of organic manures (Follet et al., 1981). The green revolution in India promoted the indiscriminate use of chemical fertilizer and pesticides to obtain a better crop yield. In course of time the tropical soil after receiving such chemical turned unproductive due to lack of proper amendments of organic matters (Kale, 1998). The best alternative of the present day's environmental dispersion is to make proper use of the available unutilized organic biodegradable wastes in order to convert them into compost within a short period (Edwards, 1988)

Chapter 2 - Materials and Methods

The plant used in present study is Wheat- *Triticum aestivum* belonging to family Poaceae and subfamily Pooideae. It is a grass widely cultivated for its seed, a cereal grain which is a worldwide staple food (Mauseth 2014, Belderok, et al 2000, UN FAO, 2014). The many species of wheat together make up the genus *Triticum*. Wheat is grown on more land area than any other food crop (220.4 million hectares, 2014) (Curtis 2002). World trade in wheat is greater than for all other crops combined (FAO 2016).

Wheat is an important source of carbohydrates (Day L,et al 2006). Globally, it is the leading source of vegetal protein in human food, having a protein content of about 13%, which is relatively high compared to other major cereals (FAO 2017) but relatively low in protein quality for supplying essential amino acids (FAO 2013, Ludvigsson, et al 2013). When eaten as the whole grain, wheat is a source of multiple nutrients and dietary fiber (Day Let al 2006).

Technological advances in soil preparation and seed placement at planting time, use of crop rotation and fertilizers to improve plant growth, and advances in harvesting methods have all combined to promote wheat as a viable crop. When the use of seed drills replaced broadcasting sowing of seed in the 18th century, another great increase in productivity occurred.

Yields of pure wheat per unit area increased as methods of crop rotation were applied to long cultivated land and the use of fertilizers became widespread. Improved agricultural husbandry has more recently included threshing machines and reaping machines (the 'combine harvester'), tractor-drawn cultivators and planters, and better varieties.

In India wheat crop is considered as Kharif crop. For present experimental germination studies the seeds of *Triticum aestivum* are used.

Preparation of Vermicompost

Leaf litter was collected periodically from the Coimbatore and kept in large plastic container. The collected leaf litter was sun dried cutinto small pieces of 4 to5 cm length and kept ready for composting. Compost mixture was prepared in the ratio of 1:1 [w/w] of lead and cow dung [13kg] in round plastic container, sprinkled with water to maintain moisture content and was allowed for pre-digestion. Pre-digestion of consort mixture was done for 21 days with regular mixing for pre-decomposition by the microbes. On 21 day of pre-digestion, the weight of the predigested compost mixture was noted.

After 21 days pre —digestion, 10 kg of pre-digested mixture was transferred to the plastic container. Eisenia foetida (Savigny, 1826) earthworms (total biomass of 520 Gmas) were introduced into which each container containing the pre-digested mixture. Vermicomposting was allowed for 19 days with regular sprinkling of water to maintain the moisture content (65-70% RH) in the mixture at the end of 19 days of vermicomposting, the vermicompost from the container were spread separately on a polythene sheet. From the vermicompost adult worms and young ones were handpicked and isolated. The vermicompost thus obtained the composting leaf litter was dried and for cultivation of plant.

Preparation of Fish Manure

Dried and ground fish or fish guano is a valuable fertilizer obtained mainly from two sources as the refuse from fish packing and canning establishments and the Pomace (Oil) from the extraction of oil from fish. The product from the latter source is especially rich in fertilizing constituents, containing from 7 to 8 per cent of nitrogen and 6 to 8 per cent of phosphoric acid. The availability of the nitrogen is nearly as great as that of dried blood and tankage. The phosphoric acid is frequently more available than that in other organic matter. The availability of

the fertilizing constituents depends largely upon the proportion of oil present. A considerable proportion of the latter delays decomposition in the soil, and thus reduces the availability. The oil is removed and the fish prepared for use as a fertilizer on a commercial scale by cooking with water in tanks heated with steam. The oil rises to the surface of the water and the two are drawn off together. The residue is pressed, dried, and ground. In some cases, after the first pressing, the material is subjected to the action of steam under pressure and sulphuric acid (5 per cent.) to render the fertilizing constituents more available. The uncooked fish is sometimes treated directly with sulphuric acid to prevent offensive decomposition and to increase the availability of the nitrogen and phosphoric acid.

Fish manures are prepared and used in considerable quantities, especially along the northeastern coast in America, in Norway, and other regions where the supply of material is abundant. Fish manure is exported in considerable quantities from Norway.

In localities where it can be readily obtained from fishermen, fish-scrap is frequently used without preparation of any kind. Naturally, this product is very variable in composition, the nitrogen ranging from 2.5 to 8 per cent and the phosphoric acid from 2 to 6 per cent. The fertilizing constituents of this material are less available than those of the dried and finely ground fish. The whole fish are also sometimes used as manure, either directly or composted with other materials. It is stated in Bradford, *History of Plymouth Plantation* (Boston, 1856), that the Indian Squanto first taught the New England colonists to use the menhaden as a fertilizer for corn, instructing them to put the fish under the hills at the time of planting.

Experimental Methodology - Germination of seeds:

The effect of Vermicompost and Fish Manure on seeds of Wheat were investigated. The seeds were allowed to germinate in the cups. In each cup three seeds were sown and treatment

was given as per the table 1. Number of seeds germinated and length of Hypocotyl were measured at the of tenth day.

The effect of the treatment on seed germination of wheat was studied by one set as treated with water which is considered as control, and other sets were treated with 10% VC (Vermi Compost), 20% VC, 10% FM (Fish Manure) and 20% FM. Cups were maintained at a room temprature under natural light conditions and periodically observed. Then total number of seeds germinated was calculated for the control and treated plant. From this observation the persentage of germination was calculated.

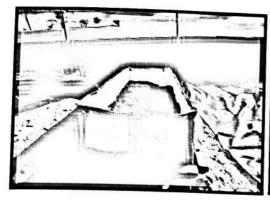

Statistical analysis:

The results where statistically analyzed according to standard method. The mean was calculated according to standard method.

Sr. No.	Title	Concentration of fertilizer		
1 Control		20 gm coco pit		
2	10% VC	2 gm VC + 18 gm coco peat		
3	20% VC	4 gm VC + 16 gm coco peat		
4	10% FM	2 gm FM + 18 gm coco peat		
5	20% FM	4 gm FM + 16 gm coco peat

Wheat seeds germinated

Chapter 3 - Observation and Results

Germination of Seeds

To study the effect of Vermiwash and fish manure on the germination of seeds they were allowed to germinate in the cups and the treatment were given as per table 1. The Hypocotyl length was measured on tenth day. The effect was studied by soaking the seeds in water for one set which served as the control containing 20 gm Coco Peat while the experimental cups were containing the mixture of Coco Peat and vermicompost as well as Coco Peat and fish manure as given in table no 1.

After germination the cups were maintained at a room temperature and periodically observed. Then the total number of seeds germinated was calculated for the control and treated plant. From this observation the percentage of germination was calculated.

Germination percentage:

The germination percentage was determined for the control, as well as 10% VC (Vermi Compost), 20% VC, 10% FM (Fish Manure) and 20% FM. Seeds that were treated with 10% VC, 20% VC, 10% FM and control shows 100% germination while those treated with 20% FM shows 66% germination (Table 2).

Germination percentage =
$$\frac{NG}{NT}X$$
 100

Where, NG = Number of seeds germinated.

NT = Number of seeds treated.

Parameters of seedlings - Hypocotyl length:

The seedling character observed was Hypocotyl length. The seedlings were kept under observation for ten days. The length of Hypocotyl was measured on tenth day and it was noted.

The length was observed to be maximum in 20% VC followed by 10% VC, control, 10% FM and 20% FM as given in table no. 3.

Sr. No.	Fertilizer	Germination %
1	control	100
2	10% VC	100
3	20% VC	100
4	10% FM	100
5	20% FM	66.66

Table 2 Germination percentage of wheat seeds

SR. NO.	TREATMENT	SEEDLING HEIGHT			MEAN
		1	2	3	MEAN
1.	control	22 cm	25 cm	24 cm	23 cm
2.	10% VC	27 cm	25 cm	24 cm	25.3 cm
3.	20% VC	28 cm	24 cm	25 cm	26 cm
4.	10% FM	15 cm	23 cm	17 cm	18.3 cm
5.	20% FM	15 cm	17 cm	-0	16 cm

Table 3 Effect of Vermicompost and Fish Manure on Hypocotyl growth of wheat.

Chapter IV: Discussion and Conclusion

The present study has been conducted on Wheat to determine the potential of Vermicompost and Fish Manure. The effect of these two biofertilizers was studied in bringing about seed germination and seedling growth parameters. The composition of Vermicompost and Fish Manure need to be standardized to suit the plant to which it will be applied. The results obtained in the present study shows that the Vermicompost is better than the Fish Manure for the seed germination purposes. These results have correlated with the result of Eva Broad and others (2017). They prepared the Fish Manure and studied its effect on various plants. They conclude that the Fish Manure is not so effective for seed germination. The reason behind this may be that the micro and macro nutrients of the plants are not readily available in the Fish Manure as they are available in the Vermicompost.

CERTIFICATE

This is to certify that, Mr. Paul Pranay Prakash have completed their project work on "Online College Event Management System" for shri Vijaysinha Yadav Arts & Science College, Peth-Vadgaon.In pratical fulfillment of the degree course "Bacholor of Computer Science (ILSa-III)" during the year 2018-2019 affiliated to Shivaji University, Kolhapur.

The work has been carried out under my guidance. To best of knowledge, the matter present in this project has not been submitted rurlier and is has original work. This project works shows their hard work and sincer effort.

DECLARATION

We undersigned, hereby declare that the projectentitled 'Online' tollege Event Management System' is original work prepared by us under the guidance of Prof. Miss. Mohite S. M. The empirical findings in this report are based on the data collected by us. The matter presented in this report is not copied from any other source.

We understand that any such copying reliable to be punished in any way that the university authority they fit.

This work is humbly submitted to "Shivaji University Kolhapur" for the award degree of "Bachlor of Science in Computer Science (B.Sc.)" for us.

Thangking you.

Date: 12/03/2019

आधुनिक शतकीय तत्वज्ञानात एक योर शमाजवादी विचारवंत् म्हणून कार्ल मार्क्सचे स्थान असामान्य व अजरामर अतिले अहि शास्त्रीय शमानवादाला जन्म देगाळा खा महान विचारवंताचा जनम ड मे, 1818 रोजी प्रशियाच्या ए। इन प्रांतातील द्रायर येथे एका मध्यमवर्गीय ज्यू कुटुंबांत काला त्याचे वजील प्रथम परिश्वन होते. परंतु नंतर त्यांनी ख्रिश्चन द्यमिया स्वीकार केला होता. त्यामूळे माक्सीला ज्यू द्यमीय भराज्याचा त्रास सहम करावा लागला नाही लहानपनी मार्क्श अन्यंत बुद्धीमान होता इतिहास, तत्वज्ञान व कायदा या विषयांची त्याला विशेष भावउ होती. कायद्याच्या अभ्यासासाठी त्याला वयाच्या सतराव्या वर्षी वान विदयापीठात पाठविज्यात भाले 1835 साली कायद्याची पदवी संपादन केल्यानंतर प्रदील रिक्षां भारति तो विश्वविद्यालयात् दाव्यल सालाः वयाच्या तेविसाव्या वर्षी 1841 माली माक्सीने ' डॉक्टर ऑफ फिलॉसाफी ' ही पदवी मिळविली. त्यांच्या प्रवंधाचा विषय होता, " उमोक्रिटसरी प्रकृतिवादी तत्वरान व एपिक्यूरसचे प्रकृतिवादी तत्वरान यामधील फरकः । त्यानंतर वान विश्वविद्यालयात प्राध्यापक म्हणून अध्यापनीवे कार्य करुवाला त्यांचा विवार होता. परंतु व्यांच्या क्रांतिकारक विचारस्वाधिक व्यांना तेथे नोक्श मिळ्ली नाही. त्यामुळे माकरीने पत्रकाराचा व्यवसाय सुरु केला, पुढे तो । व्हेनिस टाउम्स ' या वृत्तपत्राचा संपादक आला. परंत् त्याच्या उद्य व क्रांतिकारक लिखागामुके सरकारने त्याला जर्मनी सोर्न जाव्याचा आदेश दिला. 1844 मध्ये मार्क नर्मनी सीड्रन फ्रान्समध्ये गेला. तेथे त्याने समानवादी साहि-त्याचा अध्यास केला. फान्सला जान्यापूर्वी म्हननेय संपादक अराताना मार्क्सचा जेनी नावाच्या मुलिशी विवाद झाला होता. या पती पत्नीये एकमेकाक उत्कट भेम होते. जेनी भापत्था पतीच्या नशिवात , अमात आणि सगउयात त्याची केवळ

सहसमिचरिगी होती एवदेच नहे तर सर्वतीपरी सुनानतेने मािं। गाढ तळमळीने या तिन्हित ती शक्रियपंगे समरस आली होती पॅरिस येगे प्रुंधों मािंग लुई क्लेंक यांच्या सारायाने मारूने फ्रेंच कम्युनिसम् व रामकीय मर्परास्त्र यांचे मध्यान केले येथेच त्याची फ्रेंगरिक एंग्ल्सरी मोळ्यं आली ह्या मेटीचे पुढे गाढ मेंनीत रूपांतर साले मािंग ही ऐतिहासिक स्वरूपाची मेनी जीवनभर टिक्न राहिली. एक धनिक व जिवलग मित्र म्हणून मार्क्सच्या जीवनात एंशल्सला फार मोहे महत्त्व होते. 1848 मध्ये मार्क्स आहि। एंगल्स यांनी भंधुक्त रीतीने ' साम्यवादी प्रमाचा जाहीरनामा' (Communist Manifesto) प्रकाशित केला. मार्क्सने या ग्रंथाव्यरि शास्त्रीय समामवादी तत्वप्रवाली जागांपुरे हेवली. 1849 साली कार्ल माक्सी लंडनला गेला माक्सीचे इंग्लंडमधील भायुष्य फार त्रास्निचे व दारिद्रयावस्थीत शेले. संशोधन, वाचन आठि लेखन यांमध्ये माक्सीने आपले संपूर्व जीवन दालविले व्याने 1864 मध्ये Socialist International नावाची मनूर संघटना स्थापन केली. 1864 मध्ये मार्क्सचा 'दास केपिटल ' हा ग्रंथ प्रसिद्ध झाला. एंगल्सच्या मदतीने त्याने हा ग्रंथ पुरा केला या ग्रंथाचा पहिला खाँउ मार्क्सिक्या ह्यातीत प्रशिष्ट् होऊन बाकीचे दीन त्याच्या मृत्युनंतर एँगल्सने प्रशिष्ट् केले. इंग्लंडमधील संपूर्ण उप वृष्णित्या वास्त्रव्यात मार्क्सला अत्यंत ह्लाब्बीचे दिवस कारावे लागले. साध्या आणि स्वस्त दशच्या दीन ब्लील्यांच्या घरात ती राहत होता पत्नीचे आजारपण आणि मुलाँचा शाँभाळ यामुके माकर्मता कींडुंबिक सुरव बेतावेच मिळले होते. कुडुंबाचा खर्च चालिवव्यासाठी आपले कृपेडे, चीजवस्तू गहान ठेवव्याचा प्रसंग अनेक वेढा मार्क्सवर आला होता. दारिद्वशाने बटके सातत वसत् असत्रानारी माक्सीने आपले लेखन व संघटना-त्मक कार्च शेवटपर्यत भोउले नस्ते नाही म्हरते तरी एँगल्सने त्याला अनेक वेद्धा आधिक शाहाच्या केले होते 14 मार्च, 1883 रोजी लंउन येथे काल मार्क्सचे निधन अलि

कार्व मार्क्श

जन्म- ६-में १८१८ , स्लू - 14 मार्च - 1883.

माक्सी ग्रॅंथनेव्यन १-कार्ल मार्क्सन आपल्या विविध ग्रॅंथांद्वारे समाजवादी विचार प्रकट केलेले आहेत. भाँउवलशाही समाजवि दोष , भाधिक शोषन , वर्गसंघर्ष , कामगारांची क्रांती, वर्ग-विरहीत आनि राज्यविरहीत समाज उत्यादीविषयक विचार त्याने आपल्या ग्रंथातून स्पष्ट केले आहेत. मार्क्सचे काही महत्त्वाचे ग्रंथ पुढीलप्रमाने सांगता येतील

- 1 . Holy Family (1845)
- 2. The Poverty of Philosophy (1847)
- 3. The council communist Manifesto (1848)
- 4. civil War and closs struggle in france.
 (1849)

- 5. A. Contributation to the critique of political Economy.
- 6. Value price and profit (1865)
- 7. Das capital (1867)
- 8. The critique of the Goetha Programme. (1891)
- g. Eighteenth Brummaire of Louis Bonaparte (1894)
- 10. Revolution and counter Revolution (1894).

अशा मकारे माकरीने विविध स्वरुपाचे ग्रंथलेखन केले असले तरीही त्याचे कम्युनिस्ट मॅनिफेस्टो व कॅपिटल हे दोन ममुख ग्रंथ म्हबून ओळखले जातात.

कम्युनिस्ट मॅनिप्स्टो (communist manifesto)
हा ग्रंथ मार्क्सने 1848 मध्ये लिहिला फ्रेंडिक एंगल्सच्या।
मदनीने हा ग्रंथ पुरा आलाः माधिक घटकांवर भाधारलेल्या।
वर्गामधील संघषांचा पूर्व - इतिहास , भाधुनिक काळातील
भांउवलदार भाित मनूर थामधील संघष , भांउवलशाहीची
विनाशाकडे वाट्चल , मनुशंची संघटकवृत्ती भाित मनुशंनी
प्रत्यक्षात करावयाचा कार्यभाग इत्यादीसोवन किंवा रत्यादीः
संवंधीय विचार था ग्रंथान माउने भाहन था ग्रंथाविषयी
बद्रन्दि रसेल थांनी असे म्हरेल भिंह की , ' साम्यवादी
प्रभाचा नाहीरनामा ' हा ग्रंथ भाक्सने एंगल्सच्या मदतीने
लिहिला असून तो रितहासात रानकीय विचारांचा एक उत्कृष्ट
व अग्रेसर ग्रंथ म्हणून भोळ्या जातोः'' ह्या ग्रंथाने
नगातील सर्व भाषांनुन भाषांतर सालेले आहे साम्यवादी

विवारीं भीळेख करून देगारा हा ग्रंथ म्हणेने शाम्यवादीचे

रास केपिटल (शिव्हा (शिव्हा क्यां का ग्रांध मार्कानी उसे 1867) मध्ये लिहिला या ग्रंधाचे तीन व्यंड असून व्यापिकी दीन व्यंडाचे मकाशन मार्क्सिंग महत्यूनंतर (1885 व 1894) एँगल्सने केले ह्या ग्रंधात ऐतिहासिक भौतिकवाद अतिरिकत मूल्य भाँउवल्या शाहीचे दीष दारिक्स बेकारी व शोषण नुसलेल्या राज्याची स्थापना उत्यादीविषयक विचार मामिकपण माउलेल्या आहेत. मार्कस्टिया विचारावर पडलेला समाव हा

हेगेलच्या तत्त्वरामाच्या प्रभाव ३-

मार्क्सने वॉन व व्यक्तिन या विद्यापीठाँत हेमेलच्या तत्वत्तानाचा मध्यास केला होता हेमेलच्या द्वंदात्मक भौतिकवादाचा परिगाम मार्क्सच्या मौतिकवादान् वर अलिला अहि विरोधविकासवादाची कल्पना मार्क्सन हेमेल-कडून घेतलेली दिसते वास्तविक हेमेल अध्यात्मवादी होता, तर मार्क्स भौतिकवादी होता; तरीपन व्यव्यावादाची कल्पना दीहोंच्या वावतीत सार्व्यीच वाटते मार्क्सन हेनिहासिक भौतिकवादाची मीमांसा करताना हेमेलच्या सिद्दांतातील वोह्दीक तत्त्व घेतली आहेत असे दिसून घेते

प्रेंच समानवादी साहित्याचा प्रमाव : प्रुधा , सेंट सायमन , चाल्स फेरियर या फ्रेंच विचारवंताचा मार्क्सच्या तत्वरानावर परिगाम आलेला होता. आपल्या फ्रान्सच्या वास्तव्यात मार्क्सन फेंच समानवादी साहित्याचा अध्यास केला होता.

