Report of Slow and Advanced Learners 2022-23

The students of the department had been chosen through previous marks, subject knowledge (question-answer), answer writing skills (Unit Test-I), punctuality etc. to decide slow and advanced batch in concern academic year. The departmental faculties have taken personal special care about their overall performance particularly academic and personality development. For this purpose department had conducted special coaching classes per batch per class each minimum 2 to 6 lectures per semester.

Following results had been observed in slow and advanced learners:

1. Development in their personality.
2. Initiative in departmental activities and also college level activities (curricular and extra-curricular activities).
3. Increase competence and aptitude among slow and advanced learners.
4. Overall positive change had observed by departmental faculty in slow and advanced learner

Whatever concern to quantitative change (academic results) among slow and advanced learners, it was observed that majority students showed positive growth in their marks. To clear this aspect we are taken one sample of last year (B. Sc. III) students for academic three years. The following year-wise table gives detail idea about it:

Report of Slow Learners (2022-23)

The Institution undertakes many efforts to identify and address the needs of students admitted in the college from diverse backgrounds. Language proficiency, competence, familiarity with techniques and technology, subject knowledge and the extent of motivation are a few of the determining factors revealing advanced and progressive learners. The Department of Chemistry assesses the learning level of the students, after admission. For this an Induction programme is held in the beginning of this academic year for newly admitted students. The slow learners are identified on the basis of marks obtained in the previous Exam as well as by interactions and their performance in various tests, tutorials, examinations, promptness in class etc. To instill further skills, advanced learners are facilitated by Add-on courses conducted by the various departments.

To gain substantial experience, faculty encourages students to participate in various programmes such as seminars, workshops, training programmes, research project competitions organized by the Department. Slow learners are also encouraged to access additional study materials from e-resources apart from the books available in central as well as departmental libraries. Students are inspired to organize and participate in curricular, co-curricular and extra-curricular activities.

Following results had been observed in slow learners:

1. Development in their personality.
2. Initiative in departmental activities and also college level activities (curricular and extra-curricular activities).
3. Increase competence and aptitude among slow and advanced learners.
4. Overall positive change had observed by departmental faculty in slow and advanced learners.
5. Whatever concern to quantitative change (academic results) among slow learners, it was observed that majority students showed positive growth in their marks.

Guidance "Slow learners"

A slow learner student takes more time in calculation and to solve more examples of Maths. We have to give extra time if needed to understand that problem & find out the answer. It will help the slow learner to exact their abilities & we can guide them how to solve the problem in quicker.

② We have to discuss with student about their syllabus & difficulties in the syllabus & also find their problems about most equations.

③ We have to provide in the depth knowledge how to manage their time to solve a particular type of questions. It helps them in the next problem efficiently.

④ We have to conduct test learner's & solved difficulties of that test.

Guidance Advance learner

- 1) We have given extra knowledge taken extra examples to solve to the advance learner's
- 2) We do have discuss with students about syllabus and doubts
- 3) We have educated the advanced learners by teaching them carrier oriented knowledge
- 4) we have taught the advanced learners on screen PPT Presentation to build the concepts more & memorable.

Slow Learners and Advanced Learners- Register

Brief write-up

The college offers Graduation to the students from the rural as well as urban backgrounds in Peth Vadgaon. During the path of Teaching and Learning process, teachers have to deal with different types of students; some are very bright who understand learn very fast and some are quite weak to learn and grasp the instructions very slowly. Some students need only guidance and some need a hard work and regular guidance. To determine the abilities in the class, particular when initiating the higher education and proceeding for graduation, a faculty has to recognize the learning attitudes and learners habits of the students differently so as not to lose attention of slow learners and nit to turn off the advance learners.

The purpose of these guidelines is to identify the slow and advanced learners of UG program and to assign the supporting activities for the group.

Objectives

- To solve the difficulties of the students.
- To enhance strong qualities of advanced learners.
- To motivate and help students improve the weak qualities.
- Overall development of students.