इंग्लिश विचारवँनांचा प्रमाव १ मॅडॅम स्मियं, रिकार्डी विल्यम भामसन , जे एस. मिल उत्यादी इंग्लिश विचारवंनांच्या आर्थिक व सामानिक विचाराँचा प्रमाव मार्क्सच्या साम्यवादी

- प . मार्क्सचा क्रांतिविषयक सिख्दांत (कामगारवगचि। व कामगारवगचि। हुकुमगाही)
- ६. साम्यवाही समाजस्यना.
- मार्क्शन्या ऐतिहासिक भौतिकवादी मीभशिवशिल टीका 8-
- र कार्ल मार्क्सच्या उतिहासाच्या भौतिकवादी मीमाँसेत केवळ आर्थिक घटकाँचास विस्तार केलेला अहि कारण समाजासे परिवर्तन होताना आर्थिक घटकांबरोबरस उत्तर घटकही कारणीभ्रत उरतात धर्म , संस्कृती , राष्ट्रप्रेम उत्यादी घटकाँतून उतिहास घडविला जातो
- 2. रसेल यांच्या मते, राजकीय जीवनातील महत्वाच्या घडामोडी भौतिक परिस्थिती आि मानवी भावना (इच्छा) यांच्या परस्परांसंबंधानून होत असतात. केवळ भौतिक वस्तुवादावर उतिहास आधारलेला नसतो; तर तो राष्ट्रवादावर आधारलेला असतो-
- 3. वेपर थाँच्या मते , स्वाभिमान आणि महत्वाकाँका थासाठी राजकीय सत्तेन व समाजव्यवस्थित वदल धउतिला जातो. पीपची सत्ता , साम्राज्यवाद थाँच्या पाठीरी आर्थिक घटक कारणीमूत नसतो
- र सेवार्रनच्या मते , मानवी र्शतहासात आर्थिक हाटक हा एक मेव घटक नसून इतरही घटक (धर्म , संस्कृती, राष्ट्रप्रेम , महत्वाकांबा इ.) महत्त्वाचे असतात .

जॉन गॅलकेश व वील्ट शेस्टीटर %-

या अमेरिकन अधिरास्त्रशिका मते, मार्किन केले रितरासार भीतिकवादी विवेचन कालबाट्य व दिसामूल करनारे आहे. कारन भाँउवलगाही समानव्यवस्थेतून समानवादी व्यवस्था निमान होने कठीन आहे. भाँउवलगाही सो भाँउवलगाही नानितर नो नवा समान उद्याला येत आहे. तो भाँउवलगाहीही नाही, असे त्यांचे मत आहे.

ऐतिशासिक मौतिकवादातून मार्क्सने साम्यवादी समाज्ञरवनेचे जो वर्णन केलेले आहे ते काल्पनिक व अपूर्ण स्वरूपाचे वाटते. कारण आज रशिया, चीन या देशांनी मार्क्सवादी प्रणाली स्वीकारूनही तेचे राज्यविरहीत समाज्ञव्यवस्था निर्माण अलिली नाही उलट राज्ये अधिकच बळकट व शिकतशाली बनलेली आहेत.

भारता प्रकार मार्क्सिंग पितिहासिक भौतिकवादावर टीका होत असली तरीही त्याने मानवी इतिहासांग्रे आधिक हृष्टीकोणातून केलेले विश्लेषण हे अर्थपूर्ण व महत्वांग्रे मानले जाने .
असा रितीन रितिहासांग्रे भौतिकवादी विवरण करून मार्क्सने साम्यवादी समानस्यना 'ही पूद्यी अपरिहार्थ अवस्था अहि असे राजकींग्रे भविष्य वर्तिवले होते .

DICI L.

of Surplus Value) 8.

कीपटल ' वा ग्रँगात ' अतिरिकत मुल्यांचा सिह्दांत, माँउलेला आहे . वेपरच्या मते , मारुलेला या सिह्दांतावर रिकार्डांच्या किचारांचा काही अंशी प्रभाव पठलेला असतो मांउवलदाश्वभांकरून सिमकांची , मजुरांची पिळवळूक कमा मकारे होते हे दाख्ववून देग्यासाठी मार्क्सने हा सिह्दांत प्रतिपादेला आहे मजुराला त्याच्या अमाया मोवदला पुरेपूर न देता , कमी मोवदल्यात अधिक वस्तु उत्पादन करून घेऊन , अधिक नफा मिळविळ्यांची जी आधिक शोषजांची पहदती आहे तिचे स्वरूप मजूरवंगांला समूजांकून देग्यासाठी मार्क्सने अतिरिकत मुल्यांचा सिहदांत मांउलेला आहे कर्यांचा सिहदांत मांउलेला आहे कर्यांचा सहदांत मांउलेला आहे कर्यांचा सहदांत मांउलेला आहे कर्यांचा सहदांत मांउलेला आहे कर्यांचा मार्केल आहे क्यांचा सहदांत मांउलेला आहे क्यांचा सहदांत मांउलेला आहे क्यांचा सहदांत मांउलेला आहे क्यांचा क्यांचा सहदांत मांउलेला आहे क्यांचा मार्केल जाते.

वस्तुंचे स्रल्य ठरविताना होन तत्वांचा स्वीकार केला जातो उपयुक्ततावाही लोकांच्या मते, वस्तुचे स्रल्य त्या वस्तुच्या उपयोगितवरून ठरवित जाते. थाइतर दुसरे तत्त्व असे आहे की, वस्तुनिर्मितीसाठी व्यत्व केल्या जाणाच्या अमानुसार वस्तुचे स्रल्य ठरविले जाते. कार्ल माक्सेन थापेकी दुसप्पा तत्त्वात्या स्वीकार केलेला भाहे. माक्सेन्या मते, वस्तुचे सुल्य हे तिच्यावर व्यत्वे आलेल्या सामाजिक अमावरून ठरते. बाजारात विकीसाठी भालेल्या सर्व वस्तुंगच्ये एक सामान्य गोष्ट असते ती स्ट्यान त्या सर्व वस्तुंवर व्यत्व केले जाणारे भामाजिक अम होत. माक्सेन्या मते, मानवी अमारिवाच कोणतिही वस्तु निर्माण होक राकत नाही. मजुराँजवळ उत्पादननिर्मितीसाठी लागागारे भाउवल व अन्य सायने नसतात, तर त्याच्याजवळ फकत अम हा घटकच असतो कामगाराजवळ उत्पादन निर्मितीरी बामता असते, अयित, मजुराँजवळ उत्पादनासी सायने नसल्यासुळे. त्याला भाँउवलदाराच्या कारव्याच्यात काम करावे भागते, आपल्या प्राथमिक गरमा भागविष्यासाही कामगाराला आपले सम विकाव लागतात. भाँउवलदार वर्ग समिकांना कमीत कमी मोबदला देऊन मास्तीत मास्त नफा मिळविष्यासाही घाउपउत असतो. ममुराला आपला व आपल्या कुटुनियांचा चिरुतार्थ चालविष्यासाही आपले सम भाउवलदारांना विकाव लागतात. भाउवलदार जेला ममुरांना व्यांच्या समाया मोबदला देऊन निर्माण सालेली वस्त बामारात विकतो; तेला त्या वस्त्र्ये मुल्य ममुराला दिलेल्या मोबदल्यांपुद्धा कितीतरी जास्त असते. यालाच अतिरिक्त मुख्य असे म्हटले जाते. सीखा भाषेत असे म्हणता येहल की, प ध्याद्या वस्त्रुनिर्मितीसाहि। दिली माणारी भी ममुरी असते तिल्यापेक्षा त्या वस्त्रुची बामारातील किंमत जास्त असते. महण्ये जी जास्त किंमत कारते किंग भी तफावत पडते. तिला अतिरिक्त मुख्य असे म्हणतात. प्राप्त किंमत कारते किंमते किंपते केंदिकते मुख्य म्हणते माँउवलदाराचा नफा होयः (उपाणीण्ड Value is the difference between the value of the wages which a labourer Products and which he actually receives Mars.)

काल मार्क्स्था मते माउवलदारका वस्तु निर्मितीशाठी श्रमिकांना भी मनुरी देतो ती मनुरी त्याच्या सर्व गरना भागविण्यासाठी जितक्या वस्तु लागतात त्याच्या सृल्यांवरून्य ठरविली जाते श्रमिकांची मनुरी ठरविण्यासाठी ही जी इपस्दती भाउवलदारांकडून श्वीकारली जाते त्याला काल मार्क्स मनुरी ठरविण्याचा लीव्यंडी नियम १ (The Iron Law of wages) मसे म्हणती म्हणीय मनुराला नगण्यासाठी जीविश आवश्यक आहे तेविदीय मनुरी दिली जातो वास्तिवक भाउवलदार.

माकर्स्वा वर्गसंध्यम्बा सिद्धांत (Theory of class struggle)

्कम्युनिस्ट मॅनिफेस्टो । या ग्रंथात माकर्शने पुढील शवहात वर्शसंघषिचे विश्लेषण केलेले आहे " आजपूर्यतंचा संपूर्ण समाजाचा इतिहास हा वासिंगपिताव इतिहास माहे- स्वामी मानि गुलाम , उच्चकुलीन आनि सामान्य , जमीनदार आनि कुळ , कार्यानदार व कामगार, घोउक्यात सांगावयाचे तर जुलूम करनारा आनि जुलूम सोसनारा असे दीन्ही वर्ग निहमी परस्परांच्या विरोधात असतात. या दोन्ही वर्गात कधी गुप्तपने तर कथी उधउपने असा सतत. संघर्ष चालू असून व्या संघर्षत्न कथी क्रांतीच्या मार्गाने समानायी प्रनर्यना होते ; तर कथी या दोन्ही वर्गाचा परस्परांशी संघर्ष करनाना समानायी या दोन्ही वर्गाचा परस्परांशी संघर्ष करनाना सारखात ममानात नारा होतो (The history of all hither to existins society is the history of class struggles. Freeman and Slave, Pastrician and Plebelan, lord and Serf, guild-moster and journeyman. in a word, oppressor and oppressed, stood in constant opposition to one another, campied on an uninterrupted, now hidden, now open fight, afight that each time ended, either in a revolutionary reconstitution of society at large, or in the common ruin of the contending Classes.)

मार्क्सने इतिहासाचा आधार भौतिकवाद आहे हे शाँधन त्या भौतिकवादी तत्वानुसार समाजात वर्गसांधर्ष नेहमी अटळ असते असे स्टले आहे. त्याच्या मते, मानवी समाजाच्या उद्यापासून इतिहासाची भीमांसा केली तर असे आढळून येते की, इतिहासाच्या प्रत्येक अवस्थित एक वर्ग होते. मह्ययुगामच्ये शरजामदार आहि। कुळे, श्रुदास असे वर्ग होते, तर आधुनिक भाउवलशाही समाजव्यवस्थित भाउवलदार आहि। सन्नूर असे वर्ग निमाल झाले आहेत. भाउवलशाही समाजात

Shri. Vijaysinha Yadav College Peth Vadgaon, Dist. Kelhapur. प्रस्तावना :--

महाराष्ट्राची निर्मिती होऊन 55 वर्षे उलटली असली तरी आजही संयुक्त महाराष्ट्राची चळवळ ही मराठी माणसाच्या जिव्हाळयाचा विषय आहे. संत महंतांची , शुरांची व वीरांची भूमी असलेल्या महाराष्ट्राला वैभवशाली ऐतिहासिक व सांस्कृतिक वारसा लाभला आहे. छत्रपती शिवरायांचा महाराष्ट्र, संतश्रेष्ठ ज्ञानेश्वर माऊलीचा व संतमालिकेचा कळस म्हणून ओळखला जाणाऱ्या तुकाराम महाराजांचा महाराष्ट्र म्हणून ओळखला जातो. याचा आम्हास आजही अभिमान वाटतो. 19 व्या 20 व्या शतकातील इतिहास सेशोधकांनी शिवाजीराजे म्हणजे योगपुरूष, महापुरूष म्हणून त्यांचा गौरव केला. याच यूगपुरूषाने मराठी रयतेमध्ये स्वराज्य, स्वधर्म, स्वभाषा व संस्कृतीविषयी जागृती घडवून आणली. यांमुळे मराठी माणसात अस्मिता निर्माण झाली. महात्मा फुले, महर्षी कर्वे, राजर्षी शाहू महाराज, डॉ. बाबासाहेब आंबेडकर, कर्मवीर भाऊराव पाटील, डॉ.बापूजी साळुंखे इत्यादींनी समाज प्रगतशील व पुरोगामी होण्यासाठी समाजसुधारकांची चळवळ गतिमान केली. राजकीय, धार्मिक, सामाजिक, शैक्षणिकजागृती यांमुळे भारतीयांमध्ये राष्ट्रवाद वाढीस लागजा. यामधून 1947 मण्ये भारत स्वतंत्र झाला. भाषावार प्रांतरचनेची मागणी मोठया प्रमाणात वाढली. महाराष्ट्रातही मराठी भाषिक राज्याची मागणी करणारी ' संयुक्त महाराष्ट्र चळवळ' इ.स. 1946 प्यसून सुरू झाली. या चळवळीच्या कर्तबगारीमुळे 1 में, 1960 रोजी महाराष्ट्र राज्याची निर्मिती झाली. याचा सविस्तर वृत्तांत आपणास पुढीलप्रमाणे अभ्यासता येईल.

Department of Chemistry

Student Centric Activity:Project

2017-18

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- Think positive to stay focused.
- Stay resilient.
- Make time to read.
- Manage your time.

Chapter 1

Introduction: Spinel

1.1 Introduction

Materials science in a primitive form is one of the oldest forms in the field of engineering and applied science, which is concerned with the relation of composition, structure and processing of materials to their properties and uses. The role of chemistry in material science is a vital one and has in turn made enormous contributions to this field. Solid-state chemistry has emerged as a major subfield of chemistry and established itself as an applied science of space age. This branch of science has been utilized in studying the various aspects of solid materials. Among the different types of materials, transition metal oxides are well familiar with their various kinds of applications in science and technology. These transition metal oxides play a very crucial role in the field of ceramics, electronic materials, magnetic materials, semiconductors, oxide-composites etc., and exhibiting interesting properties.

The mixed-metal oxides have gained an enormous importance in various fields. Their physico-chemical properties such as magnetic permeability, high electrical resistivity makes them useful for application in magnetic and electric devices. Apart from their technological importance as magnetic materials, mixed-metal oxides have also well established catalytic as well as gas sensing properties.

All these properties mainly depends upon their chemical composition and microstructure of the materials. Generally, mixed-metal oxides are prepared at high sintering temperature by using solid state reaction. On the other hand, like for gas sensing and catalytic activity, lower density and high surface area materials are also preferred. In recent years different modern methods have been developed in this area. Study of these

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.

Patience and thinking ability increases.

Mrs. R. A. Pawar

Shri. Vijaysinha Yadav Arts & science College Peth Vadgaon, Dist. Kolhapur.

Shri Vijaysinha Yadav College, Peth Vadgaon Department of Zoology

Student Centric Methods - 2017-18

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2017-18, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology, drawing/painting competitions under Life Science Carnival, guest lecture and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

Introduction

Biodiversity is the variety of life and its processes and the genetic difference among them and communities and ecosystem in which they occur. Biodiversity has 3 components genetical, organismal and ecological.

- Genetic diversity: Nucleotides, genes, individual populations.
- Species diversity: Individual, population species, genera, families' phyla, kingdoms.
- Ecological diversity: Ecosystem, biographic, provinces.

The biodiversity that exist today is a product of over 35 billion years of evolution, involving speciation, migration, extinction and human influence. During the last 100 years great losses of genetic diversity have been noticed. Many species are on the verge of extinction. India shows extensive reserve of biological resources but, biodiversity in India is at a higher risk of extinction because of high degree of endemism.

Today, species are going to extinct at an acceleration and dangerous manner, because of human activities. They directly affect species and ecosystem such as habitat loss, over exploitation, climate change, pollution, etc. According to vitousek more than two million species will be loosed in the next decade of which 50% will be arthropods. Due to large and diverse ecosystems, India is considered to be one of the richest varieties of plant, animals and microorganisms have been estimated from the world. (Rajamany,1993)

India is ideal place for forests and wildlife However being the second most populated country in the world and enormous pressure of exploding human population, the country shrinking the forest and wiping of the rich fauna and flora. To conserve the remaining greenery and the rare life forms. India has made efficient in-situ and ex-situ conservation programs. These efforts have established protected area network in the country.

Insect affect many aspects of our lives. Despite their small size, all kinds of natural and modified, terrestrial and aquatic ecosystems support communities of insect that present a bewildering variety if life styles, forms and functions (Gullan and Cranston, 2010) Insets are the most varied organisms on the earth. Almost exactly half 50.8% of the species of living thing and 72% of all animals are insects, about 3% of all species of insects live freshwater and perhaps 0.1% are found in marine intertidal zone (Howell et al, 1978).

The presence of insects at a particular habitat depends on a wide range of factors availability of food and climate conditions (Allan et al, 1973). They are the most important other than abundance of larval food, plants conditions suitable for egg laying and suitable flowers for feeding of adults which govern the distribution of insects The abundance of predators and parasitoids the prevalence of disease also determine the populations of insects (pollard and Yates, 1993).

Insects are characterized by distinct body division viz. head thorax and abdomen; a single pair of antennae, three pairs of walking legs and one or two pairs of wings (Mani 1994). The integument is hardened into an exoskeleton, covering the body muscles with striated fibers and arranged segmentally. Some insects are smaller than the larger protozoa but others are larger than the mammals. The shapes of insects very much, some insects are spherical, other are

flattened like a leaf or elongated like hairs, scales, spiny horns and other grotesque appendages. The head is composed of 6 segments, thorax 3 and the abdomen 9-10 segments and rarely with 11 or 6 segments.

Economically, insects are very important, they damage our agricultural, forest, floricultural, moricultural and horticultural crops. They also cause damage to grains, healths of humans, cattle's and other animals, lay waste our industries and bring death However, many insects are useful to man. They give us our clothing, food and medicine and numerous other useful products. They bring about the cross – pollination of flowers and thus, assets in setting of seeds and growth of valuable fluids. Keeping in view all above facts, the present topic was chosen.

NEED OF PROJECT

To study the diversity of insects in and around Peth Vadgaon city. To observe the different insect. The wood boring types generally favor Dying or dead branches on otherwise – healthy trees. While a few types attack green wood; some of these are serious pests capable of killing trees and causing major economic damages. Most wasps are beneficial in their natural habitat and are critically important in natural biocontrol.

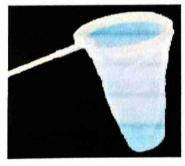

STUDY AREA

The study area of our project is in and around Peth Vadgaon city. We observed the insects in college campus. Some insects were collected from the farms near the college. The Monsoon is the luxurious period for insects. So in this natural vegetation large no. of insects are found. They live in their natural habitat. We had observed insect from the hilly area of Bahubali, kumbhoj area. There are varieties of insect which are beautiful but some are harmful from these insects we collected some insects and preserved it. The Peth Vadgaon is located at 16°83'N Latitude and 74°31' E Longitude.

MATERIAL AND METHODOLOGY

Insects have been collected from various spots of Peth Vadgaon city and college campus, during august 2017 to Feb. 2018 by using insect collecting net at 7 days interval during morning and evening hours. We observed different insects, and then by insect collection net we collected them. By using chloroform, insects were narcotized for preservation of insect they were kept in oven at 50 degree Celsius dehydration, To study insects in the surrounding area. We collected the insects like wasps, Moths, grasshopper, bees and some beetles etc. The specimens have been photographed with the help of camera. Common species of insects were preserved in insect box. After observations rare species, were released from where they were collected.

Light trap

OBSERVATION AND RESULTS

Long headed grasshopper

Classification

Kingdom: Animalia

Phylum : Arthropoda

Class : Insecta

Order : Orthoptera

Family : Acrididae

Type: Long headed grasshopper

Morphology

Identified by its green color with brown strips on its head, the long headed grasshopper gets its name because of its long head which has short and flat antennae. It has long hind legs as well. When disturbed, the long headed grasshopper opens its wings, makes noise and shows its pinkish –red abdomen. They feed on blades of grass are slow moving and poor flyers

Economical importance

Katydids display remarkable adaptations for defense, a consequence in part of their generally poor flying ability, which leaves them highly vulnerable to predation. Cryptically coloured species, which blend in with the environment, rely primarily on the mimicry of vegetation. The peacock katydid (*Pterochroza ocellata*), for example, precisely mimics the discoloration of a dead

Acrida turrita

Classification:

Kingdom: Animalia

Phylum: Arthropoda

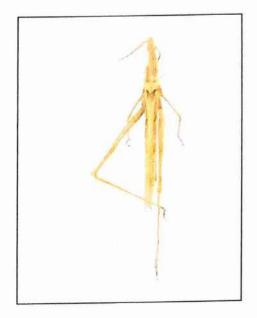

Class : Insecta

Order : Orthoptera

Family : Acrididae

Genus :Acrida

Species: turrita

Morphology:

Brown; tegmina long, narrow and pointed, extending when closed beyond the abdomen; head slender, longer than the pronotum by the length of the fastigium in front of the eyes; wings hyaline, pointed at the extremity

Economic importance:

Insects of this genus are omnivorous, and are a well known pest of many agricultural crops.

American Grasshopper

Classification:

Kingdom: Animalia

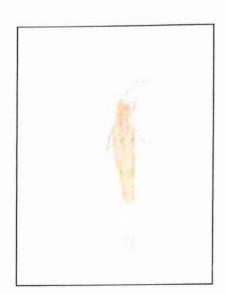

Phylum: Arthropoda

Class : Insecta

Order : Orthoptera

Family : Acrididae

Type : American grasshopper

Morphology:

The overall body colour gradually changes from pinkish-brown or reddish brown. It is a large, usually has cream strip extending from head to forewing. The adults bear fully developed wings with large dark brown spots on a lighter background. Adults are distinctly different in appearance from the immature stages. The length of male is 39-45mm and female is 42-45mm, saltatorial legs are present. It is feed on a variety of grasses and foliage of woody plants. It is pests

Economic Importance:

It is feed on a variety of grasses and foliage of woody plants. It is a crop pests.

Praying mantis

Classification:

Kingdom: Animalia

Phylum: Arthropoda

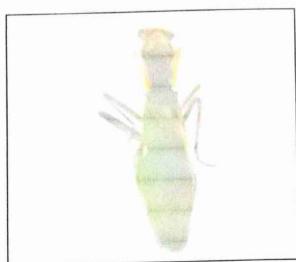

Sub-phylum: Hexapoda

Class: Insecta

Order: Mantoidea

Genus: Mantis

Specie: religiosa

Morphology-

The mantis thorax consists of a prothorax, mesothorax, and a metathorax. In all species apart from the genus Mantoidea, the prothorax which bears the dead and forelegs, is much longer than the other two thoracic segments. Mantises have two grasping spiked forelegs ("raptorial legs") in which prey item are caught and held securely.

Economical Importance:

Organic gardeners who avoid pesticides may encourage mantises as a form of biological pest control. Tens of thousands of mantis egg cases are sold each year in some garden stores for this purpose during fall, praying mantis female's deposit on ootheca on the underside of a leaf or on a twing. If the egg case survives winter the offspring's called nymphs, emerge in late spring or early summer.

Stick Insect

Classification:

S

Kingdom- Animalia

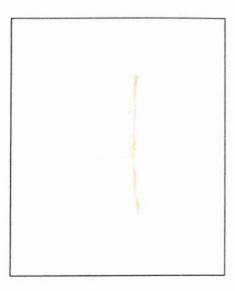

Phylum- Arthropoda

Class- Insecta

Order- Phasmida

Family-Baciilidae

Type- Stick insect

Morphology:

They are commonly called phasmids. Adult is relatively large, about 1.5cm to 30cm in length, greenish in colour. Head small, prognathus with long antennae, mandibulate type of mouth parts present. Prothorax small, meso and meta thorax are large; the legs are typically long and slender. These creatures look like stick so called stick insect.

Economical Importance:

Phasmids are herbivorous, feeding mostly on the leaves of trees and shrubs, and a conspicuous component of many <u>neotropical</u> (South American) systems. The presence of phasmids lowers the net production of early successional plants by consuming them and then enriches the soil by defection. Phasmatodea are recognized as injurious to forest and shade trees by defoliation

Man faced stink bug

Classification-

Kingdom: - Animalia

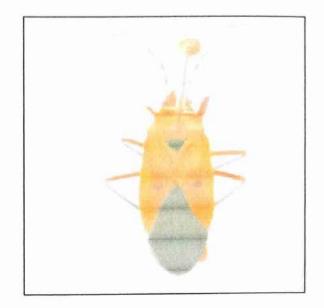

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type- Man faced stink bug

Morphology-

Known as the Man-faced Stink Bug or Man-faced Stink Bug, Catacanthus incarnatus is a species of true bug (Heteroptera) about 3 cms in length, native to Southeast Asia and India. The bugs are found in four bright color morphs: red, orange, yellow and cream with dark eye spots on their leathery scutellum (shield-like projection of their thorax) and forewings, advertising their noxious taste and also perhaps functioning as eyespots to mislead predators. Overall, the spotted pattern resembles a man's face when one views the dorsal side of the bug oriented head dow

Economical importance-

Catacanthus incarnatus has recently been found to be a costly pest to the cashew industry in Karnataka. India, where they can be found in large aggregates of up to 300 individuals on one tree. The bugs use their long stylet to pierce the skin of the cashew apple, and suck out the juices, leaving the fruit vulnerable to colonization by fruit flies and microbes. Damage to the cashew apple reducing the yield of cashew nuts, which are dependent on the apple for growth

Green stink bug

Classification-

Kingdom: - Animalia

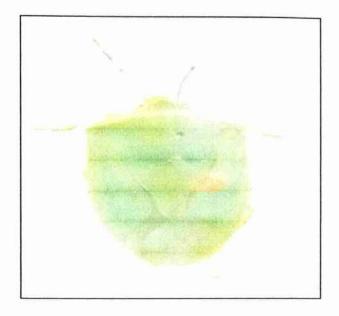

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type- Green stink bug

Morphology-

Like other stink bugs, adult green stink bugs are shield-shaped with fully developed wings. They are solid light green and measure 14 to 19 mm in length. The head and pronotum frequently are bordered by a narrow, orange-yellow line. Both adults and nymphs have piercing and sucking mouthparts for removing plant fluids.

Economic importance-

The green stink bug attacks the developing fruits of several cultivated trees, and the type of damage varies with the age of the developing fruit. The earlier feeding occurs in the development of the fruit, the more severe the damage. Injuries are usually caused by adults as the nymphs are not mobile enough to move to early-producing fruit trees like peaches or nectarines. However, in grapes, adults often lay eggs early in the season and the small nymphs will begin to suck the juices out of the maturing fruit.

Shield bug

Classification-

Kingdom: - Animalia

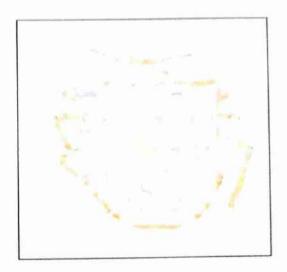

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type: Shield bug

Morphology:

Body is green or brown in colour. The scutellum is typically half of an inch long, as usually trapezoidal in shape, giving this family the name **shield bug.** The forewing developed in the form of hemielytra. It has tendancy to eject a foul smelling glandular substance secreted from pores in the thorax when disturbed.

Economic importance:

It is predator of other insects such as Mexican bean beetle, Japanese beetle and other pest insects.

Reduviid bug

Classification-

S

)

777

Kingdom: - Animalia

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Reduviidae

Type: Reduviid bug

Morphology:

These are predatory insects. Body measures about 4-40mm in length. These bugs are generally black or dark brown in colour. The most common species have an elongated head with a distinct narrowed neck, long legs and prominent segmented tube for feeding. The most distinctive features that the tip of the rostrum fits into a groove in the prosternum where it is rasped against ridges produce sound, a tactic often used to intimidate predators.

Economic Importance:

Some suck blood from vertebrates, including humans, and transmits diseases

Greater Banded Hornet

Classification-

U

S

Kingdom: - Animalia

Phylum: Arthropoda

Class: Insecta

Order: Hymenoptera

Family: Vaspidae

Type- Greater banded hornet

Morophology:

This is a medium-sized to large species. Queens reach 30mm or more, males average 26mm and workers average 24 to 26mm. There is some geographical variance within this species. Generally, the second abdominal segment carries a large area of bright yellow, while the rest of the abdomen is black. In Hong Kong, the head and sides of the thorax are usually reddish.

Economic importance:

Like other social wasps, homets build communal nests by chewing wood to make a papery pulp. Each nest has one queen, who lays eggs and is attended by workers who, while genetically female, cannot lay fertile eggs. Most species make exposed nests in trees and shrubs, but some build their nests underground or in other cavities. In the tropics, these nests may last year-round, but in temperate areas, the nest dies over the winter, with lone queens hibernating in leaf litter or other insulative material until the spring.

Hornets are often considered pests, as they aggressively guard their nesting sites when threatened. This is particularly true for hornets nesting close to human habitation, as their stings are more dangerous than those of bees

20100000000000

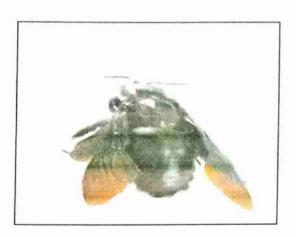

Kingdom: Animalia Phylum - Arthropoda

Class: Insecta

Order: Hymenoptera

Family: Apidae

Type- Bumble bee

. Morphology:

Bumble bees are social insect that are characterized by black and yellow body hairs, of the in bands. However dome species have orange or red on their bodies, or many be entirely black another obvious characteristic is the soft nature of the hair called pile that covers their entire body making them appear and feel fuzzy

Environmental Importance:

Bumble bees are increasingly cultured for agriculture use as pollinators because they can pollinate plant species that other pollinators cannot by using a techniques known as buzz pollination.

Hawk moth

Classification-

Kingdom: Animalia Phylum: Arthropoda

Class: Insecta

Order : Lepidoptera Family : Sphingidae

Type- Hawk moth

Morphology

Daphnis nerii known as the oliender Hawk-moth or army green Moth, the adults feed on nectar of a great variety of flower. They have a preference for fragrant sp. Like petunia, jasmine and honey suckle They are especially active in twilight time, hovering over the flower after sunset the caterpillar feed mainly on oleander leaves, highly toxic plant to which toxicity they are immune.

Economical Importance:

Particularly their caterpillars are major agriculture pest Due to their color they have ability to camouflage. But adults are not harmful.

Fruit sucking moth

Classification-

Kingdom: Animalia

Phylum: Arthropoda

Class: Insecta

Order : Lepidoptera

Family: Noctuidae

Type- Fruit sucking moth

Morphology:

The adult moth has fawn forewings with a variable pattern pale and dark lines and patches. Forewings are pattern brown, grey and buff, hindwings and abdomen predominantly clear yellow orange. The hindwings have 2-10mm black margin, white marginal spots, and a 3mm central black spot, hence the name **dot underwing.** The moth has a wingspan of about 16mm. Piercing and sucking type of mouth parts.

Economic Importance:

It considered a pest of citrus and other fruit trees.

Common Mormon

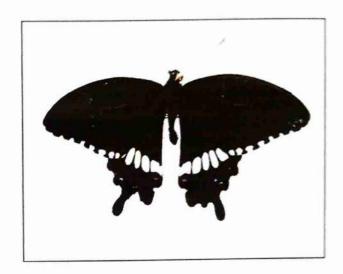

Classification-

Kingdom : Animalia Phylum : Arthropoda

Class: Insecta

Order : Lepidoptera Family : Papilionidae

Type: Common mormon

Morphology:

3

3

3

3

It is a large sized butterfly with awingspan about 90-100mm. The male has morph only. It is adark coloured swallow tailed butterfly. The upper forewings has a series of white spots decreasing in size towards the apex. The upper hindwing has a complete decaled band of elongated white spot. It may or may not is equal to three marginal red crescents. The male are smaller in size than the forms of morphs.

Economic importance:

In the early morning the butterflies fly low over the ground, and settle to bask for long periods on low vegetation. Both sexes will nectar at lantana and a wide variety of other wild and cultivated flowers.

Dragon fly

Classification:

Kingdom: Animalia

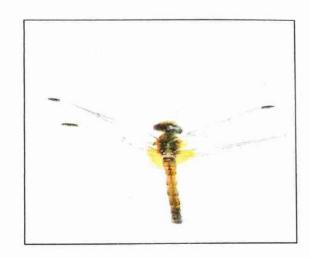

Phylum: Arthropoda

Class: Insecta

Order: Odonata

Family: Libellulidae

Type: dragon fly

Morphology:

Body colour is yellowish, measures about3cm and wingspan 4.9cm in length. Head large, highly movable; compound eyes are large occupying the greater part of head. Biting and chewing type of mouth parts. Abdomen is elongated, tapering and slender. They are strong fliers and can be seen well away from water. Hindwings are as usually shorter and wider than the forewings, at rest the wings are held open.

Economic Importance:

Dragonflies and damselflies are predatory both in the aquatic nymphal and adult stages. Nymphs feed on a range of freshwater invertebrates and larger ones can prey on tadpoles and small fish.

Mango stem borer

Classification:

Kingdom: Animalia

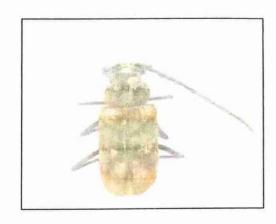

Phylum: Arthropoda

Class: Insecta

Order : Coleoptera

Family: Cerambycidae

Type: Mango stem borer

Morphology:

Medium-large sized, head prognathus; freely movable, mandibulate type of mouth parts; compound eyes well developed; serrate type of antennae present. Body colour light brown. Forewing modified into elytra, hindwing membranus used in the flight. Body wall heavily sclerotised, pigmented and legs are well developed. Abdomen sessile with 10 segments without anal cerci.

Economic Importance:

Powdery mildew, anthracnose, die back phoma blight, bacterial canker, red rust.

Rhinoceros beetle

Classification:

Kingdom: Animalia

Phylum: Arthropoda

Class: Insecta

Order: Coleoptera

Family scarabcidae

Type: Rhinoceros beetle

Morphology:

3

00000000000

These are among the largest of beetles in the world, named for the impressive hornlike structures on the frontal portions of males. These beetles have rounded, convex backs, and their coloration varies from black to mottled greenish gray. Some are shiny, almost metallic, whereas others may be covered with short, fine hairs, giving them a velveteen appearance.

Economic Importance:

On oil palm the economic threshold for rhinoceros still needs to be investigated Slight damage: limited signs of damage to fronds with little or no damage to spears. Medium damage: numerous damaged fronds but with new healthy spears.

Dung beetle

Classification:

Kingdom: Animalia

Phylum: Arthropoda

Class: Insecta

Order: Coleoptera

Family: Scarabaeidae

Type: Dung beetle

Morphology:

These beetles feeds partly or exclusively in dung. It can burry dung250 times heavier than itself in one night. It can grow to 3cm long and 2cm wide. Dung beetles are currently the only known non human animal to navigate and orient themselves using the milky way.

Economic Importance:

They improve nutrient recycling and soil structure. They also protect livestock.

Discussion

Insects found everywhere in the world and are dominant animals on the earth. In the ecosystem they play important role for balancing the nature. They are also associated with human in many ways. Insects are useful as well as harmful to human. They feed on plants, animals and act as parasitoid and predators against many insects' pests. They secrets pheromones and hormones to attract their own species. Man has been used these chemicals to control insects pests. They act as good biocontrol agents in IMP. Some useful products. They are also used in forensic science.

In other hand, some insect act as harmful pests of agriculture, forest, stored grains, household and domestic animals some insects transmit various diseases to human and animals class insect represents a very large diversity in ecological, morphological, physiological and reproductive characteristics. In the present work, morphological diversity has been studied.

Conclusion

The species of insects from 8 orders have been reported form Peth Vadgaon and adjuscent area. However, diversity plays an important role in sustainable development of a country or a region. This work will add great relevance for the development of the region by providing base line data.

CERTIFICATE

This is to certify that, Mr. Sathe Raju Ramdas have completed their project work on "Game Finder" for Shri. A ijaysinha Yadav Arts & Science College, Peth-Vadgaon. In practical fulfillment of the degree course "Bacholor of Computer Science (B.Sc-III)" during the year 2017-2018 affiliated to Shivaji University, Kolhapur.

The work has been carried out under my guidance. To best of knowledge and brief, the matter present in this project has not been submitted earlier and it has original work. This project works shows their hard work and sincere effort.

प्रस्तावना

प्रस्तावना :

प्रदूषण हा राक्षस पृथ्वीतलाव गीळंकृत करायला निधाला आहे. या राक्षसाने आपल्या पाशवी विळख्याने पर्यावरणास वेढले आहे. आजचे पर्यावरण आजारी पडले आहे. ते दुबळे आणि क्षीण बनले त्याला सशक्त बनविण्याचे काम आज तुम्ही—आम्ही सर्वानमोर आहे. आणि प्रत्येकाचे आज महत्वाचे काम पर्यावरण संरक्षणाचे व प्रदूषणाच्या नियंत्रणाचे आहे.

प्रदूषण हे अनेक प्रकारचे आहे. त्या हवा, जल, मृदा, ध्वनी इ. चा समावेश होतो. या प्रत्येक प्रदूषणाची कारणे मानवच असल्याचे आढळून येते. मानवाच्या पर्यावरणातील अतिरेकी हस्तक्षेपामुळेच प्रदूषणास सुरूवात झाली. प्रत्येक प्रदूषण हे त्याच्यापासुन सुरूवात होते. तर प्रदूषण मुक्ततेसाठी प्रत्येकाने वैयक्तीकरित्या प्रदूषणाच्या नियंत्राणासाठी प्रयत्न करणे गरजेचे आहे. एखाद्या गोष्टीची सुरूवात नष्ट केली तर ती गोष्ट नाहीशी होते.

प्रदूषणासारख्या विनाशकारी गोष्टींवर पूर्णपणे मात करण्याइतके आपले तंत्रज्ञान विकसित झाले नसले तरी प्रदूषण कमी करण्याचे अनेक मार्ग आहेत.

औद्योगिक उत्सर्जनामुळे होणारे हवेचे प्रदूषण विशिष्ट उत्सर्जन नियंत्रण योजना वापरून कमी होऊ शकले. प्रदूषकांची निर्मिती कमी व्हावी यासाठी प्रक्रियांमध्ये वदल करावा लागेल. प्रदूषकांची व्यवस्थीत उत्सर्जन होण्यासाठी धुराड्यांची उंची वाढविणे हा आणखी एक उपाय आहे. सार्वजनिक वाहतूक कार्यक्षण करून वैयक्तिक वाहनांचा वापर कमी केल्याने वाहनांचे प्रदूषण कमी होऊ शकेल. शिसेमुक्त प्रेट्राल वापरल्यास शिशाचे प्रदूषण कमी होते. वाहनांची देखभाल करून ती उत्तम स्थीतीत ठेवल्यास प्रदूषण कमी होण्यास हातभार लागतो. जलप्रदूषण प्रामुख्याने सांडपाणी व कारखान्यातून बाहेर पडणाऱ्या, अशुध्द पाण्यामुळे होते. पाण्यात सोडण्याआधी सांडपाणी शुध्दीकरण पध्दत वापरून व ।। प्रज्वलितो ज्ञानमय प्रदिप : ।।

-: प्रस्तावना :-

महाराष्ट्र हे देशातील प्रगत व पुरोगामी राज्य आहे. या महाराष्ट्राच्या निर्मितीत व वाटचालीत राजकीय पक्ष, व्यक्ती व इतर अनेक जणांचे योगदान महत्वपूर्ण आहे. त्यापैकी महाराष्ट्राचा जडणघडणी मधील महत्वाचे व पहिले महाराष्ट्राचे मुख्यमंत्री यशवंतराव चव्हाण हे होते. स्वातंत्र्यपूर्व काळात आणि नंतर अनेक राजकीय व समाज परिवर्तनाच्या चळवळी झाल्या. जनतेने संयुक्त महाराष्ट्राच्या निर्मितीसाठी जो रणसंग्राम केला त्याचा इतिहास म्हणजे तेथून मराठी जनतेच्या बलिदानाचा व स्वाभिमानाचा इतिहास आहे. यशवंतराव चव्हाण यांच्यापासून आज देवेंद्र फडणवीस यांच्या पर्यंत अनेकांनी महाराष्ट्राचे नेतृत्व केले. बलिदानातून निर्माण झालेल्या महाराष्ट्राचा सामाजिक, सांस्कृतीक व आर्थिकदृष्टया समृध्द व संपन्न करण्यासाठी तसेच आधुनिक शिखरावर पोहोचविण्यासाठी यशवंतरावजी चव्हाण यांच्या सारख्या प्रगल्भ नेत्यांनी महान प्रयत्न केले.

यशवंतराव चव्हाण यांचा जन्म १२ मार्च इ.स. १९१३ कराड मध्ये झाला. आणि त्यांचे शिक्षण टिळक हायस्कूल कराड येथे झाले. यशवंतराव चव्हाण यांनी १९५६—५७ पासूनच महाराष्ट्राच्या राजकारणावर कॉग्रेसचे वर्चस्व होते. यशवंतरावांनी विविध विचारांचे व गटाचे नेते एकत्र आणून महाराष्ट्राच्या उभारणीसाठी बेरजेचे राजकारण केले. याला 'यशवंतनीती' असेही म्हटले जाते. यशवंतराव चव्हाण यांनी घेतलेल्या निर्णयामुळे व त्यांच्या योगदानामुळे ते आधुनिक महाराष्ट्राचे शिल्पकार ठरले आहेत.

Department of Chemistry

Student Centric Activity: Project

2016-17

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- · Think positive to stay focused.
- Stay resilient.
- Make time to read.
- · Manage your time.

MR. SURYAWANSHI SAGAR RAMESH

ACKNOWLEDGEMENT

I am grateful to honorable Dr. Bachulkar M. Y. the Principal of Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon for having provided facilities and encouragement. I also grateful to Mrs. Pawar R. A. Head Of Department Of Chemistry, for having encouraged motivated and provided guidance for writing this project work, I am grateful to Dr. Mane C. B. Assistant Professor in Chemistry department and other faculty member for their constant support and blessing.

It gives me great pleasure to express my deep sense of gratitude of thanks to my colleagues and friend who have helped me directly in completing project work.

It gives me great pleasure to thanks all friends for their secretarial assistance. I also express my sincere thanks to publishers for the readiness and encouragement in bringing out this project as an ideal one. I strongly believe that the completion of project was possible of God's Blessing.

Place:- Peth Vadgaon

MR. SURYAWANSHI SAGAR RAMESH B.Sc.III, Chemistry

Preparation & Characterization of SnS thin film by SILAR method

CHAPTER 1

INTRODUCTION:-

Now a days there are increasing demand of number of products thus it is necessary to prepare more effective & useful compounds. In recent year metal chalcogenic thin layer have a number of applications in various fields of modern technologies including coatings, I nterfence filters, sensors, polarizer, thermoelectric cooling materials, narrow band filters solar cells photoconductors, IR detectors, waveguide coatings, magnetic & superconducting films microelectronic devices etc. Further semiconducting compounds have much importance because of their wide range of application in various fields of science and technology.

Among them Tin sulfide is an important semiconductor material which has great interest due to their importance in basic scientific research & potential applications for solid state solar cell. Electro conductive coatings, lithium ion batteries electrodes. The high absorbance of the films also used for photo thermal conversion of solar energy. Due to this outstanding properties of tin sulfide we choose these material to preparation. . tin sulfides semiconducting metal chalcogenide have attracted extensive interest due to its photoconductivity properties for solar energy conversion due to report of high absorption coefficient tin sulfide belongs to groups IV – VI of compounds formed with tin as the cation & sulfur as the anion the constituent elements are nontoxic cheap and abundant in nature leading to the development of devices that are environmentally safe & have public acceptability.

The tin sulfide is a very important optical semiconductor which can exhibit both p type and n type conduction depending on the more concentration of tin & sulfur. SnS thin film has an energy band gap of about 1.3ev between Si & Ga and has potential applications in current controlled devices sensor & laser switching device. SnS films are highly suitable for many applications in a number of solid state devices such as photovoltaic, photo electrochemical

Department of Chemistry

Student Centric Activity: Project

2016-17

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

Mrs. R. A. Pawar

Separtment of Chemistry

Shri. Vijaysinha Yadav Arts & science College PethVadgaon, Dist. Kolhapur.

Shri Shahu Shikshan Prasarak Seva Mandal's

Shri Vijaysinha Yadav College, Peth Vadgaon Department of Zoology

Student Centric Methods - 2016-17

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2016-17, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology, guest lecture and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

C 11.	Name of activity	Date	Outcome
Sr. No. 1	Seminars of the students	July to October 2016	Explanation methods, Referencing skill, Stage daring in the students,
2	Research Projects	December 2016 to March 2017	Research attitude, Reference searching, report writing skills
3	Guest lecture	25-03-2017	Awareness about biodiversity protection and conservation
4	Study tours	December 2016 & January 2017	To correlate the theoretical knowledge with experiential learning
5	Zoology corner- Annual question series in Zoology	July 2016 to March 2017	Referencing skill, Answer writing skill, presentation on paper

A Project Report on

"Preparation of Vermiwash and its efficiency as a antimicrobial activity against *E.coli* and *S.aureus*"

For the Partial Fulfillment of The Degree of BATCHELOR OF SCIENCE IN ZOOOGY

Submitted By Miss. Shubhangi Sanjay Kamble Miss. Priyanka Namdev Pharane

Under the Guidance of Asst. Prof. Mane N. R.

Department of Zoology,
Shri Vijaysinha Yadav Arts & Science College,
Peth Vadgaon, Dist. Kolhapur – 416 112.
2016-2017

Exam. No: 2014015500778973

Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon.

DEPARTMENT OF ZOOLOGY

CERTIFICATE

This is to certify that Miss. Priyanka Namdev Pharane has successfully completed project work entitled "Preparation of Vermiwash and its efficiency as a antimicrobial activity against *E.coli* and *S.aureus*" towards the partial fulfillment for the Degree of B.Sc. Zoology during 2016- 2017.

This report represents the bonafide work of the students.

(a)Md, 3.17 Project Guide,

Examiner

Head!

V.Y. College, Peth-Vadgaon, Kolhapur.

Declaration

We hereby declare that the present work in the form of project entitled "Preparation of Vermiwash and its efficiency as a antimicrobial activity against *E.coli* and *S.aureus*" is an original work carried out by us under the guidance of Mr. N. R. Mane Department of Zoology, Shri Vijaysinha Yadav College, Peth vadgaon

Place: Peth vadgaon

Date: 11/03/2017

Miss. Shubhangi Sanjay Kamble Okamble Miss. Priyanka Namdev Pharane (ution)

ACKNOWLEDGEMENT

We take this golden opportunity to express our heartful thanks and deep sense of gratitude to Dr. R. H. Atigre Head, Department of Zoology, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon. Who has been a constant source of encouragement to complete this project work and giving his excellent guidance and suggestion from time to time during course of this work.

We are thankful to Dr. S. V. Maske, Dr. A. S. Pawar, Mr. N. R. Mane and Mr. K. A. Madane Department of Zoology, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon for their inspiration and ever willing help. We are also thankful to Seema Biotech Talsande Kolhapur For providing Earthworm.

Lastly, we would like to thank all our friends, family members and well wishers for their goodwill to complete the project work.

Place: Peth vadgaon

Date: 11 / 03 /2017

Miss. Shubhangi Sanjay Kamble Miss. Priyanka Namdev Pharane

INTRODUCTION

It is well known that the earthworms have the ability to support the growth of plants and they can increase the fertility of the soil. There are about 3920 named species of earthworm so far reported worldwide. In India, so far, 509 species, referable to 67 genera and 10 families, have been reported (Kale, 1991). Earthworms play an important role in agro-ecosystem like enhancing decomposition, humus formation, nutrient cycling and soil structural development (Kladiviko et al., 1986). The practice of vermiculture is at least a century old but it is now being revived worldwide with diverse ecological objectives such as waste management, soil detoxification and regeneration and sustainable agriculture. Earthworms act in the soil as aerators, grinders, crushers, chemical degraders and biological stimulators. They secrete enzymes, proteases, lipases, amylases, cellulases and chitinases which bring about rapid biochemical conversion of the cellulosic and 2 the proteinaceous materials in the variety of organic wastes which originate from homes, gardens, dairies and farms.

Earthworms have been used in medicine for various remedies since 1340 AD (Stephenson, 1930). Earthworm has been recognized in orientalmedicine as anti- inflammatory, analgesic and antipyretic agent (Noda, 1992). It shows anticancer effect by preventing excess glucose

uptake (Nagasawa et al., 1991). Microorganisms are known to play a major role in soil characteristics; invertebrates are believed to act as regulators of antimicrobial activity. Earthworm surface excreta were found to have potent antimicrobial activity. It is also having anti coagulatory or fibrinolytic activity which results in the facilitation of blood circulation. The earthworm has been suspected to contain proteases which dissolve the fibrin clots or anticoagulants which selectively interfere with the intrinsic pathway of blood coagulation cascade. Medicinal properties of earthworm have been describe (Yegnanarayan et al., 1987). Earthworms have largely been used internally and externally as powerful aphrodisiacs. Anti inflammatory activity of earthworm extracts was studied. The anti inflammatory and antipyretic activities of biologically active extract isolated form whole earthworm, Lampito mauritii were determined. Antimicrobial potency of Eudrilus eugeniae extracts on certain plant pathogens were studied (Shobha and Kale, 2008). Anti tumor activities of earthworm fibrinolytic enzyme on human hepatoma cells were studied (Abhishek Mathur et al., 2010).

Ecology of earthworms

Earthworms are burrowing animals and form tunnels by literally eating their way through the soil. The distribution of earthworms in soil depends on

factors like soil moisture, availability of organic matter and pH of the soil. They occur in diverse habitats specially those which are dark and moist. Organic materials like humus, cattle dung and kitchen wastes are highly attractive sites for some species. Earthworms are generally absent or rare in soil with a very coarse texture, in soil and high clay content, or soil with pH < 4 (*Gunathilagraj*, 1996). Earthworms are very sensitive to touch, light and dryness. Water-logging in the soil can cause them to come to the surface. Worms can tolerate a temperature range between 5°C to 29°C. A temperature of 20°C to 25°C and moisture of 50–60 percent is optimum for earthworm function (*Hand*, 1988).

Biology of earthworms

Earthworms are long, narrow, cylindrical, bilaterally symmetrical, segmented animals without bones. The body is dark brown, glistening and covered with delicate cuticle. They weigh about 700–1400 mg after 10 weeks. They have a muscular gizzard which finely grinds the food (fresh and decaying plant debris, living or dead larvae and small animals, and bacteria and protozoa mixed with earth) to a size of 2–4 microns. The gut of the earthworm is inhabited by millions of decomposer micro-organisms. They are bisexual animals and cross-fertilization occurs as a rule. Copulation may last for about an hour, the worms then separate. Later the clitellum of each

worm eject cocoon where sperms enter to fertilize the eggs. Up to 3 cocoons per worm per week are produced. From each cocoon about 10–12 tiny worms emerge. Earthworms continue to grow throughout their life and the number of segments continuously proliferates from a "growing zone□ just in front of the anus. Earthworms contain 70–80 percent high quality lysine rich protein on a dry weight basis. They can be useful as animal feed. Usually the life span of an earthworm is about 3 to 7 years depending upon the type of species and the ecological situation.

Eisenia fetida

Eisenia fetida is also known as the red worm, red wiggler, brandling worm, dung worm, and the tiger worm. This is a common earthworm. 'Red' obviously refers to the worm's dark reddish color.'To brandle' refers to a movement of shaking or thrashing - which can also be described as 'wiggling.' This is a common movement for Eisenia fetida when it is harshly handled or fears predation.'Tiger' refers to the stripes. This worm has a striped appearance due to its body segments.'Dung' refers to one of the worm's common habitats. 'fetida' is derived from the Latin word 'fetid' which refers to a foul odor. This would be the coelomic fluid that this worm ejects

from its body when roughly handled. Each of these names including its scientific name Eisenia fetida relate to some it its physical characteristics.

It is found extensively around the world in various habitats and not only in the ground. This is a common worm to use as fishing bait but has also made a name for itself by being associated with garbage and waste! It is probably the most widely used worm for vermicomposting.

Classification

Domain - Eukarya

Kingdom- Animalia

Phylum- Annelida

Class - Oligochaeta

Order - Haplotaxida

Family- Lumbricidae

Genus- Eisenia

Species-fetida

This earthworm species is most commonly found in vermicomposting bins or on worm farms since it is such a commercial species. This species originated in Europe but now some people would even go as far as to say that it is haemerobiont which means that its habitat and geographical location would be totally dependent on human culture.

However, because it is an epigeic composter, it can often times be found in the woods within the ground cover of leaves. Otherwise it is found in manure piles on farms or fields. Experiments have been conducted that have tested the viability of Eisenia fetida in many different manure types including cow, goat, pig, rabbit, and horse. Though it does better in some than others, it does not suffer in any. It adapted well to many different climates including variable temperatures, moisture contents, and pH levels. Its digestive system, similar to other Annelids, runs from the mouth which is the first body segment to the anus which is its last body What makes this worm such an excellent species for segment. vermicomposting is the fact that it can digest organic materials and excrete them as usable broken down bits of material. This species is a well-known composter. It will feed on basically any organic matter. However, vermicompost experts will warn against dairy, oils, and meat - not because the worms won't eat them, but because these foods have the potential to draw the attention of other unwanted organisms into your worm bin. Over time the red wiggler has created several symbiotic relationships within its digestive system in order to adequately break down food fast enough.

Vermiwash

Vermi wash is a liquid fertilizer collected after the passage of water through a column of earthworm culture. It is also defined as an extraction of coelomic fluid of earthworm along with its excretory products and micronutrients from soil organic molecules. Vermi wash is rich in nutrients, hormones, amino acid, vitamin, and enzymes. Thus spray of vermi wash on plants helps in good growth. Along with growth promoting characteristics it is also observed that microorganims never degrade vermi wash. No bacterial and fungal growth is seen on vermiwash. It may be due to some antimicrobial activity. So, work was conducted to detect the antimicrobial activity of vermi wash. The brownish-red liquid which collects in all vermicomposting practices is also "productive" and "protective" for farm crops. This liquid partially comes from the body of earthworms (as worm's body contain plenty of water) and is rich in amino acids, vitamins, nutrients like nitrogen, potassium, magnesium, zinc, calcium, iron and copper and some growth hormones like "auxins", "cytokinins". It also contains plenty of nitrogen-fixing and phosphate solubilising bacteria (nitrosomonas,

nitrobacter and actinomycetes). Vermiwash has great "growth promoting" as well as "pest killing" properties. Buckerfield and Webster (1998) reported that weekly application of vermiwash increased radish yield by 7.3%. Thangavel et al. (2003) also observed that both growth and yield of paddy increased with the application of vermiwash and vermicast extracts. Farmers from Bihar in North India reported growth promoting and pesticidal properties of this liquid. They used it on brinjal and tomato with excellent results. The plants were healthy and bore bigger fruits with unique shine over it. Spray of vermiwash effectively controlled all incidences of pests and diseases significantly reduced the use of chemical pesticides and insecticides on vegetable crops and the products were significantly different from others with high market value (Suhane et al., 2007; Sinha et al., 2009). George et al. (2007) studied the use of vermiwash for the management of "Thrips (Scirtothrips dorsalis) and "Mites [(Polyphagotarsonemus latus) on chilli amended with vermicompost to evaluate its efficacy against thrips and mites. Vermiwash was used in three different dilutions e.g. 1:1, 1:2 and 1:4 by mixing with water both as "seedling dip" treatment and "foliar spray". Six rounds of vermiwash sprays were taken up at 15 days interval commencing at two weeks after transplanting.

Microorganisms are known to play a major role in soil characteristics, invertebrates are believed to act as regulators of antimicrobial activity. Earthworms live in an environment filled with various kinds of pathogens. Physiologically and evolutionally speaking, earthworm survival in such an environment must have favored the development of efficient defense mechanisms against various environmental pathogens during the course of evolution, including the production of certain antimicrobiological substances, especially active proteins and enzymes (Wenli et al., 2011).

Earthworm vermiwash and vermicompost were found to have potent antimicrobial activity. Hence, in the present research study the vermiwash prepared from the earthworm *Eisenia fetida* was tested against two bacterial strains *Escherichia coli* and *Staphylococcus aureus*.

Material and Methods

Experimental animal

Eisenia fetida (Plate No.1, fig. No.1) was selected as the experimental animal. E. fetida was procured from Seema Biotech Talsande, Kolhapur.

Preparation of Vermiwash

A plastic tank of dimensions 20 liters (PlateNo.1, Fig.No.3) was fitted with a plastic gate valve to facilitate drainage of elutes. Inside he barrel (bottom to top) three layers are arranged- first layer of brick pieces (30 cm), second layer of coarse sand (30 cm) and third layer of garden soil (30 cm). Above the soil, a layer of shade dried (~1kg) and powdered cow dung (~10 kg) was added. This was gently moistened with distilled water and the excess of water was drained off. The unit was moistened every day by adding Distilled water (80% moisture). On this, 300 adult Eisenia fetida were released(plate No.1, fig. No.2). After 120 days (3 months), elutes were collected daily by slowly. The color of vermiwash ranges from yellowish to black (Plate No.2, Fig. No.4). After 1 to 2 days the process of extraction has been completed. Collected elutes were stored at 4°C. 5 ml of stored vermiwash taken in 15 ml falcon tube (centrifuge tube) and centrifuged at 3000 rpm to 10 minutes. Pellet is discarded and supernant is taken in 10 ml syringe and vermiwash is sterilize by using syringe filter (0.22 μ m) (Plate No.2, Fig No.1) in another falcon tube and this used for analysis antimicrobial activity against *E.coli* and *S. aures*.

Bacterial strain-

For present study two bacterial strains were selected *E.coli* and *S. aureus*. The bacterial strains were obtained from the Department of microbiology, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon, Kolhapur and stored at 4°C.

Culture medium-

The media used for bacterial culture was Nutrient Agar.

Composition-

Beef Extract	3 g
Peptone	5 g
Agar	15 g
Distilled Water	100 ml
Final pH 6.8 +/- 0.2	

Preparation of Nutrient Agar-

Suspended 3 g of Beef extract, 5gm of peptone and 15 g agar in 100 ml of distilled water and checked the pH it should be 6.8-7. Heated this mixture while stirring to fully dissolve all components. Autoclaved the dissolved

mixture at 121 degrees Celsius for 15 minutes. Once the nutrient agar has been autoclaved, allow it to cool but not solidify. Poured nutrient agar into each plate and leave plates on the sterile surface until the agar has solidified(Plate No. Fig No. 4) and stored the plates in a refrigerator until use.

Antimicrobial activity-

Antimicrobial activity of vermiwash was studied by using Well diffusion assay. Firstly bacterial suspension is prepared in 0.86 % NaCl (normal saline) solution from culture strains taking loopful sample in sterile condition (laminar air flow). Prepared sample inoculated on the nutrient agar plate and distributed completely over the plate by sterile spreader (Plate No.2, Fig.No. 2). The two wells were prepared on inoculated nutrient agar plate by using cork borer (PlateNo.2, Fig No.3). 0.1 ml of sterile filtered vermiwash was added in wells of experimental nutrient agar plate and 0.1 ml of distilled water was added in control nutrient agar plate, incubated at 37°C Overnight and the zones of inhibition were recorded on next day (after 18 hours).

Fig.No.2 spreader

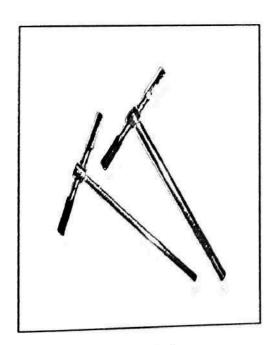

Fig.No.3 Cork borer

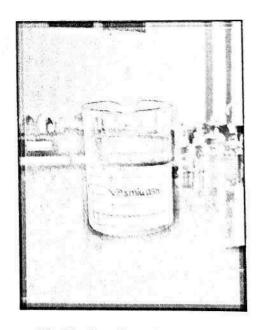

Fig.No.4 collected vermiwash

Observations and Results

Vermiwash prepared from *Eisenia fetida* was tested for antibacterial activities. For antimicrobial assay two strains of bacteria *E.coli* and *S. aureus* were used. The well diffusion assay on Nutrient agar plate indicated to inhibit the growth of bacteria. Vermiwash was able to inhibit the growth of E.coli at a maximum level 10 mm dimeter of inhibition zone and less inhibited in 6 mm. In the control plates there is no any inhibition zone observed around the well. In the well diffusion assay were *S. aureus* highly inhibited (10 mm-12mm inhibition zone) as compared to *Escherichia coli* (8mm-10mm inhibition zone).

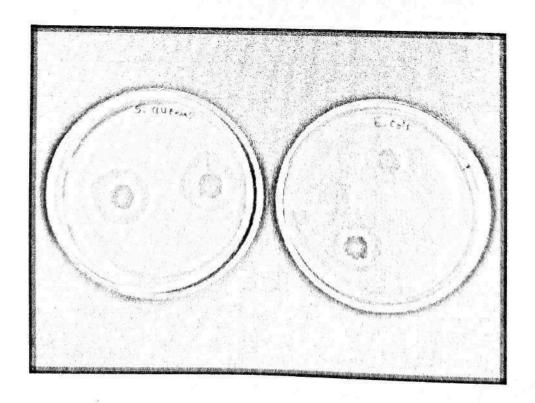

Fig. Inhibition zone on nutrient agar plate

DISCUSSION

The liquid elute collected from vermicompost unit with enormous quantity of water and called as Vermiwash (Zambare et al., 2008; Abdullah, 2008). However, there is no mention about the viability of the worms in these reports after the collection procedure. There are many investigations on benefits of earthworm. The gut extracts of earthworms have antibacterial and antifungal activity (Shobha and Kale, 2008 and Govindarajan and Prabakaran, 2012). The dried earthworm powder of two species shows a strong antibacterial activity against the S. aureus, P. mirabilis. (Prakash and Gunasekaran, 2011). Petroleum ether extract of dried earthworm powder showed maximum potency against Staphylococcus aureus in comparison to Streptococcus pyogens. Petroleum ether extract was found to possess maximum antifungal activity against Aspergillus niger in comparison to Candida albicans (Abishek mathur et al, 2010).

There have been several reports that earthworms and their excretory products (vermicast) can induce excellent plant growth and enhance crop production. Baker et al., (1997) found that the earthworms (*Aporrectodea trapezoids*) increased growth of wheat crops (*Triticum aestivum*) by 39%, grain yield by 35%, lifted protein value of the grain by 12% and also resisted

that earthworms significantly altered soil structure and water holding capacity. The grain yields of wheat and soybean increased by 47 and 51%, respectively, Palanisamy (1996) reported that earthworms and its vermicast improve the growth and yield of wheat by more than 40%. Bhatia et al. (2000), Sharma (2001) and Suthar (2010a, 2010b) also reported better yield and growth in wheat crops applied with vermicompost in soil. Kale et al. (1992) who studied on the agronomic impacts of vermicompost on rice crops (*Oryza sativa*) reported that greater population of nitrogen fixers, actinomycetes and mycorrhizal fungi inducing better nutrient uptake by cropsand better growth. Jeyabal and Kuppuswamy (2001) studied the impact of vermicompost on rice legume cropping system in India.

There are several investigations on medicinal properties of earthworm, vermiwash and vermicompost. Several proteases were separated from the earthworm they could dissolve casein, gelatin, and albumin (Keilin, 1920). Mihara et al. (1983) isolated a group of proteases with fibrinolytic activity from the earthworm Lumbricus rubellus. It is demonstrated that the earthworm crude extract has the ability to kill the cancer cells directly in vitro (Zhang and Wang 1987) and inhibit the occurrence and development of tumor in vivo (Wang et al., 1986). Furthermore, it has been proved that the

earthworm proteases enhance the curative effects by both radiation therapy and chemotherapy (Zhang et al., 1991; Zhang et al., 1992).

Despite the abundance of evidence suggesting earthworms could contribute significantly to improving in situ xenobiotic remediation through mixing, aeration, and improved soil fertility, there has been surprisingly little research on their use in a bioremediation strategy and especially the textile bioremediation. (Elsas and Heijnen, 1990, Wiegel and Wu, 2000).

The present study clearly indicates that the *Eisenia fetida* vermiwash have unknown bioactive compounds to inhibit the growth of bacteria. Hence, vermiwash has a good potential to develop a new drug.

Conclusion

The result of present study indicates that vermiwash has antimicrobial activity against *E.coli* and *S.aureus* forms inhibition zone in nutrient agar plate. The results obtained from the present investigation reveals that it can be used for production of drugs against the microorganisms *E.coli* and *S.aureus*. We also recommend that these baseline observations need to be verified by conducting further detailed work.

Dager of

आधुनिक शतकीय तत्वज्ञानात एक योर शमाजवादी विचारवंत् म्हणून कार्ल मार्क्सचे स्थान असामान्य व अजरामर अतिले अहि शास्त्रीच शमानवादाला जन्म देगाणा ह्या महान विचारवंताचा जनम इ मे, 1818 रोजी प्रशिथाच्या ए। इन प्रांतातील द्रायर येथे एका मध्यमवर्गीय ज्यू कुडुंबांत काला त्याचे वजील प्रथम परिश्वन होते. परंतु नंतर त्यांनी ख्रिश्चन द्यमिया स्वीकार केला होता. त्यामूळे मार्क्सला ण्यू द्यमीय असन्याचा त्रास सहन करावा लागला नाही लहानपनी मार्क्श अन्यंत बुद्धीमान होता इतिहास, तत्वज्ञान व कायदा या विषयांची त्याला विशेष भावउ होती. कायद्याच्या अभ्यासासाठी त्याला वयाच्या सतराव्या वर्षी वीन विदयापीठात पाठविञ्यात भाले 1835 साली कायद्याची पदवी संपादन केल्यानंतर प्रदील रिक्षां भारति तो विधिन विख्वविद्यालयात् दाव्यल सालाः वयाच्या तेविसाव्या वर्षी 1841 माली माकरीने ' डॉक्टर ऑफ फिलॉसाफी ' ही पदवी मिळविली. त्यांच्या प्रवंधाचा विषय होता, " उमोक्रिटसरी प्रकृतिवादी तत्वरान व एपिक्यूरसचे प्रकृतिवादी तत्वरान यामधील फरकः । त्यानंतर वान विश्वविद्यालयात प्राध्यापक म्हणून अध्यापनीवे कार्य करुवाला त्यांचा विवार होता. परंतु त्यांच्या क्रांतिकारक विचारस्वाधिक व्यांना तेथे नोकरी मिळ्ली नाही. त्यामुळे माकरीने पत्रकाराचा व्यवसाय सुरु केला. पुढे तो । व्हेनिस टाउम्स ' या वृत्तपत्राचा संपादक आला. परंत् त्याच्या उद्य व क्रांतिकारक लिखाना मुळे सरकारने त्याला जर्मनी सोर्न जाव्याचा आदेश दिला. 1844 मध्ये मार्क नर्मनी भोडून फ्रान्समध्ये गेला. तेथे त्याने समानवादी साहि-त्याचा अभ्यांस केला फान्सला जान्यापूर्वी म्हननेय संपादक अराताना मार्क्सचा जेनी नावाच्या मुलीशी विवाद झाला होता. या पती पत्नीये एकमेकावर उत्कट भेम होते. जेनी भापत्था पतीच्या नशिवात, अमात आणि सगउयात त्याची केवळ

सहसमिचरिगी होती एवदेच नहे तर सर्वतीपरी सुनानतेने मािं। गाढ तळमळीने या तिन्हित ती शक्रियपंगे समस्स आली होती पॅरिस येगे प्रुंगों मािंग लुई क्लेंक यांच्या सार्थियाने मार्क्सने क्रिंग कम्युनिसम् व रामकीय मर्थास्त्र याँचे सह्ययन केले येथेच त्याची क्रिअरिक एंग्ल्सरी मोळ्य आली ह्या मेटीचे पुढे गाढ मेंनीत रूपांतर साले मािंग ही एक धानिक व जिवलग मित्र म्हणून मार्क्सिका जीवनात एंशल्सला फार मोहे महत्त्व होते. 1848 मध्ये मार्क्स आहि। एंगल्स यांनी मंध्रुक्त रीतीने वास्यवादी प्रमाचा जालीरनामा (Communist Manifesto) प्रकाशिल केला. मार्क्सने या ग्रंथाव्यारे शास्त्रीय समामवादी तत्वप्रवाली जागांपुरे हेवली, 1849 साली कार्ल माक्सी लंडनला गेला माक्सीचे इंग्लंडमधील भायुष्य फार त्रास्निचे व दारिद्रयावस्थीत शेले. संशोधन, वाचन आणि लेखन यांमध्ये माक्सीने आपले संपूर्व जीवन द्यालिवले व्याने 1864 मध्ये Socialist International नावाची मजूर संघटना स्थापन केली. 1864 मध्ये मार्क्सचा वास केपिटल हा ग्रंथ प्रसिद्ध झाला. एंगल्सच्या मदतीने व्याने हा ग्रंथ पुरा केला या ग्रंथाचा पहिला क्वंउ मार्क्सक्वा ह्यातीत प्रशिष्ट् होजन बाकीचे दीन त्याच्या मृत्युनंतर एँगल्सने प्रशिष्ट् केले. इंग्लंडमधील संपूर्ण उप वृष्णित्या वास्त्रव्यात मार्क्सला अत्यंत ह्लाब्धीचे दिवस कारावे लागते. साध्या आणि स्वस्त दशच्या दीन ब्लील्यांच्या घरात ती राहत होता पत्नीचे आजारपण आणि मुलाँचा शाँभाळ यामुके माकर्मता कींडुंबिक सुरव बेतावेच मिळले होते. कुडुंबाचा खर्च चालिवव्यासाठी आपले कृपेडे, चीजवस्तू गहान ठेवव्याचा प्रसंग अनेक वेढा मार्क्सवर आला होता. दारिद्रशांचे खटके सातत वसत् असत्रानारी माक्सीने आपले लेखन व संघटना-त्मक कार्य शेवटपर्यत भोउने नस्ते नाही म्हरते तरी एँगल्सने त्याला अनेक वेढा आर्थिक शाहाच्य केले होते 14 मार्च, 1883 रोजी लंउन येथे कार्ल मार्क्स्टो निद्यम अति.

मार्क्सचे ग्रॅंथलेळन १-काल मार्क्सन आपल्या विविध ग्रॅंथांद्वारे समानवादी विचार प्रकट केलेले आहेत. भाँउवलशाही समानचि दोष , भाधिक शोषन , वर्गसंघर्ष , कामगारांची क्रांती, वर्ग-विरहीत आनि राज्यविरहीत समान उत्यादीविषयक विचार त्याने आपल्या ग्रंथातून स्पष्ट केले आहेत. मार्क्सचे काही महत्त्वाचे ग्रंथ पुढीलप्रमाने सांगता येतील

जन्म- ६-में १८१८, मृत्यू - १४ मार्च - १८८३.

- 1 . Holy Family (1845)
- 2. The Poverty of Philosophy (1847)
- 3. The council communist Manifesto (1848)
- 4. civil War and closs struggle in france.
 (1849)

- 5. A. Contaibutation to the critique of political Economy.
- 6. Value price and profit (1865)
 - 7. Das capital (1867)
- 8. The critique of the Goetha Programme. (1891)
- g. Eighteenth Brummaire of Louis Bonaparte (1894)
- 10. Revolution and counter Revolution (1894).

अशा मकारे माकरीने विविध स्वरुपाचे ग्रंथलेखन केले असले तरीही त्याचे कम्युनिस्ट मॅनिफेस्टो व कॅपिटल हे दोन ममुख ग्रंथ म्हबून ओळखले जातात.

कम्युनिस्ट मॅनिफेस्टो (communist manifesto)
हा ग्रंथ मार्क्सने 1848 मध्ये लिहिला फ्रेडिक एंगल्सच्या
मदतीने हा ग्रंथ पुरा आलाः माधिक घटकांवर माधारलेल्या
वगिमधील संधर्षाचा पूर्व - इतिहास , भाद्युनिक काळातील
भांउवलदार भाित मन्नूरं थामधील संधर्षः भांउवलशाहीची
विनाशाकडे पाट्चाल , मनुशंधी संधरकवृत्ती भाित मनुशंनी
प्रत्यक्षात करावथाचा कार्यभाग इत्यादीसोवन किंवा रत्यादीः
संवंधीय विचार था ग्रंथान माउने भाहनः था ग्रंथानिषयी
बद्गन्ति रसेल भाँनी असे म्हटले भाहे की, 'साम्यवादी
पक्षाचा नाहीरनामा , हा ग्रंथ भाक्सने एंगल्सच्या मदतीने
लिहिला असून तो इतिहासात रानकीय विचारांचा एक उत्कृष्ट
व अग्रेसर ग्रंथ म्हजून भोळ्याला जातोः'' खा ग्रंथाचे
गगातील सर्व भाषांत्रन भाषांतर स्रालेले भाहे साम्यवादी

विचारांची भोळख करून देगारा हा ग्रंथ म्हणते शाम्यवादाचे

दास केपिटल (शिव्हा (शिव्हा क्यां का ग्रांध मार्क्सन इ.स. 1867) मध्ये लिहिला. या ग्रंधाचे तीन व्यंड असून त्यापिकी दोन व्यंडाचे मकाशन मार्क्सव्या मृत्यूनंतर (1885 व 1894) एँगल्सने केले ह्या ग्रंधात ऐतिहासिक मोतिकवाद, अतिरिकत मूल्य, माँउवल-शाहीचे दोष दारिक्रा, वेकारी व शोषण नसलेल्या शज्याची स्थापना उत्यादीविषयक विचार मामिकपणे माउलेल्या आहेत. मार्कस्ट्या विचारीवर पडलेला समाव 8.

हेगेलचा तत्त्वरानाचा प्रभाव ३-

माकरीने वॉन व व्यक्तिन
या विद्यापीठाँत हेमेलच्या तत्वत्तानाचा अध्यास केला होता
हेमेलच्या द्वंदात्मक भौतिकवादाचा परिजाम माकर्सच्या भौतिकवादान्वर अलिला अहि विरोधिवकासवादाची कल्पना माकरीन हेमेल-कंड्रन धेतलेली दिसते वास्तविक हेमेल अध्यात्मवादी होता, तरीपन व्यव्यावादाची कल्पना दिशेच्या वावतीत सार्थ्वीच वाटते माकरीन हेतिहासिक भौतिकवादाची मीमांसा करताना हेमेलच्या सिद्दांतातील व्यह्दीक तत्त्व घेतली आहेत असे दिसून येते

प्रेंच समानवादी साहित्याचा प्रमाव : प्रुधा , सेंट सायमन , चाल्स फेरियर या फ्रेंच विचारवंताचा मार्क्सच्या तत्वरानावर परिगाम आलेला होता. आपल्या फ्रान्सच्या वास्तव्यात मार्क्सन फ्रेंच समानवादी साहित्याचा अध्यास केला होता.

उंग्लिश विचारवँनांचा प्रमाव १ में उँम स्मियं, रिकार्री विल्यम यामसन , ते एस मिल उत्यादी उंग्लिश विचारवंनांच्या आर्थिक व सामानिक विचाराँचा प्रमाव मार्क्सच्या साम्यवादी

- मार्क्श्चा ऐतिहासिक भौतिकवादी मीभशिवशील टीका 8-
- र कार्ल मार्क्सच्या उतिहासाच्या भौतिकवादी मीमाँसेत केवळ आर्थिक घटकाँचास विस्तार केलेला अहि कारण समाजासे परिवर्तन होताना आर्थिक घटकांबरोबरस उत्तर घटकही कारणीभ्रत उरतात धर्म, संस्कृती, शष्ट्रप्रेम उत्यादी घटकाँतून उतिहास घडविला जातो
- 2. रसेल थांच्या मते, राजकीय जीवनातील महत्वाच्या घडामोडी भौतिक परिस्थिती आि मानवी भावना (उच्छा) थांच्या परस्परांसंबंधानून होत असतात. केवळ भौतिक वस्तुवादावर उतिहास आधारलेला नसतो; तर तो राष्ट्रवादावर आधारलेला असतो-
- 3. वेपर याँच्या मते , स्वाभिमान आणि महत्वाकाँका यासाठी राजकीय सत्तेत व समाजव्यवस्थेत वदल धउतिला जातो. पीपची सत्ता , साम्राज्यवाद याँच्या पाठीरी आधिक घटक कारणीभूत नसतो.
- र सेवार्रनच्या मते , मानवी र्शतहासात् आधिक हाटक हा एकमेव हाटक नसून रतरही हाटक (यम , संस्कृती, राष्ट्रप्रेम, महत्वाकंबा र.) महत्त्वाचे असतात.

जॉन गॅलवेश व वील शेस्टीटर %-

या अमेरिकन अधिरास्त्रशिका मते, मार्किन केले इतिहासार भीतिकवादी विवेचन कालबाट्य व दिसामूल करनारे आहे. कारन भाँउवलगाही समानव्यवस्थेतून समानवादी व्यवस्था निमान होने कठीन आहे. भाँउवलगाही सो भाँउवलगाहीही नाही सान अहे. नाही सान अहे.

ऐतिहासिक मौतिकवादातून मार्क्सने साम्यवादी समान्त्रयनेने जो वर्णन केलेले आहे ते काल्पनिक व अपूर्ण स्वरूपाचे वाटते. कारण आन रशिया, चीन या वेशांनी मार्क्सवादी प्रणाली स्वीकारूनही तेथे राज्यविरहीत समानव्यवस्था निर्माण आलेली नाही उलट राज्ये अधिकच बढ्कट व शिकतशाली बनलेली आहेत.

भारता प्रकार मार्क्सिंग पितिहासिक भौतिकवादावर टीका होत असली तरीही त्याने मानवी इतिहासांग्रे आधिक दृष्टीकोणातून केलेले. विश्लेषण हे अर्थपूर्ण व महत्वांग्रे मानले जाले.
असा रितीन रितिहासांग्रे भौतिकवादी विवरण करून मार्क्सने साम्यवादी समानस्यना १ ही पूद्धी अपरिहार्थ अवस्था अहि असे राजकीयं भविष्य वर्तिवले होते.

माक्स्चा वर्गसंखष्ठिम सिद्धांत (Theory of class struggle)

्कम्युनिस्ट मॅनिफेस्टो । या ग्रंथात माकर्शने पुढील शवहात वर्शसंघषिचे विश्लेषण केलेले आहे " आजपूर्यतंचा संपूर्ण समाजाचा इतिहास हा वासिंगपिताव इतिहास माहे- स्वामी जाि युलाम , उच्चकुलीन आि सामान्य , नमीनदार आि कुळ , कार्श्यानदार व कामगार, घोउक्यात शांगावयाचे तर गुल्म करगारा आणि गुल्म भोसगारा असे दीन्ही वर्ग नेहमी परस्परांचा विरोधात असतात. या दोन्ही वर्गात कछी गुप्तपणे तर कछी उद्युपणे असा सतत. संबर्ध चालू असून व्या संबर्धात्म कथी क्रांतीच्या मार्गान समानायी प्रनर्श्यना होते, तर कछी या दोन्ही वर्गाचा परस्परांशी संबर्ध करताना सार्थ्याच ममानात नारा होतो (The history of all hither to existins society is the history of class struggles. Freeman and Slave, Partrician and Plebelan, lord and Serf, guild-moster and journeyman. in a word, oppressor and oppressed, stood in constant opposition to one another, carried on an uninterrupted, now hidden, now open fight, afight that each time ended, either in a revolutionary reconstitution of society at large, or in the common ruin of the contending classes.)

मार्क्सने इतिहासाचा आधार भौतिकवाद आहे हे शौधन त्या भौतिकवादी तत्वानुशार समानात वर्गसंघर्ष नेहमी अटळ असते असे म्हटले आहे. त्याच्या मते, मानवी समानाच्या उद्यापासून इतिहासाची मीमांसा केली तर असे आढळून येते की, इतिहासाच्या प्रत्येक अवस्थित एक वर्ग होते. मह्ययुगामच्ये शरनामदार आहि। कुळे, श्रुदास असे वर्ग होते, तर आधुनिक भाउवलशाही समानव्यवस्थित भाउवलदार भानि मनूर असे वर्ग निमान झाले आहेत. भाउवलशाही समानात

Shri. Vijaysinha Yadav College Peth Vadgaba, Dist. Kelhapur. प्रस्तावना :--

महाराष्ट्राची निर्मिती होऊन 55 वर्षे उलटली असली तरी आजही संयुक्त महाराष्ट्राची चळवळ ही मराठी माणसाच्या जिव्हाळयाचा विषय आहे. संत महंतांची , शुरांची व वीरांची भूमी असलेल्या महाराष्ट्राला वैभवशाली ऐतिहासिक व सांस्कृतिक वारसा लाभला आहे. छत्रपती शिवरायांचा महाराष्ट्र, संतश्रेष्ठ ज्ञानेश्वर माऊलीचा व संतमालिकेचा कळस म्हणून ओळखला जाणाऱ्या तुकाराम महाराजांचा महाराष्ट्र म्हणून ओळखला जातो. याचा आम्हास आजही अभिमान वाटतो. 19 व्या 20 व्या शतकातील इतिहास सेशोधकांनी शिवाजीराजे म्हणजे योगपुरूष, महापुरूष म्हणून त्यांचा गौरव केला. याच यूगपुरूषाने मराठी रयतेमध्ये स्वराज्य, स्वधर्म, स्वभाषा व संस्कृतीविषयी जागृती घडवून आणली. यांमुळे मराठी माणसात अस्मिता निर्माण झाली. महात्मा फुले, महर्षी कर्वे, राजर्षी शाहू महाराज, डॉ. बाबासाहेब आंबेडकर, कर्मवीर भाऊराव पाटील, डॉ.बापूजी साळुंखे इत्यादींनी समाज प्रगतशील व पुरोगामी होण्यासाठी समाजसुधारकांची चळवळ गतिमान केली. राजकीय, धार्मिक, सामाजिक, शैक्षणिकजागृती यांमुळे भारतीयांमध्ये राष्ट्रवाद वाढीस लागजा. यामधून 1947 मण्ये भारत स्वतंत्र झाला. भाषावार प्रांतरचनेची मागणी मोठया प्रमाणात वाढली. महाराष्ट्रातही मराठी भाषिक राज्याची मागणी करणारी ' संयुक्त महाराष्ट्र चळवळ' इ.स. 1946 प्यसून सुरू झाली. या चळवळीच्या कर्तबगारीमुळे 1 में, 1960 रोजी महाराष्ट्र राज्याची निर्मिती झाली. याचा सविस्तर वृत्तांत आपणास पुढीलप्रमाणे अभ्यासता येईल.

Department of Chemistry

Student Centric Activity:Project

2017-18

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- Think positive to stay focused.
- Stay resilient.
- · Make time to read.
- Manage your time.

Chapter 1

Introduction: Spinel

1.1 Introduction

Materials science in a primitive form is one of the oldest forms in the field of engineering and applied science, which is concerned with the relation of composition, structure and processing of materials to their properties and uses. The role of chemistry in material science is a vital one and has in turn made enormous contributions to this field. Solid-state chemistry has emerged as a major subfield of chemistry and established itself as an applied science of space age. This branch of science has been utilized in studying the various aspects of solid materials. Among the different types of materials, transition metal oxides are well familiar with their various kinds of applications in science and technology. These transition metal oxides play a very crucial role in the field of ceramics, electronic materials, magnetic materials, semiconductors, oxide-composites etc., and exhibiting interesting properties.

The mixed-metal oxides have gained an enormous importance in various fields. Their physico-chemical properties such as magnetic permeability, high electrical resistivity makes them useful for application in magnetic and electric devices. Apart from their technological importance as magnetic materials, mixed-metal oxides have also well established catalytic as well as gas sensing properties.

All these properties mainly depends upon their chemical composition and microstructure of the materials. Generally, mixed-metal oxides are prepared at high sintering temperature by using solid state reaction. On the other hand, like for gas sensing and catalytic activity, lower density and high surface area materials are also preferred. In recent years different modern methods have been developed in this area. Study of these

Student Centric Activity: Project

2017-18

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.

Patience and thinking ability increases.

Mrs. R. A. Pawar

Shrl. Vijaysinha Yadav Arts & science College Peth Vadgaon, Dist. Kolhapur.

Shri Vijaysinha Yadav College, Peth Vadgaon Department of Zoology

Student Centric Methods - 2017-18

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2017-18, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology, drawing/painting competitions under Life Science Carnival, guest lecture and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

Sr. No.	Name of activity	Date	Outcome

Introduction

Biodiversity is the variety of life and its processes and the genetic difference among them and communities and ecosystem in which they occur. Biodiversity has 3 components genetical, organismal and ecological.

- Genetic diversity: Nucleotides, genes, individual populations.
- Species diversity: Individual, population species, genera, families' phyla, kingdoms.
- Ecological diversity: Ecosystem, biographic, provinces.

The biodiversity that exist today is a product of over 35 billion years of evolution, involving speciation, migration, extinction and human influence. During the last 100 years great losses of genetic diversity have been noticed. Many species are on the verge of extinction. India shows extensive reserve of biological resources but, biodiversity in India is at a higher risk of extinction because of high degree of endemism.

Today, species are going to extinct at an acceleration and dangerous manner, because of human activities. They directly affect species and ecosystem such as habitat loss, over exploitation, climate change, pollution, etc. According to vitousek more than two million species will be loosed in the next decade of which 50% will be arthropods. Due to large and diverse ecosystems, India is considered to be one of the richest varieties of plant, animals and microorganisms have been estimated from the world. (Rajamany,1993)

India is ideal place for forests and wildlife However being the second most populated country in the world and enormous pressure of exploding human population, the country shrinking the forest and wiping of the rich fauna and flora. To conserve the remaining greenery and the rare life forms. India has made efficient in-situ and ex-situ conservation programs. These efforts have established protected area network in the country.

Insect affect many aspects of our lives. Despite their small size, all kinds of natural and modified, terrestrial and aquatic ecosystems support communities of insect that present a bewildering variety if life styles, forms and functions (Gullan and Cranston, 2010) Insets are the most varied organisms on the earth. Almost exactly half 50.8% of the species of living thing and 72% of all animals are insects, about 3% of all species of insects live freshwater and perhaps 0.1% are found in marine intertidal zone (Howell et al, 1978).

The presence of insects at a particular habitat depends on a wide range of factors availability of food and climate conditions (Allan et al, 1973). They are the most important other than abundance of larval food, plants conditions suitable for egg laying and suitable flowers for feeding of adults which govern the distribution of insects The abundance of predators and parasitoids the prevalence of disease also determine the populations of insects (pollard and Yates, 1993).

Insects are characterized by distinct body division viz. head thorax and abdomen; a single pair of antennae, three pairs of walking legs and one or two pairs of wings (Mani 1994). The integument is hardened into an exoskeleton, covering the body muscles with striated fibers and arranged segmentally. Some insects are smaller than the larger protozoa but others are larger than the mammals. The shapes of insects very much, some insects are spherical, other are

flattened like a leaf or elongated like hairs, scales, spiny horns and other grotesque appendages. The head is composed of 6 segments, thorax 3 and the abdomen 9-10 segments and rarely with 11 or 6 segments.

Economically, insects are very important, they damage our agricultural, forest, floricultural, moricultural and horticultural crops. They also cause damage to grains, healths of humans, cattle's and other animals, lay waste our industries and bring death However, many insects are useful to man. They give us our clothing, food and medicine and numerous other useful products. They bring about the cross – pollination of flowers and thus, assets in setting of seeds and growth of valuable fluids. Keeping in view all above facts, the present topic was chosen.

NEED OF PROJECT

To study the diversity of insects in and around Peth Vadgaon city. To observe the different insect. The wood boring types generally favor Dying or dead branches on otherwise – healthy trees. While a few types attack green wood; some of these are serious pests capable of killing trees and causing major economic damages. Most wasps are beneficial in their natural habitat and are critically important in natural biocontrol.

STUDY AREA

The study area of our project is in and around Peth Vadgaon city. We observed the insects in college campus. Some insects were collected from the farms near the college. The Monsoon is the luxurious period for insects. So in this natural vegetation large no. of insects are found. They live in their natural habitat. We had observed insect from the hilly area of Bahubali, kumbhoj area. There are varieties of insect which are beautiful but some are harmful from these insects we collected some insects and preserved it. The Peth Vadgaon is located at 16°83'N Latitude and 74°31' E Longitude.

MATERIAL AND METHODOLOGY

Insects have been collected from various spots of Peth Vadgaon city and college campus, during august 2017 to Feb. 2018 by using insect collecting net at 7 days interval during morning and evening hours. We observed different insects, and then by insect collection net we collected them. By using chloroform, insects were narcotized for preservation of insect they were kept in oven at 50 degree Celsius dehydration, To study insects in the surrounding area. We collected the insects like wasps, Moths, grasshopper, bees and some beetles etc. The specimens have been photographed with the help of camera. Common species of insects were preserved in insect box. After observations rare species, were released from where they were collected.

Light trap

OBSERVATION AND RESULTS

Long headed grasshopper

Classification

Kingdom: Animalia

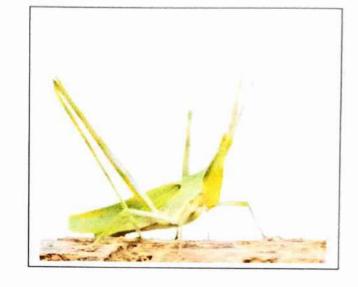

Phylum : Arthropoda

Class : Insecta

Order : Orthoptera

Family : Acrididae

Type: Long headed grasshopper

Morphology

Identified by its green color with brown strips on its head, the long headed grasshopper gets its name because of its long head which has short and flat antennae. It has long hind legs as well. When disturbed, the long headed grasshopper opens its wings, makes noise and shows its pinkish –red abdomen. They feed on blades of grass are slow moving and poor flyers

Economical importance

Katydids display remarkable adaptations for defense, a consequence in part of their generally poor flying ability, which leaves them highly vulnerable to predation. Cryptically coloured species, which blend in with the environment, rely primarily on the mimicry of vegetation. The peacock katydid (*Pterochroza ocellata*), for example, precisely mimics the discoloration of a dead

Acrida turrita

Classification:

Kingdom: Animalia

Phylum: Arthropoda

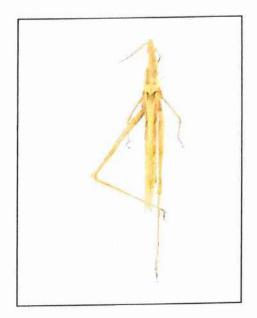

Class : Insecta

Order : Orthoptera

Family : Acrididae

Genus :Acrida

Species: turrita

Morphology:

Brown; tegmina long, narrow and pointed, extending when closed beyond the abdomen; head slender, longer than the pronotum by the length of the fastigium in front of the eyes; wings hyaline, pointed at the extremity

Economic importance:

Insects of this genus are omnivorous, and are a well known pest of many agricultural crops.

American Grasshopper

Classification:

Kingdom: Animalia

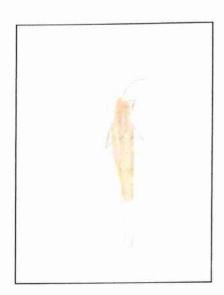

Phylum: Arthropoda

Class : Insecta

Order : Orthoptera

Family : Acrididae

Type : American grasshopper

Morphology:

The overall body colour gradually changes from pinkish-brown or reddish brown. It is a large, usually has cream strip extending from head to forewing. The adults bear fully developed wings with large dark brown spots on a lighter background. Adults are distinctly different in appearance from the immature stages. The length of male is 39-45mm and female is 42-45mm, saltatorial legs are present. It is feed on a variety of grasses and foliage of woody plants. It is pests

Economic Importance:

It is feed on a variety of grasses and foliage of woody plants. It is a crop pests.

Praying mantis

Classification:

Kingdom: Animalia

Phylum: Arthropoda

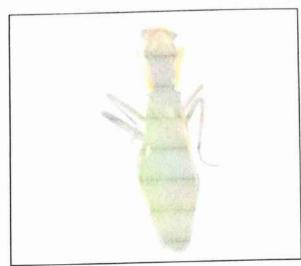

Sub-phylum: Hexapoda

Class: Insecta

Order: Mantoidea

Genus: Mantis

Specie: religiosa

Morphology-

The mantis thorax consists of a prothorax, mesothorax, and a metathorax. In all species apart from the genus Mantoidea, the prothorax which bears the dead and forelegs, is much longer than the other two thoracic segments. Mantises have two grasping spiked forelegs ("raptorial legs") in which prey item are caught and held securely.

Economical Importance:

Organic gardeners who avoid pesticides may encourage mantises as a form of biological pest control. Tens of thousands of mantis egg cases are sold each year in some garden stores for this purpose during fall, praying mantis female's deposit on ootheca on the underside of a leaf or on a twing. If the egg case survives winter the offspring's called nymphs, emerge in late spring or early summer.

Stick Insect

Classification:

S

Kingdom- Animalia

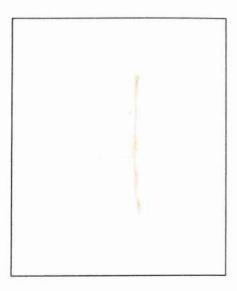

Phylum- Arthropoda

Class- Insecta

Order- Phasmida

Family-Baciilidae

Type- Stick insect

Morphology:

They are commonly called phasmids. Adult is relatively large, about 1.5cm to 30cm in length, greenish in colour. Head small, prognathus with long antennae, mandibulate type of mouth parts present. Prothorax small, meso and meta thorax are large; the legs are typically long and slender. These creatures look like stick so called stick insect.

Economical Importance:

Phasmids are herbivorous, feeding mostly on the leaves of trees and shrubs, and a conspicuous component of many <u>neotropical</u> (South American) systems. The presence of phasmids lowers the net production of early successional plants by consuming them and then enriches the soil by defection. Phasmatodea are recognized as injurious to forest and shade trees by defoliation

Man faced stink bug

Classification-

Kingdom: - Animalia

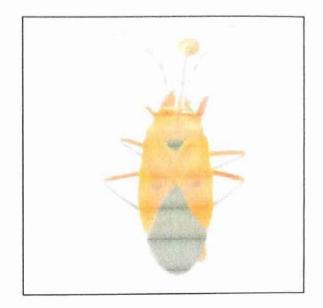

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type- Man faced stink bug

Morphology-

Known as the Man-faced Stink Bug or Man-faced Stink Bug. Catacanthus incarnatus is a species of true bug (Heteroptera) about 3 cms in length, native to Southeast Asia and India. The bugs are found in four bright color morphs: red, orange, yellow and cream with dark eye spots on their leathery scutellum (shield-like projection of their thorax) and forewings, advertising their noxious taste and also perhaps functioning as eyespots to mislead predators. Overall, the spotted pattern resembles a man's face when one views the dorsal side of the bug oriented head dow

Economical importance-

Catacanthus incarnatus has recently been found to be a costly pest to the cashew industry in Karnataka. India, where they can be found in large aggregates of up to 300 individuals on one tree. The bugs use their long stylet to pierce the skin of the cashew apple, and suck out the juices, leaving the fruit vulnerable to colonization by fruit flies and microbes. Damage to the cashew apple reducing the yield of cashew nuts, which are dependent on the apple for growth

Green stink bug

Classification-

Kingdom: - Animalia

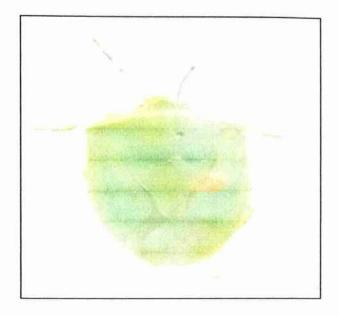

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type- Green stink bug

Morphology-

Like other stink bugs, adult green stink bugs are shield-shaped with fully developed wings. They are solid light green and measure 14 to 19 mm in length. The head and pronotum frequently are bordered by a narrow, orange-yellow line. Both adults and nymphs have piercing and sucking mouthparts for removing plant fluids.

Economic importance-

The green stink bug attacks the developing fruits of several cultivated trees, and the type of damage varies with the age of the developing fruit. The earlier feeding occurs in the development of the fruit, the more severe the damage. Injuries are usually caused by adults as the nymphs are not mobile enough to move to early-producing fruit trees like peaches or nectarines. However, in grapes, adults often lay eggs early in the season and the small nymphs will begin to suck the juices out of the maturing fruit.

Shield bug

Classification-

Kingdom: - Animalia

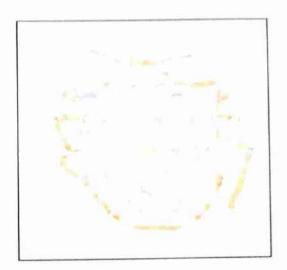

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Pentatomidae

Type: Shield bug

Morphology:

Body is green or brown in colour. The scutellum is typically half of an inch long, as usually trapezoidal in shape, giving this family the name **shield bug.** The forewing developed in the form of hemielytra. It has tendancy to eject a foul smelling glandular substance secreted from pores in the thorax when disturbed.

Economic importance:

It is predator of other insects such as Mexican bean beetle, Japanese beetle and other pest insects.

Reduviid bug

Classification-

S

2227

222200000000000000

)

777

Kingdom: - Animalia

Phylum: Arthropoda

Class: Insecta

Order: Hemiptera

Family: Reduviidae

Type: Reduviid bug

Morphology:

These are predatory insects. Body measures about 4-40mm in length. These bugs are generally black or dark brown in colour. The most common species have an elongated head with a distinct narrowed neck, long legs and prominent segmented tube for feeding. The most distinctive features that the tip of the rostrum fits into a groove in the prosternum where it is rasped against ridges produce sound, a tactic often used to intimidate predators.

Economic Importance:

Some suck blood from vertebrates, including humans, and transmits diseases

Greater Banded Hornet

Classification-

U

S

Kingdom: - Animalia

Phylum: Arthropoda

Class: Insecta

Order: Hymenoptera

Family: Vaspidae

Type- Greater banded hornet

Morophology:

This is a medium-sized to large species. Queens reach 30mm or more, males average 26mm and workers average 24 to 26mm. There is some geographical variance within this species. Generally, the second abdominal segment carries a large area of bright yellow, while the rest of the abdomen is black. In Hong Kong, the head and sides of the thorax are usually reddish.

Economic importance:

Like other social wasps, homets build communal nests by chewing wood to make a papery pulp. Each nest has one queen, who lays eggs and is attended by workers who, while genetically female, cannot lay fertile eggs. Most species make exposed nests in trees and shrubs, but some build their nests underground or in other cavities. In the tropics, these nests may last year-round, but in temperate areas, the nest dies over the winter, with lone queens hibernating in leaf litter or other insulative material until the spring.

Hornets are often considered pests, as they aggressively guard their nesting sites when threatened. This is particularly true for hornets nesting close to human habitation, as their stings are more dangerous than those of bees

Bumble bee

Classification:

66666

V

V

U

V

0

V

0

2010000000000

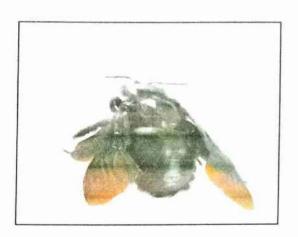

Kingdom: Animalia Phylum - Arthropoda

Class: Insecta

Order: Hymenoptera

Family: Apidae

Type- Bumble bee

. Morphology:

Bumble bees are social insect that are characterized by black and yellow body hairs, of the in bands. However dome species have orange or red on their bodies, or many be entirely black another obvious characteristic is the soft nature of the hair called pile that covers their entire body making them appear and feel fuzzy

Environmental Importance:

Bumble bees are increasingly cultured for agriculture use as pollinators because they can pollinate plant species that other pollinators cannot by using a techniques known as buzz pollination.

Hawk moth

Classification-

Kingdom: Animalia Phylum: Arthropoda

Class: Insecta

Order : Lepidoptera Family : Sphingidae

Type- Hawk moth

Morphology

Daphnis nerii known as the oliender Hawk-moth or army green Moth, the adults feed on nectar of a great variety of flower. They have a preference for fragrant sp. Like petunia, jasmine and honey suckle They are especially active in twilight time, hovering over the flower after sunset the caterpillar feed mainly on oleander leaves, highly toxic plant to which toxicity they are immune.

Economical Importance:

Particularly their caterpillars are major agriculture pest Due to their color they have ability to camouflage. But adults are not harmful.

Fruit sucking moth

Classification-

Kingdom: Animalia

Phylum: Arthropoda

Class: Insecta

Order : Lepidoptera

Family: Noctuidae

Type- Fruit sucking moth

Morphology:

The adult moth has fawn forewings with a variable pattern pale and dark lines and patches. Forewings are pattern brown, grey and buff, hindwings and abdomen predominantly clear yellow orange. The hindwings have 2-10mm black margin, white marginal spots, and a 3mm central black spot, hence the name **dot underwing.** The moth has a wingspan of about 16mm. Piercing and sucking type of mouth parts.

Economic Importance:

It considered a pest of citrus and other fruit trees.

Common Mormon

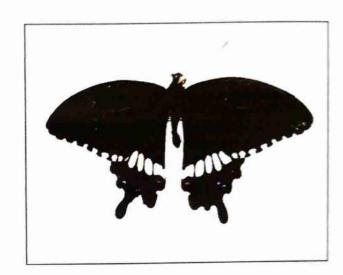

Classification-

Kingdom : Animalia Phylum : Arthropoda

Class: Insecta

Order : Lepidoptera Family : Papilionidae

Type: Common mormon

Morphology:

3

3

3

3

3

0000000000000

It is a large sized butterfly with awingspan about 90-100mm. The male has morph only. It is adark coloured swallow tailed butterfly. The upper forewings has a series of white spots decreasing in size towards the apex. The upper hindwing has a complete decaled band of elongated white spot. It may or may not is equal to three marginal red crescents. The male are smaller in size than the forms of morphs.

Economic importance:

In the early morning the butterflies fly low over the ground, and settle to bask for long periods on low vegetation. Both sexes will nectar at lantana and a wide variety of other wild and cultivated flowers.

Dragon fly

Classification:

Kingdom: Animalia

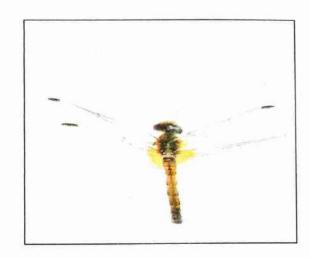

Phylum: Arthropoda

Class: Insecta

Order: Odonata

Family: Libellulidae

Type: dragon fly

Morphology:

Body colour is yellowish, measures about3cm and wingspan 4.9cm in length. Head large, highly movable; compound eyes are large occupying the greater part of head. Biting and chewing type of mouth parts. Abdomen is elongated, tapering and slender. They are strong fliers and can be seen well away from water. Hindwings are as usually shorter and wider than the forewings, at rest the wings are held open.

Economic Importance:

Dragonflies and damselflies are predatory both in the aquatic nymphal and adult stages. Nymphs feed on a range of freshwater invertebrates and larger ones can prey on tadpoles and small fish.

Mango stem borer

Classification:

Kingdom: Animalia

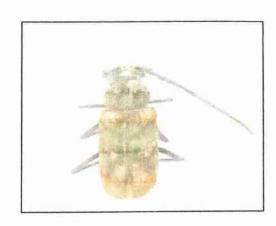

Phylum: Arthropoda

Class: Insecta

Order : Coleoptera

Family: Cerambycidae

Type: Mango stem borer

Morphology:

Medium-large sized, head prognathus; freely movable, mandibulate type of mouth parts; compound eyes well developed; serrate type of antennae present. Body colour light brown. Forewing modified into elytra, hindwing membranus used in the flight. Body wall heavily sclerotised, pigmented and legs are well developed. Abdomen sessile with 10 segments without anal cerci.

Economic Importance:

Powdery mildew, anthracnose, die back phoma blight, bacterial canker, red rust.

Rhinoceros beetle

Classification:

Kingdom: Animalia

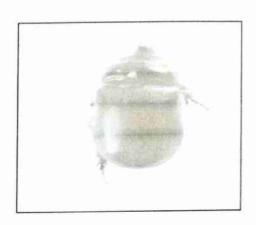

Phylum: Arthropoda

Class: Insecta

Order: Coleoptera

Family scarabcidae

Type: Rhinoceros beetle

Morphology:

3

00000000000

These are among the largest of beetles in the world, named for the impressive hornlike structures on the frontal portions of males. These beetles have rounded, convex backs, and their coloration varies from black to mottled greenish gray. Some are shiny, almost metallic, whereas others may be covered with short, fine hairs, giving them a velveteen appearance.

Economic Importance:

On oil palm the economic threshold for rhinoceros still needs to be investigated Slight damage: limited signs of damage to fronds with little or no damage to spears. Medium damage: numerous damaged fronds but with new healthy spears.

Dung beetle

Classification:

Kingdom: Animalia

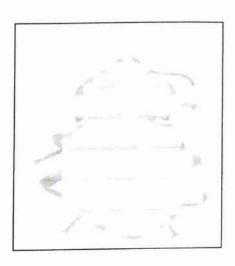

Phylum: Arthropoda

Class: Insecta

Order: Coleoptera

Family: Scarabaeidae

Type: Dung beetle

Morphology:

These beetles feeds partly or exclusively in dung. It can burry dung250 times heavier than itself in one night. It can grow to 3cm long and 2cm wide. Dung beetles are currently the only known non human animal to navigate and orient themselves using the milky way.

Economic Importance:

0000000000000000000

They improve nutrient recycling and soil structure. They also protect livestock.

Discussion

Insects found everywhere in the world and are dominant animals on the earth. In the ecosystem they play important role for balancing the nature. They are also associated with human in many ways. Insects are useful as well as harmful to human. They feed on plants, animals and act as parasitoid and predators against many insects' pests. They secrets pheromones and hormones to attract their own species. Man has been used these chemicals to control insects pests. They act as good biocontrol agents in IMP. Some useful products. They are also used in forensic science.

In other hand, some insect act as harmful pests of agriculture, forest, stored grains, household and domestic animals some insects transmit various diseases to human and animals class insect represents a very large diversity in ecological, morphological, physiological and reproductive characteristics. In the present work, morphological diversity has been studied.

Conclusion

The species of insects from 8 orders have been reported form Peth Vadgaon and adjuscent area. However, diversity plays an important role in sustainable development of a country or a region. This work will add great relevance for the development of the region by providing base line data.

Department of English Shri. Vijaysinha Yadav College Peth Vadgaon, Dist. Kolhapur.

Alexander pope was born in London on 21" may 1688. His payents were catholics. As a result, he did not get admission to any public school. Little Alexander learned to read and write by himself. A priest, however, gave him lessons in greek and latin. He was a voyacious reader and liked to read anything, especially poetry. His love of reading was also due to his physical deformity. Though a bay with a handsome face, he was a dwarf by stature and a little deformed. This physical stature was a result of a severe illness in his boyhoodpope never enjoyed good health. His life was one long disease. constant care and nursing was the need of his life. Headache was his lifelong headache.

This resulted in his being irritable and impatient. He could not tolerate being spoken to and shumped company. This may probably explain why he had few friends and many enemies. He was a generous and sincere person to his few friends but Nery severe with his enemies. His literary career is a career of quarrels and literary disputes with those with whom he disagreed or those whom he disapproved. That is only in his days he was famous for his quarrels with a number of persons that included people like Wycherley, Henry cromwell and Addison. Pape died on 30th May 1744.

Pope's age is called the Augustan Age. The writers of this period were inspired by the classical poets of the period, when king Augustus ruled the Roman Empire. Horace, ovid and other classical writers were their models. However, Pope dominated the literature of his day so much that the period got

the name the Age of Pope. The liteary career of Pope begins in the real sense with the "Essay on Criticism", which made him famous. In this and in later poems he virtually followed the advice of walsh, who advised him to seek correctness in versification, language and everything he did in the field of literature. The poetic career of Pope can be analyzed livided in (A) Pastoral Poems @ Didactic Poems @ satiric Poems and @ Other Poems. The poem we are supposed to study belongs to the last group. Mys. M. B. in the title has been identified as Mrs. Martha Blount, a close friend of not only Alexander Pope but of the Pope family. On our friend's birthday we send him a wish today on face-book, what's app or mobile phone. We say "Happy Birthday Dear - "or" many, many happy Yeturns of the day Dear-". Here Pope does the same. But that is not just a wish or a blessing. There is much more hidden under it. We will discover it and look at it in details as we go through the poem.

To Mrs. M.B Oh Her Birthday

- - by Alexander pape

Oh be thou blest with all that Heav'n can send, Long Health, long Youth, long pleasure, and a Friend: Not with those Toys the female world admire, Riches that vex, and vanities that tire. With added years if Life bring nothing new. But, like a sieve, let eviry blessing thro. Some joy still lost, as each vain year runs o'er, And all we gain, some sad Reflection more; Is that a Birth-Day? tis alas! too clear, Tis but the funeral of the former year. Let joy or Ease, let Affluence or content. And the gay conscience of a life well spent. Calm ev'ry thought. Inspirit ev'ry grace. Glow in thy heart, and smile upon thy face. Let day improve on day, and year on year, Without a pain, a Trouble, or a Fear: Till Death unfelt that tender frame destroy, In some soft Dream, or Extasy of joy,

Peaceful sleep out the sabbath of the Tomb,

And wake to Raptures in a life to come.

Stamay Stamay

Happy birthday. Dear Mrs. M.B. May god bless you with all the gifts. He can bestow on you, such as long health, long youth, long pleasure and a real friend. But let you be spared from the things that ladies normally love, such as riches, vanities.

If life brings nothing new to you with the added years and lets every blessing go away our of you as through a sieve such as joys and useless years run over, how can it be called a Birth-Day? on the contrary, it is the funeral of the former year.

So let joy, ease, yiches, satisfaction and conscience of life be used properly and let commess encourage every grace in your let there be glow in your heart and smile on your face. Let every day and every year prove better to the previous one. Let there be no pain, trouble or fear in your life till you breathe your last, and let death destroy bring your end, without giving you any frouble. It should be like a soft, joyful dream and a peaceful sleep that god enjoyed on the subbath day and in your next life you should enjoy all eastasies.

Report of Study Tours [2016 to 2021] 2018-15 -

Department of English conducted various student centric activities to enhance student performance in academic development. The Study Tours is one of those activities that promoted overall development of students of second and third year. The importance of educational excursions includes giving students the chance to build closer bonds with their classmates, experience new environments and enjoy a day away from the classroom. There are many benefits of study tours such as:

- 1. Talking with Locals
- 2. Cultural Observation
- 3. Connecting Different Issues
- 4. Instilling A Passion for Travel
- 5. Real-World Experience

The details of the activity are as following:

S.N.	Date	Place	Name of Faculty	Class	No. of Students
1	27/02/2019	Kaneheri Math, Kagal, Kolhapur	Dr.A.L. Powar	B.A. II	07

Following are the outcomes of this study tour:

- 1. Awareness of Indian Culture
- 2. Increased interest in Indian Historical Places.
- 3. Fostering cooperative environment.
- 4. Improved enthusiasm in nature.
- 5. Growth in aesthetic appreciation and research approach.

Department of Chemistry

Student Centric Activity: Project

2018-19

Every year department of Chemistry organizes Project for B. Sc. III students. The aims of the personal project are to allow students to: demonstrate the personal abilities and skills required to produce and present an extended piece of work. Engage in personal inquiry, action and reflection on specific topics and issues. Focus on, and demonstrate an understanding of, the areas of interaction.

Objective

- Initiation, planning, execution, regulation and closure as well as the guidance
 of the project team's operations towards achieving all the agreed upon goals
 within the set scope, time, quality and budget standards.
- · Think positive to stay focused.
- Stay resilient.
- · Make time to read.
- Manage your time.

Introduction

Define cold drinks-

The main production of soft drink was stored in 1830's since then from these experimental beginning there was an evolution until in 1781 when the words first cola favored beverage was introduced these drinks were called soft drinks only separate them form hard alcoholic drinks.

The era of cold drinks began in 1952 but the industrialization in idea marked it's beginning with launching of limca and gold spot by pariey groups of companies since the beginning of cold drinks was highly profitable and luring may multination companies launched their band in india lke pepsi and coke

The majority of people viewed spirite, Miranda and limca to give feeling og lightness, while pepsi and thumps'up activate pulse and brain.

1.Coca-Cola-

The drinks is called Coca-cola because of the cocaine leaf and cola fruits that were used to add flavor Dr.Pembertan's parlner and bookkeeper Frank roobinson suggested the name Coca-cola because the thought using the latter C twice would better than if they used k in the word cola.

Coca-cola history has that beverage been green the original formula called for caramel to give coca-cola's it rich brown color and although the recipe has undergone some changes through the years none of them affected the ultimate colour of the product.

One can of coke (330ml) contains 100% of year daily sugar allowance and there's no den eying that will have a corrosive effect on your teeth over time.it is also a dilute meaning however cooling and thirst quenching it might seem.

- 1] Kidney failure-drinking coke daily.
- 2] Risk failure
- Heart and blood problems.
- 4] Skin problems.
- 5] Obesity.
- 6] dental erosion.

Vitamin deficiency the phosphoric acid contained in coke along caffine which has a diaret.

Department of Chemistry

Student Centric Activity: Project

2018-19

Outcomes

Department of Chemistry carried out project for B.Sc.-III students. In this academic year each student carried out one project on different subject. Some of the positive outcomes of this activity are as fallows.

Project outcomes are the changes that occur as a result of your actions. These typically involve improvements for a product or service. When designing a project, it's important to know what your project outcomes are so you have a way of measuring your success and understand what your overall goal is. The benefits that a project or intervention is designed to deliver. Outputs: the tangible and intangible products that result from project activities.

- Students collect data and interrelate it.
- Students develop cooperative nature.
- Students read various research paper related to project.

Patience and thinking ability increases.

Student Centric Methods - 2018-19

The department of zoology is conducting different student centric activities for all over progression of the students. The activities like seminars, research projects, Zoology corner-Annual question series in Zoology, poster presentation sessions, article writing, guest lectures, and study tours, etc. are conducted for the students. The main objective to conduct these activities is to develop research attitude, presentation skills and personality of the students.

In Academic year 2018-19, the activities like seminars, research projects, Zoology corner-Annual question series in Zoology and study tours were conducted. After conducting each activity students counselling drive is run to discuss the do's and don'ts for these activities with the students. The teachers from the department explain the students about their positive things as well as drawbacks in each activity. This guidance motivates the students for their overall development. The students get benefit of these activities in their higher education such as M. Sc., Ph. D. as well as in their jobs.

Sr. No.	Name of activity	Date	Outcome
1	Seminars of the students	August to September 2018	Explanation methods, Referencing skill Stage daring in the students,
2	Research Projects	December 2018 to March 2019	Research attitude, Reference searching report writing skills
3	Study tours	December 2018 & January 2019	To correlate the theoretical knowledge with experiential learning
4	Zoology corner- Annual question series in Zoology	July 2018 to March 2019	Referencing skill, Answer writing skill, presentation on paper

Acknowledgement

We consider ourselves very fortunate to have worked under the inspiring guidance of Dr. Atigre R. H. Asst. Professor and Head, Department of Zoology, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon, who introduced us to this modern area of research. Words are inadequate to express our thanks towards him who inspired the passion for research.

We are also thankful to Prin. Dr. V. R. Chavan, Shri Vijaysinha Yadav Arts and Science College, Peth Vadgaon, for providing all the facilities to carry out this work.

I am also thankful to Dr. S.V Maske, Shri Madane K. A., Smt. Pawar A. S. and Miss Thorvat T. R. for their support and guidance in the completion of the project. I am also thankful to Shri Yadav Ranjit, Lab Assistant, Shri Rongate Shrinivas, Lab. Assistant and Shri Ghabak Anil Lab. Attendant for their all time help during the completion of the project.

We owe a deep sense of gratitude to our parents for their constant encouragement during the tenure of this study.

My wholehearted thanks are also due to all those who have directly or indirectly contributed to the successful completion of this work.

Miss. Kekare Jyoti Maruti Miss. Yadav prajakta Ashok Mr. Patil Sandip Jaysing

Chapter 1 - Introduction

Nowadays many intensive field vegetable production systems are not sustainable due to causing severe environmental damage. Often large amount of vermicompost remains in the soil after harvest of the crop. This vermicompost comprises residual soil nitrogen and crop residues vermicompost. Both vermicompost sources affect ground water quality through nitrate leaching and air quality through nitrous oxide emission (S. Gular, 2005). Vermicompost fertilizer enables farmers to achieve the high yields that drive modern agriculture. The use of vermicompost fertilizer will continue to increase substantially as global population and food requirements grow.

Integrated use of chemical fertilizer and recycle organic waste may be an approach for sustainable production of crops. This may improve the efficiency of chemical fertilizers and thus reduce their use. Integrated use of organic and inorganic fertilizer can improve crop productivity and sustain soil health and fertility (V. Satyanarayana, 2009). Application of compost along with chemical fertilizers has been reported to give highest yield and maximum return. This treatment may also help to alleviate certain nutritional problems that result in poor health and individual productivity (H.N. Aaghar, 2006). The use of fish manure could be an important alternative for recycling this organic waste, reducing the direct risks of water pollution from the fish farming industry (F.J Salazar 2006). The results of study carried out by Naylor et.al. 1999 indicate that fish manure is similar in its chemical composition to other livestock manures, and should be suitable for use as an agricultural fertilizer. In addition, it is hoped that these data will also help regulatory agencies and farmers make sensible and pragmatic decisions concerning the appropriate and safe disposal of manure wastes collected from land based trout culture facilities. Agriculture carried by use of fish manure can be a way of reducing the environmental impact of nutrient rich streams and the amount of chemical fertilizer needed for (E. Castro, 2009). This

study was conducted to determine the response of various dozes of fish manure and ammonium nitrate fertilizers on plant growth, yield and nutrient content of lettuce. In today's era, heavy doses of chemical fertilizer and pesticides are being used by the farmers to get a better yield of various field crops. These chemical fertilizers and pesticides decreased soil fertility and cause health problem to the consumers. Due to adverse effect of chemical fertilizer, interest has been stimulated for the use of organic manures (Follet et al., 1981). The green revolution in India promoted the indiscriminate use of chemical fertilizer and pesticides to obtain a better crop yield. In course of time the tropical soil after receiving such chemical turned unproductive due to lack of proper amendments of organic matters (Kale, 1998). The best alternative of the present day's environmental dispersion is to make proper use of the available unutilized organic biodegradable wastes in order to convert them into compost within a short period (Edwards, 1988)

Chapter 2 - Materials and Methods

The plant used in present study is Wheat- *Triticum aestivum* belonging to family Poaceae and subfamily Pooideae. It is a grass widely cultivated for its seed, a cereal grain which is a worldwide staple food (Mauseth 2014, Belderok, et al 2000, UN FAO, 2014). The many species of wheat together make up the genus *Triticum*. Wheat is grown on more land area than any other food crop (220.4 million hectares, 2014) (Curtis 2002). World trade in wheat is greater than for all other crops combined (FAO 2016).

Wheat is an important source of carbohydrates (Day L,et al 2006). Globally, it is the leading source of vegetal protein in human food, having a protein content of about 13%, which is relatively high compared to other major cereals (FAO 2017) but relatively low in protein quality for supplying essential amino acids (FAO 2013, Ludvigsson, et al 2013). When eaten as the whole grain, wheat is a source of multiple nutrients and dietary fiber (Day Let al 2006).

Technological advances in soil preparation and seed placement at planting time, use of crop rotation and fertilizers to improve plant growth, and advances in harvesting methods have all combined to promote wheat as a viable crop. When the use of seed drills replaced broadcasting sowing of seed in the 18th century, another great increase in productivity occurred.

Yields of pure wheat per unit area increased as methods of crop rotation were applied to long cultivated land and the use of fertilizers became widespread. Improved agricultural husbandry has more recently included threshing machines and reaping machines (the 'combine harvester'), tractor-drawn cultivators and planters, and better varieties.

In India wheat crop is considered as Kharif crop. For present experimental germination studies the seeds of *Triticum aestivum* are used.

Preparation of Vermicompost

Leaf litter was collected periodically from the Coimbatore and kept in large plastic container. The collected leaf litter was sun dried cutinto small pieces of 4 to 5 cm length and kept ready for composting. Compost mixture was prepared in the ratio of 1:1 [w/w] of lead and cow dung [13kg] in round plastic container, sprinkled with water to maintain moisture content and was allowed for pre-digestion. Pre-digestion of consort mixture was done for 21 days with regular mixing for pre-decomposition by the microbes. On 21 day of pre-digestion, the weight of the predigested compost mixture was noted.

After 21 days pre —digestion, 10 kg of pre-digested mixture was transferred to the plastic container. Eisenia foetida (Savigny, 1826) earthworms (total biomass of 520 Gmas) were introduced into which each container containing the pre-digested mixture. Vermicomposting was allowed for 19 days with regular sprinkling of water to maintain the moisture content (65-70% RH) in the mixture at the end of 19 days of vermicomposting, the vermicompost from the container were spread separately on a polythene sheet. From the vermicompost adult worms and young ones were handpicked and isolated. The vermicompost thus obtained the composting leaf litter was dried and for cultivation of plant.

Preparation of Fish Manure

Dried and ground fish or fish guano is a valuable fertilizer obtained mainly from two sources as the refuse from fish packing and canning establishments and the Pomace (Oil) from the extraction of oil from fish. The product from the latter source is especially rich in fertilizing constituents, containing from 7 to 8 per cent of nitrogen and 6 to 8 per cent of phosphoric acid. The availability of the nitrogen is nearly as great as that of dried blood and tankage. The phosphoric acid is frequently more available than that in other organic matter. The availability of

the fertilizing constituents depends largely upon the proportion of oil present. A considerable proportion of the latter delays decomposition in the soil, and thus reduces the availability. The oil is removed and the fish prepared for use as a fertilizer on a commercial scale by cooking with water in tanks heated with steam. The oil rises to the surface of the water and the two are drawn off together. The residue is pressed, dried, and ground. In some cases, after the first pressing, the material is subjected to the action of steam under pressure and sulphuric acid (5 per cent.) to render the fertilizing constituents more available. The uncooked fish is sometimes treated directly with sulphuric acid to prevent offensive decomposition and to increase the availability of the nitrogen and phosphoric acid.

Fish manures are prepared and used in considerable quantities, especially along the northeastern coast in America, in Norway, and other regions where the supply of material is abundant. Fish manure is exported in considerable quantities from Norway.

In localities where it can be readily obtained from fishermen, fish-scrap is frequently used without preparation of any kind. Naturally, this product is very variable in composition, the nitrogen ranging from 2.5 to 8 per cent and the phosphoric acid from 2 to 6 per cent. The fertilizing constituents of this material are less available than those of the dried and finely ground fish. The whole fish are also sometimes used as manure, either directly or composted with other materials. It is stated in Bradford, *History of Plymouth Plantation* (Boston, 1856), that the Indian Squanto first taught the New England colonists to use the menhaden as a fertilizer for com, instructing them to put the fish under the hills at the time of planting.

Experimental Methodology - Germination of seeds:

The effect of Vermicompost and Fish Manure on seeds of Wheat were investigated. The seeds were allowed to germinate in the cups. In each cup three seeds were sown and treatment

was given as per the table 1. Number of seeds germinated and length of Hypocotyl were measured at the of tenth day.

The effect of the treatment on seed germination of wheat was studied by one set as treated with water which is considered as control, and other sets were treated with 10% VC (Vermi Compost), 20% VC, 10% FM (Fish Manure) and 20% FM. Cups were maintained at a room temprature under natural light conditions and periodically observed. Then total number of seeds germinated was calculated for the control and treated plant. From this observation the persentage of germination was calculated.

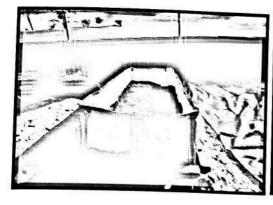

Statistical analysis:

The results where statistically analyzed according to standard method. The mean was calculated according to standard method.

Sr. No.	Title	Concentration of fertilizer
1	Control	20 gm coco pit
2	10% VC	2 gm VC + 18 gm coco peat
3	20% VC	4 gm VC + 16 gm coco peat
4	10% FM	2 gm FM + 18 gm coco peat
5	20% FM	4 gm FM + 16 gm coco peat

Chapter 3 - Observation and Results

Germination of Seeds

To study the effect of Vermiwash and fish manure on the germination of seeds they were allowed to germinate in the cups and the treatment were given as per table 1. The Hypocotyl length was measured on tenth day. The effect was studied by soaking the seeds in water for one set which served as the control containing 20 gm Coco Peat while the experimental cups were containing the mixture of Coco Peat and vermicompost as well as Coco Peat and fish manure as given in table no 1.

After germination the cups were maintained at a room temperature and periodically observed. Then the total number of seeds germinated was calculated for the control and treated plant. From this observation the percentage of germination was calculated.

Germination percentage:

The germination percentage was determined for the control, as well as 10% VC (Vermi Compost), 20% VC, 10% FM (Fish Manure) and 20% FM. Seeds that were treated with 10% VC, 20% VC, 10% FM and control shows 100% germination while those treated with 20% FM shows 66% germination (Table 2).

Germination percentage =
$$\frac{NG}{NT}X$$
 100

Where, NG = Number of seeds germinated.

NT = Number of seeds treated.

Parameters of seedlings - Hypocotyl length:

The seedling character observed was Hypocotyl length. The seedlings were kept under observation for ten days. The length of Hypocotyl was measured on tenth day and it was noted.

The length was observed to be maximum in 20% VC followed by 10% VC, control, 10% FM and 20% FM as given in table no. 3.

Sr. No.	Fertilizer	Germination %
1	control	100
2	10% VC	100
3	20% VC	100
4	10% FM	100
5	20% FM	66.66

Table 2 Germination percentage of wheat seeds

SR. NO.	TREATMENT	SEEDLING HEIGHT			MEAN
		1	2	3	WEAN
1.	control	22 cm	25 cm	24 cm	23 cm
2.	10% VC	27 cm	25 cm	24 cm	25.3 cm
3.	20% VC	28 cm	24 cm	25 cm	26 cm
4.	10% FM	15 cm	23 cm	17 cm	18.3 cm
5.	20% FM	15 cm	17 cm	-0	16 cm

Table 3 Effect of Vermicompost and Fish Manure on Hypocotyl growth of wheat.

Chapter IV: Discussion and Conclusion

The present study has been conducted on Wheat to determine the potential of Vermicompost and Fish Manure. The effect of these two biofertilizers was studied in bringing about seed germination and seedling growth parameters. The composition of Vermicompost and Fish Manure need to be standardized to suit the plant to which it will be applied. The results obtained in the present study shows that the Vermicompost is better than the Fish Manure for the seed germination purposes. These results have correlated with the result of Eva Broad and others (2017). They prepared the Fish Manure and studied its effect on various plants. They conclude that the Fish Manure is not so effective for seed germination. The reason behind this may be that the micro and macro nutrients of the plants are not readily available in the Fish Manure as they are available in the Vermicompost.

A PROJECT REPORT ON

"ONLINE COLLEGE EVENT MANAGEMENT SYSTEM"

FOR

PERSONAL AND PUBLIC USE SUBMITED TO

Shri, Shahu Shikshan Prasarak Seva Mandal Sanchalit

SHRI, VIJAYSINHA YADAV ARTS AND SCIENCE COLLEGE, PETH VADGAON BY

Mr. Patil Pranay Prakash.

UNDER THE GUIDENCE OF Prof. Miss. Mohite S. M.(M.Sc Comp.Sci.)

DEPARTMENT OF COMPUTER SCIENCE
Year 2018-2019

Department of Computer Science, Shri. Vijaysinha Yadav College Peth Vadragov, Dist. Kolbegus Principal Shri. Vijaysinha Yaday College Peth Vadyaon, Dist. Kolhapur.

CERTIFICATE

This is to certify that, Mr. Paul Pranay Prakash have completed their project work on "Online College Event Management System" for shri Vijaysinha Yadav Arts & Science College, Peth-Vadgaon.In pratical fulfillment of the degree course "Bacholor of Computer Science (ILSa-III)" during the year 2018-2019 affiliated to Shivaji University, Kolhapur.

The work has been carried out under my guidance. To best of knowledge, the matter present in this project has not been submitted rurlier and is has original work. This project works shows their hard work and sincer effort.

Project Name: "Online College Event Management System"

DECLARATION

We undersigned, hereby declare that the projectentitled 'Online' tollege Event Management System' is original work prepared by us under the guidance of Prof. Miss. Mohite S. M. The empirical findings in this report are based on the data collected by us. The matter presented in this report is not copied from any other source.

We understand that any such copying reliable to be punished in any way that the university authority they fit.

This work is humbly submitted to "Shivaji University Kolhapur" for the award degree of "Bachlor of Science in Computer Science (B.Sc.)" for us.

Thangking you.

Date: 12/03/2019

Mr. Patil Pranay Prakash
